Overview & Current Events

H.B. Fuller is a leading global manufacturer of adhesives, sealants, and other specialty chemical products. The category of industrial adhesives is the core product offering of the company.

Given the \$2.7 billion market cap of H.B Fuller, it is evident that its acquisition of Royal Adhesives & Sealants for \$1.6 billion is critically important. This acquisition, which is the largest in the history of the company, boosted its annual sales by \$735 million (32% growth) and enhanced its reach to more highly specialized adhesive segments. H.B. Fuller also acquired Adecol in late 2017 to improve its growth prospects in Brazil.

In late January, H.B. Fuller reported (1/25/21) financial results for the fourth quarter of fiscal 2020. Organic revenue increased 5% thanks to strong business activity in the end markets of the company, including strong demand for adhesives for consumable goods, electronics and recreational vehicles. As a result, adjusted earnings-per-share grew 20%, from \$0.88 to \$1.06, and exceeded analysts' consensus by an impressive \$0.20.

H.B. Fuller is recovering from the pandemic earlier than expected. Management now expects low to mid-single digit organic revenue growth and approximately 10% adjusted EBITDA growth for fiscal 2021. Moreover, the recent 1.6% dividend hike is important, not for the increased distribution, but as a testament to management's confidence in a swift recovery of the company from the pandemic.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$1.79	\$1.90	\$1.89	\$0.97	\$1.69	\$2.42	\$1.13	\$3.00	\$2.96	\$2.84	\$3.35	\$5.15
DPS	\$0.30	\$0.33	\$0.39	\$0.46	\$0.51	\$0.55	\$0.59	\$0.62	\$0.64	\$0.65	\$0.66	\$0.84
Shares¹	49.5	49.8	50.2	50.3	50.1	50.1	50.2	52.0	52.4	52.9	53.4	56.0

H.B. Fuller has exhibited a volatile performance record throughout the last decade. It is also very sensitive to the underlying global economic growth. If the pandemic lasts longer than currently anticipated, H.B. Fuller will be significantly affected. However, the company has improved its performance in recent years. It has grown its earnings-per-share at a 5.3% average annual rate over the last decade and at a 10.9% average annual rate over the last five years. Moreover, we expect the pandemic to subside and the global economy to recover in the second half of this year. In addition, H.B. Fuller has already begun to recover strongly from the pandemic. Overall, we expect H.B. Fuller to grow its earnings-per-share at a 9.0% average annual rate over the next five years.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	12.0	15.7	21.5	48.1	24.1	17.7	46.9	17.1	16.0	15.5	15.5	15.0

H.B. Fuller (FUL)

Updated January 29th, 2021 by Aristofanis Papadatos

H.B. Fuller is currently trading at a price-to-earnings ratio of 15.5. While the historical average earnings multiple of the stock is 20.5, we assume a fair price-to-earnings ratio of 15.0 due to the high cyclicity of the stock. If the stock trades at our fair valuation level in five years, it will incur a -0.7% annualized drag in its returns due to the contraction of its earnings multiple.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	16.8%	17.4%	20.6%	47.4%	30.2%	22.7%	52.2%	20.7%	21.6%	22.9%	19.7%	16.3%

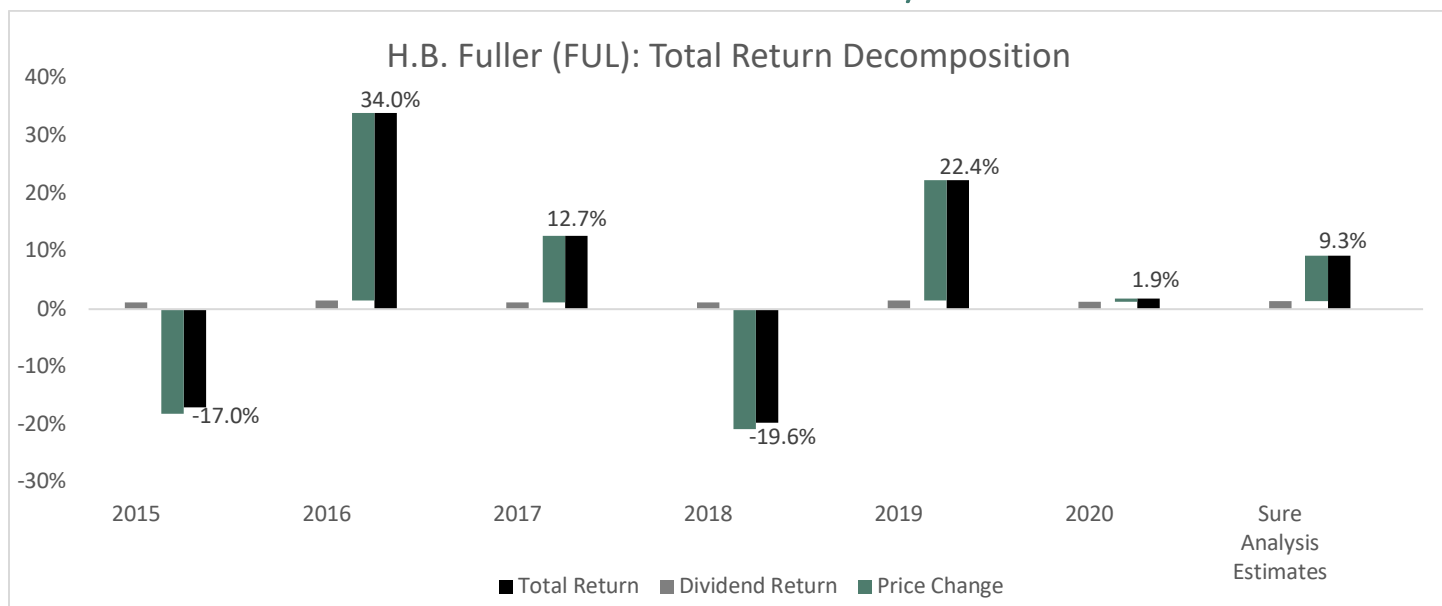

Due to the acquisition of Royal Adhesives & Sealants, interest coverage has fallen to 4.0. However, management has repeatedly confirmed that it will be using a major portion of free cash flows to reduce debt. The company reduced its debt by \$268 million in 2019 and by \$205 million in 2020. As a result, its interest coverage is likely to revert towards its historical values in the upcoming years.

As the customers of H.B. Fuller are manufacturers of a wide range of products, the performance of H.B. Fuller is closely tied to underlying economic conditions. Moreover, H.B. Fuller is highly leveraged to economic growth and hence the stock could outperform the market in rallies and underperform the market in rough periods. The company is notably vulnerable to recessions. During the Great Recession, its earnings-per-share plunged -79%, from \$1.68 in 2007 to \$0.36 in 2008, and the stock lost two-thirds of its market cap in less than six months. Given the severe recession caused by the coronavirus, investors should account for this risk factor, especially given the company's material debt load.

Final Thoughts & Recommendation

H.B Fuller has a volatile earnings record, and it is vulnerable to economic downturns, such as the global recession caused by the coronavirus. However, the company has proved more resilient than expected to the pandemic and has begun to recover strongly. As we expect the pandemic to subside at the back half of the year, we expect the stock to offer a 9.3% average annual return over the next five years. On the other hand, if the recession lasts longer than expected, the stock could perform poorly. Given the low yield and the vulnerability to recessions, the security is not attractive for income-oriented investors. We rate the stock as a hold.
