Overview & Current Events

WestRock was formed in July 2015 by the merger of Rock-Tenn and Mead-Westvaco. It is a leading provider of differentiated paper and packaging solutions, with a market capitalization of \$11.5 billion. In its fiscal 2020, which ended on 9/30/2020, the corrugated packaging segment and the consumer packaging segment generated 64% and 36% of its total revenues and 76% and 24% of its pre-tax income, respectively.

WestRock completed the acquisition of KapStone Paper in November 2018. The deal increased the leverage (Net Debt/EBITDA) of WestRock to 2.9 but the company has been reducing its debt at a fast clip since then. The acquisition of KapStone has enhanced the product offerings and the geographical presence of the company.

In early November, WestRock reported (11/5/20) financial results for the fourth quarter of fiscal 2020. Revenue decreased -3.9% over last year's quarter due to lower prices and volumes caused by the pandemic. As a result, adjusted earnings-per-share fell -41%, from \$1.24 to \$0.73, but exceeded analysts' consensus by \$0.06. The company has missed analysts' earnings-per-share estimates only twice in the last 22 quarters.

WestRock is currently facing a strong headwind due to the global recession that has resulted from the coronavirus. Due to the pandemic, management cut the quarterly dividend by -57% in May, from \$0.465 to \$0.20, in an effort to reduce the debt load by up to \$1.0 billion until the end of next year.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	---	---	---	---	\$3.89	\$2.53	\$2.62	\$4.08	\$3.98	\$2.74	\$3.30	\$4.42
DPS	---	---	---	---	\$0.38	\$1.50	\$1.60	\$1.72	\$1.82	\$1.07	\$0.95	\$1.40
Shares²	---	---	---	---	257.0	251.0	254.5	259.2	259.0	260.0	260.0	250.0

WestRock has a short and somewhat volatile historical record. Since its foundation in its current form, the company grew its earnings-per-share at a 0.6% average annual rate until 2019 and incurred a decline in its earnings in fiscal 2020 due to the pandemic. Moreover, even before the pandemic, there were increasing concerns over high inventories in the containerboard market and a surge in the global supply of containerboard products in upcoming years. This factor, which is out of WestRock's control, will adversely affect its margins. However, we expect the pandemic to subside and the company to recover from next year. In addition, WestRock is likely to benefit from the growing North American corrugated market in the long run. Overall, we expect the company to grow its earnings-per-share by about 6% per year on average over the next five years off this year's somewhat low base.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026

WestRock Co. (WRK)

Updated November 30th, 2020 by Aristofanis Papadatos

WestRock is trading at a price-to-earnings ratio of 13.3, which is lower than its 4-year average of 14.9. Due to its short historical record, its increased amount of debt from the KapStone acquisition, and the increased competition in its business, the stock warrants a reduced valuation. We assume a fair price-to-earnings ratio of 11.0 for the stock. If the stock reaches our fair valuation level over the next five years, it will incur a -3.8% annualized drag in its returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2020	2026
Payout	---	---	---	---	9.8%	59.3%	61.1%	42.2%	45.7%	39.1%	28.8%	31.6%

WestRock cannot control the total supply of paper products. As a result, it is vulnerable to the total production volume of its competitors. The business of WestRock is highly cyclical and hence investors should be especially careful before initiating a position in the stock. If they invest near the peak of the cycle, when business prospects usually look bright and the earnings multiple of the stock usually seems too low, they run the risk of incurring excessive losses.

Moreover, due to the high debt load that has resulted from the acquisition of KapStone, WestRock is vulnerable to the ongoing recession, which has resulted from the pandemic. Its interest expense consumes 30% of operating income while its net debt of \$15.5 billion is about 22 times its annual earnings and hence it is excessive. The weak balance sheet of the company helps explain the recent dividend cut.

Final Thoughts & Recommendation

We expect the pandemic to subside and WestRock to recover from next year. However, the stock has rallied 63% in just four months, partly thanks to optimism for a vaccine against the pandemic. As a result, the stock may offer just a 4.4% average annual return over the next five years. It thus receives a hold rating. Moreover, due to its high leverage, the company may come under stress if the pandemic lasts much longer than currently anticipated. While we expect the pandemic to subside in the second half of next year, investors should keep this risk factor in mind.
