Overview & Current Events

Alliant Energy Corporation is a public utility holding company incorporated in Madison, Wisconsin, in 1981. It generates \$3.6 billion in operating revenues. The company serves approximately 970,000 electric and 420,000 natural gas customers. Alliant has approximately 3,600 employees. Based on electric sales, the largest cities served in Iowa and Wisconsin are Cedar Rapids and Beloit, respectively. The company consists of three subsidiaries. The first being the largest, Interstate Power and Light Company (IPL), which accounted for 51.5% of Alliant 2019 earnings. IPL is a public utility that generates and distributes electricity and distributes and transports natural gas in Iowa. The second subsidiary is Wisconsin Power and Light Company (WPL), which provides similar services to IPL in southern and central Wisconsin. WPL contributed 42.4% of total 2019 earnings. The last is Corporate Services, which accounts for a tiny percentage of the company's total earnings.

On November 02, 2020, Alliant Energy reported third-quarter earnings and the first nine months earnings for Fiscal year (FY)2020. The company reported Non-GAAP EPS of \$0.94 for the quarter, which is flat Year over Year (YoY). However, revenues were down YoY from \$990 million to \$920 million, or lower by (7.1)%, for the nine months revenue were down (6.1)%. Net income was up for the quarter by 8.7%, but up significantly for the nine months by 23%. The net income increase was due to income tax benefits. For the nine months, the company has earned \$2.20 per share vs. \$1.87 for the nine months of last year. The company increased its cash position from \$16 million at year-end of 2019 to \$189 million. This increase in cash came from long-term debt, as the long-term debt increased by 18.8%. The COVID-19 pandemic has not hurt the company since it is considered an essential business. This is a benefit of investing in a utility company like Alliant Energy.

For FY2020, the company revised its EPS guidance of \$2.34 to \$2.48 to \$2.40-\$2.46. Thus, we will use the midpoint of \$2.43 a share as our fair value calculations. Management also provided guidance for FY2021 of \$2.50-\$2.64 a share, which will increase by 5.8%. Also, a dividend increases of 6% for the FY2021 to its expected annual dividend target of \$1.61.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$1.38	\$1.38	\$1.51	\$1.63	\$1.74	\$1.74	\$1.87	\$1.93	\$2.17	\$2.31	\$2.43	\$3.25
DPS	\$0.79	\$0.85	\$0.90	\$0.94	\$1.02	\$1.10	\$1.18	\$1.26	\$1.34	\$1.42	\$1.52	\$2.03
Shares³	221.0	221.0	221.0	221.0	221.0	225.0	227.0	229.0	233.0	239.0	248.0	248.0

LNT's earnings have been steadily growing at a rate of 5.9% annually for the past ten years. As a utility company, LNT is restricted on how it can increase its rate of returns. The net margin has been gradually growing as well. In 2010, the net margin was 8.4%. Now net margin is at a rate of 18.1%. This is a byproduct of the tax rate decreasing from a high of 32% in 2010 to 10.8% last year. However, the share count has been increasing at a compound growth rate of 2.0% for the past five years. This dilutes the EPS slightly.

Alliant Energy Corporation (LNT)

Updated December 12th, 2020 by Felix Martinez

We expect earnings to continue to grow at a modest rate of 6%, giving us an estimated EPS of \$3.25 for 2025. The company has also been very consistent with its dividend policies. LNT has been growing dividends for the past seventeen years. In the last ten years, dividend growth has averaged 6.7% annually. We are being conservative and predicting a dividend growth rate of 6% for the next five years.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	Now	2025
Avg. P/E	13.4	16	14.6	15.9	19.1	18	20.3	22.1	19.5	23.7	21.3	20.0
Avg. Yld.	4.3%	3.9%	4.1%	3.6%	3.1%	3.5%	3.1%	3.0%	3.2%	2.6%	2.9%	3.1%

The company has been valued somewhat at a premium since 2016. For the past ten years, LNT has an average PE of 18.3 compared to the current PE of 21.3. We think a fair valued PE is 20, which is more in line with its five-year average.

The current dividend yield is a bit lower than the company's 5-year average of 3.1%. If the company revert to our target P/E of 20, then valuation would be a (1.2)% annualized headwind on annual returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	57.2%	61.6%	59.6%	57.7%	58.6%	63.2%	63.1%	65.3%	61.8%	61.5%	63%	63%

The company's competitive advantage is that a utility company is very monopolizing as there is only one utility company in any given area. Thus, utility stocks are often held by investors for their defensive nature. People will always need to power their homes and businesses.

However, LNT shows that earnings can decrease during a recession. For example, during the Great Recession from 2008-2009, the company's earnings-per-share fell from a high of \$1.35 in 2007 to \$0.98 in 2009. Earnings did bounce back big by 40% in 2010, to \$1.38. Even though earnings fell significantly in this period, the dividend was not cut. It was raised from \$0.70 in 2008 to \$0.75 in 2009. This shows the company is committed to paying growing dividends. The debt to Equity ratio (D/E) is 1.2 for the year compared to 1.1 in FY19. Even though the D/E rate increased, the company still holds a credit rating of A- with S&P.

Final Thoughts & Recommendation

Alliant Energy is a safe business. The company continues to produce a very reliable and growing dividend. The dividend has been increasing for the past 17 years. At the current price, the company is slightly above our fair price of \$49. We would like to see a margin of safety of about 10% below our fair price. Thus, we rate the company as a hold and only see a 7.5% expected annual total returns for the next five years.
