Overview & Current Events

FedEx Corp. is a transportation and shipping company. It was founded in 1971. The company offers a variety of services including transportation, e-commerce, and business services. It operates four core segments: FedEx Express, FedEx Ground, FedEx Freight, and FedEx Services. FedEx provides domestic and international shipping for package delivery and freight. It also provides sales, marketing, information technology, communications, customer service, technical support, billing, and collection services.

On December 17th, FedEx reported its Q2-2021 financial results for the three-month period ending November 30th, 2020. For the quarter, revenues increased by 19.1% to $20.6 billion against the comparable quarter a year ago. Adjusted operating margin remained relatively high at 7.1%, which helped boost EPS to $4.83, vs. $2.51 in Q2-2020. The company's impressive results were powered by the increased demand for fast and reliable deliveries as a result of COVID-19. During the quarter, FedEx's services have been keeping the world's health care, industrial and at-home supply chains moving despite the overall challenges. Once again, key drivers in the company's results were its expansion in FedEx International Priority and U.S. domestic residential package operations, cost optimizations at FedEx Ground and FedEx Freight, which helped offset the additional costs related to COVID-19. While management did not provide an earnings forecast for FY2021, it retained its capital expenditure forecast to $5.1 billion, driven by additional capacity initiatives to support increased volume levels. Due to FedEx's better than expected results, we are raising our expected FY2021 EPS to $17.00.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	$4.60	$6.44	$8.61	$7.56	$3.70	$6.59	$11.25	$17.10	$2.06	$4.92	***$17.00***	**$22.75**
DPS	$0.44	$0.48	$0.52	$0.56	$0.60	$0.80	$1.00	$1.60	$2.00	$2.60	**$2.60**	**$3.48**
Shares[1]	314.0	317.0	317.0	318.0	287.0	282.4	265.5	268.3	272.0	260.9	**269.0**	**248.1**

Despite the operational challenges that FedEx had to undergo and comply with during the pandemic, the company managed to deliver solid profitability. As a result of starting FY2021 strong, we expect the company's full earnings potential to return, powered by an all-time high demand for swift deliveries, as well as a resumption of strong margins, similar to those during FY2018. In terms of its dividend, management decided to keep its distributions steady at $0.65, for the 11th consecutive quarter. We believe that this is a prudent move from management, despite the low payout ratio. This way, FedEx can still keep paying shareholders and avoid potential dividend cuts, which have not occurred since its first dividend was paid back in 2002. We retain both our EPS and DPS CAGR expectations at 6%, as the company continues to dominate end expand its footprint in the world's logistics.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	20.6	17.9	13	15	18.5	18.4	14.4	14.6	15.2	13.5	***17.2***	***18.0***
Avg. Yld.	0.60%	0.50%	0.60%	0.60%	0.50%	0.50%	0.60%	0.90%	0.90%	1.20%	***0.9%***	***0.8%***

Because of its sensitivity to economic growth (and decline), historically, FedEx has traded for a wide range of P/Es. FedEx is currently trading at a P/E of 17.2, which is close to its 2010-2020 average P/E of 16. While FedEx's EPS grew significantly in Q1 and Q2, the stock's price has also more than doubled since March's lows – Hence the market has fully priced the company's robust net income. To reflect the company's current EPS growth and the market's overall valuation expansion amid the global low rate environment, we are raising FedEx's fair P/E at 18.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	11%	8%	7%	9%	23%	17%	15%	13%	126%	53%	***15%***	***15%***

FedEx scores high in safety and quality. It is consistently profitable and has a strong balance sheet. It generates more than enough cash flow to satisfy its debt obligations, invest in growth, and return cash to shareholders. The interest coverage ratio is high, at 8.62 times the company's operating cash flows, and the dividend payout ratio is low, below 20%. Considering the sector's duopolistic nature, with FedEx and UPS being essentially the only market participants, the company is subject predictable cash flows and enjoys massive economies of scale. Concerns of Amazon (AMZN) executing its own fulfillments have worried investors. However, the ecommerce giant was responsible for only a tiny fraction of FedEx' revenue before the split. During the past couple of quarters, the company has demonstrated how its logistics expertise and massive network make it essentially the most reliable transportation provider in the world, executing its deliveries with great consistency. This should provide a great moat in the future, as the company's reputation was forged with much positivity for customers and investors alike, over the past few months. Management's decision to retain CAPEX to $5.1 billion in fiscal 2021 should help FedEx to maintain its competitive advantages. Further, while FedEx has been thought to be a recession-vulnerable business, COVID-19 highlighted how essential its operations are. The dividend is unlikely to be cut even in a severe scenario, thanks to its low payout ratio.

Final Thoughts & Recommendation

We expect FedEx to grow the dividend in the next couple of years, as its profitability has exceeded analyst and investor expectations alike. The current yield of 0.9% may not present the most attractive income option, having considerably decreased since our previous report, amid the stock's rally. On the one hand, investors are buying into a quality company, with a robust balance sheet, and a long-term track record of shareholder value creation. On the other hand, our estimates point towards medium-term CAGR returns of 7.8%. Considering the tiny yield and overall limited medium-term return potential, we believe that investors are likely to find more fruitful investment cases both in terms of income and in terms of total returns elsewhere; we rate FedEx a hold.
