Overview & Current Events

Intuit is a cloud-based accounting and tax preparation software giant, headquartered in Mountain View, California. Its products provide financial management, compliance, and services for consumers, small businesses, self-employed workers, and accounting professionals worldwide. Its most popular platforms include QuickBooks, TurboTax, Mint, and TSheets. Cumulatively they serve more than 52 million customers. The \$92 billion company records more than \$8.3 billion in annual revenues.

On November 19th, 2020, Intuit reported its Q1-2021 results for the period ending October 28th, 2020. The company entered its financial year strongly, once again, achieving quarterly revenues of \$1.32 billion, a 12.8% increase year-over-year, and EPS of \$0.94, a 129% increase vs. the comparable period last year. Intuit's robust results despite the ongoing pandemic showcased its platform's resiliency, while its "Small businesses and self-employed" segment drove this quarter's growth as online businesses have been soaring during the staying-at-home economy. The company's margins remained with the last-twelve-months gross margin at 84.13% and net income margins at an all-time high of 25.1%. Further management announced its acceleration of innovation-driven AI strategy and its 5 Big Bets, including connecting its customers with professionals, unlocking smart money decision upon its pending Credit Karma acquisition closes, and disrupting the small business mid-market with QuickBooks by offering tailor-made solutions. Finally, management announced its FY2021 guidance striving for revenues of \$8.20-8.40 billion, an 8%-10% growth rate, and non-GAAP EPS of \$8.40 to \$8.55, a growth rate of approximately 7%-9%.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$2.07	\$2.68	\$2.89	\$3.18	\$1.30	\$3.74	\$3.83	\$5.19	\$5.99	\$6.92	\$8.45	\$13.00
DPS	---	\$0.60	\$0.68	\$0.76	\$1.00	\$1.20	\$1.36	\$1.56	\$1.88	\$2.12	\$2.37	\$3.65
Shares³	307	296	297	285	281	262	257	256	262	262	258	225.0

EPS CAGR over the past decade has been around 14%, while DPS CAGR has been about 17% since its initiation. Consistent earnings growth has resulted from multiple acquisitions that have allowed the company to expand its portfolio of products. We slightly lower our EPS and DPS growth expectations at 9% annually in the medium term, to reflect management's expectations. However, based on their outstanding record and humble historical outlooks, these figures are likely to be higher. Finally, the company's stock repurchase program currently has \$2.4 billion remaining, representing 2.7% of its market cap. No shares were repurchased during the quarter.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	23.3	26.4	26.2	24.9	29.5	58.2	45.3	39.0	47.1	48.7	41.4	37.0
Avg. Yld.		1.0%	1.0%	1.1%	0.9%	1.3%	1.2%	1.1%	0.8%	0.8%	0.7%	0.8%

Intuit's valuation has seen a significant premium over the past five years, as the company has dominated the tax-reporting software market. By showcasing robust, growing cash flows, even during times of uncertainty, the company currently has a P/E ratio of around 41 attached to its shares. While we expect Intuit's valuation to remain rich in the medium term, backed by low rates and investors' increased appetite and capital allocation towards tech stocks, we retain our forecast for a more reasonable future multiple of around 37 times earnings.

The dividend yield should remain relatively low, despite its rapid growth and the moderate payout ratio. We expect investors to enjoy total returns mainly from share price appreciation, boosted by EPS growth and share buybacks.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout		22%	24%	24%	77%	32%	36%	30%	31%	31%	28%	28%

Intuit makes for an incredibly safe investment, as its revenues are primarily recession-proof, as proven by the recent challenges resulting from COVID-19. While uncertainty levels remain wide across global markets, it is safe to say that taxes won't be disappearing. The company has been dominating its sector, closing more than 32 acquisitions over the past few years. With non-meaningful levels of worrying competition, its suite of products will be there to help people pay their inevitable taxes, while the company enjoys a recurring stream of revenues.

To highlight its sales resilience, even in the midst of the Great Financial Crisis, the company managed to grow earnings by around 7%. We consider Intuit to be an incredible sector-leader, while its future acquisitions should further strengthen its portfolio of products, hence its rich valuation. The stock's dividend remains very safe, reflecting only around 28% of the company's total earnings.

Final Thoughts & Recommendation

Intuit's stock has been delivering jaw-dropping returns over the past five years, beating the popular market indices by a wide margin. While we still expect the company to keep growing both organically and through acquisitions, we believe that its future growth should slow down a bit as reflected in the company's recent guidance. Its valuation should also return to more reasonable levels. As a result, our prudent expected CAGR returns result in a little just over 7% in the medium term. The stock may not have the most attractive characteristics for income investors. However, its rapidly growing dividend and cash flow resilience could end up being a moderate source of income in the long-term, *if* valuation multiple declines don't eat up too much of the growth returns.
