Overview & Current Events

Cincinnati Financial Corp. (CINF) is an insurance company founded in 1950. It offers business, home, auto insurance, and financial products, including life insurance, annuities, property, and casualty insurance. Cincinnati Financial is headquartered in Fairfield, Ohio, and is trading with a \$12.96 billion market capitalization. As an insurance company, Cincinnati Financial makes money in two ways. It earns income from premiums on policies written and by investing its float, or the large sum of money consisting of the time value between the premium income and insurance claims.

On October 26, 2020, Cincinnati Financial reported results for the third quarter of Fiscal Year (FY)2020. Total revenues were up 31% for the quarter, from \$1.7 billion in 3Q19 to now \$2.2 billion. In the nine months of FY2020, the company revenue drop (16)% compared to the nine months of FY2019. Net income increased by 95% to \$484 million, or \$2.99 per share, compared with \$248 million, or \$1.49 per share, in the third quarter of 2019. The increase in net income is primarily due to the after-tax net effect of a \$352 million increase in net investment gains partially offset by a \$106 million decrease in after-tax property-casualty underwriting income. However, net income is down (88)% from \$8.30 per share to now \$1.03 per share for the nine months.

The company also saw a slight increase of \$0.02 in book value to \$60.57 per share since year-end.

We lower our estimated Earnings Per Share (EPS) from the last report from \$3.19 to now \$2.84 per share. This is a decrease of (11)%.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$1.68	\$0.74	\$2.40	\$2.81	\$2.66	\$3.56	\$3.07	\$2.74	\$3.35	\$4.20	\$2.84	\$2.98
BPS	\$30.87	\$31.20	\$33.45	\$37.24	\$40.15	\$39.21	\$42.94	\$50.29	\$48.11	\$60.50	\$60.57	\$63.66
DPS	\$1.59	\$1.61	\$1.62	\$1.66	\$1.76	\$1.84	\$1.92	\$2.00	\$2.12	\$2.24	\$2.40	\$3.06
Shares¹	163.0	163.0	163.0	165.0	165.0	165.0	167.0	166.0	165.0	165.0	162.0	162.0

Cincinnati Financial has grown earnings by 10.7% per year over the past nine years and (4.4)% over the past five years. Consensus analyst expectations are for relatively flat earnings over the next two years. Book value, a significant metric for insurance companies, has grown by 7.8% over the past nine years and 9.1% over the past five years. Unlike many insurers, the company is not a significant buyer of its shares for per-share growth.

The company makes most of its net income from its investment gains and is highly dependent on bond interest rates and stock market performance. Compared to many insurers, Cincinnati Financial is a somewhat aggressive investor and a 39.3% allocation to equities. This gives the company better long-term portfolio growth but a bit more volatility. Bond yields are at historic lows, which could put significant pressure on forward investment returns. We have a baseline forecast of 1.0% earnings and 1.0% book value growth over the next five years, but the estimate is variable depending on overall stock and bond performance in the United States over that period.

¹ Share count is in millions.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	16.8	40.3	14.3	17	18.3	15.2	22.7	26.8	22.3	25.0	28.1	20.0
Avg. P/B	0.92	0.95	1.1	1.28	1.21	1.38	1.62	1.46	1.55	3.8	1.3	1.6
Avg. Yld.	5.6%	5.4%	4.4%	3.5%	3.6%	4.2%	2.8%	3.4%	2.8%	2.1%	3.0%	5.1%

Cincinnati Financial has averaged a 21.9 P/E ratio over the past decade, or closer to 20 if the anomalous high year in 2011, due to briefly low earnings, is excluded. The P/B ratio has averaged 1.5. At the current valuation of 28.1 P/E and 1.3 P/B, the company is higher than its historical norm and modestly high compared to its modest growth rate. We expect a mean reversion to 20 P/E, implying a notable headwind, as the base case.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	95%	218%	68%	59%	66%	52%	63%	73%	63%	53%	55%	103%

Cincinnati Financial has a strong dividend growth track record. Unlike many financial industry peers, it did not cut its dividend payout during the last financial crisis. In 2009, the dividend was not fully covered by earnings, but the company continued to grow its payout, and dividends have been fully covered since 2012. With its dividend record during the financial crisis, BBB+ investment-grade credit rating, and because Cincinnati Financial has 59 consecutive years of annual dividend increases, we believe that the risk of a dividend cut is low with this company.

Cincinnati Financial lacks durable competitive advantages. Its recognized brand and relatively large-scale help, and to that end, Cincinnati Financial have developed a close relationship with its customers. But competition is fierce, and insurance companies do not enjoy high brand loyalty. Competing insurers can lure customers away with relative ease by offering price discounts. Cincinnati Financial is not insulated against recessions but is not as vulnerable as many companies in the financial sector. The company Balance sheet is strong with interest coverage of 19 times and a Debt to Equity ratio of 0.1.

Final Thoughts & Recommendation

Cincinnati Financial is a high-quality dividend stock that has delivered compelling results for shareholders in the past. The company is not a high-growth name, though, and we believe that earnings will rise at a meager mid-single-digit pace. Cincinnati Financial is trading at a high valuation compared to what seems justified based on its growth outlook and historical valuation. Since our report on May 4th, the company traded hand for \$59, and the stock was undervalued to our fair price, and we had a Buy recommendation. Since that report, the company share price has increased by 31.7%. Because the stock price of Cincinnati Financial has gone up too much, the company earns a Sell recommendation due to its high valuation levels compared to historical valuation levels with an estimated total return of (1.6)% annually for the next five years.
