Overview & Current Events

Lamar Advertising traces its lineage back to 1902 when Charles Lamar helped form a small poster company in Florida. Since that time, the business has grown exponentially into an advertising giant with 350,000 outdoor displays in nearly every state, Canada and Puerto Rico. The trust changed its corporate structure to become a REIT in 2014 and today, it trades with a \$7.7 billion market capitalization and produces in excess of \$1.5 billion in annual revenue.

Lamar reported Q3 2020 results on 11/5/20. Net revenue fell by 15.7% to \$386.1 million, net income came in at \$62.8 million, and adjusted EBITDA fell by 20.7% to \$170.7 million. Adjusting for acquisitions, net revenue decreased by 15.5% and EBITDA decreased by 20.1%. That said, the trust's liquidity position is strong with \$770.8 million in total liquidity (\$666.9 million available on the revolving senior credit facility, \$35.3 million available under the Accounts Receivable Securitization Program, and \$68.6 million in cash and cash equivalents). Meanwhile, total operating expenses decreased by 11.4% and operating income also decreased \$35.6 million to \$105.9 million compared to \$99.7 million in the year-ago period. The company also raised its guidance range for full-year diluted AFFO per share to between \$4.65 and \$4.85.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
FFOPS	\$2.94	\$3.31	\$3.25	\$3.62	\$4.08	\$4.59	\$5.00	\$5.05	\$5.50	\$5.75	\$4.80	\$6.24
DPS	---	---	---	---	---	\$2.50	\$2.75	\$3.02	\$3.56	\$3.84	\$2.00	\$4.00
Shares³	93	93	94	95	96	97	97	98	99	100	100	105

At times in the past, Lamar has struggled to grow as it produced less in FFO-per-share in 2013 than it did in 2008. However, since then Lamar has been busy growing organically and through acquisitions, fueling strong FFO-per-share growth. The trust is experiencing strong growth tailwinds after growing AFFO/share by 8.9% in 2018 and is carrying new acquisitions with it into 2020. That being said, we see it taking a bit of time to fully integrate and synergize the new acquisitions. Furthermore, COVID-19 has caused many businesses to reduce their advertising spending, which is putting significant headwinds on Lamar's results.

We see revenue as the main driver of growth as Lamar grows organically and through acquisition, as the additional revenue should provide some leverage on the trust's largely fixed expense base, improving margins, providing extra FFO/share growth. Lamar has significant debt, so interest expense consumes about one-quarter of operating income, but it has done a nice job in recent years of keeping its debt at manageable levels. Given that Lamar is fairly resistant to recessions, we don't expect the coronavirus to have an outsized impact on performance this year, but we are still forecasting a dip in FFO per share.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/FFO	13.6	8.3	11.9	14.4	13.1	13.1	13.4	14.7	14.2	15.3	16.0	12.0
Avg. Yld.	---	---	---	---	---	4.9%	4.8%	4.8%	4.8%	4.4%	2.6%	5.3%

Lamar's price-to-funds-from-operations ratio has moved around a lot in the past decade due to choppy earnings results. We see the current valuation as being below fair value, which we've estimated at 12 times FFO due to the choppiness of earnings, COVID-related uncertainty, and the heavily-leveraged, acquisition-focused business model. At today's multiple of 16.0 times 2020 FFO, we see a headwind to total returns in the years to come from multiple contraction.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	---	---	---	---	---	55%	55%	60%	65%	67%	42%	64%

Lamar's quality metrics have been remarkably stable considering the amount of change the trust has gone through in the past decade in terms of strategy and converting to a REIT. Margins have crept a bit higher over time and while we see some operating leverage on its expense base, gross margins have plateaued. The trust's balance sheet remains around three-quarters encumbered by debt, and that should remain the same. Interest coverage has improved markedly in recent years and with a strong FFO growth outlook, it should only improve further.

Lamar is somewhat susceptible to recession but during the Great Recession, its FFO-per-share dipped only briefly before recovering. Its immense size is certainly a competitive advantage, and its long operating history and brand it has built over the past century is certainly a long-term asset. Lamar's competitive positioning should continue to improve with its acquisition-heavy strategy moving forward.

Final Thoughts & Recommendation

Lamar offers investors a well-covered 2.6% yield along with solid growth prospects. We believe management will continue to grow the dividend in the years to come, though growth will slow as the current headwinds will force management to redouble their efforts to deleverage instead of investing in new acquisitions. Overall, we view shares as a hold as the income looks attractive, but total returns are only expected to be 3.3% annualized over the next half decade.
