Overview & Current Events

From its somewhat inauspicious beginnings as a Washington, D.C. root-beer stand in 1927, Marriott has become an international hospitality juggernaut with over 7,000 properties operating under 30 brands in more than 130 countries and territories. It's the largest hotel chain in the world.

As we know today, Marriott Intl was created in 1993 when the former Marriott Corp was split into two publicly traded companies, Marriott Intl. and Host Marriott Corp. (HST) (now known as Host Hotels & Resorts). Marriott Intl. manages and franchises a portfolio of hospital brands that range from the classic splendor of The Ritz-Carlton to the Fairfield Inns you find along the highway. Internationally, Marriott's Starwood subsidiary gives the Company a significant foothold in Europe and elsewhere. Marriott currently boasts a market cap north of \$42.5 billion.

On November 6th, 2020, the Company reported its third-quarter earnings for Fiscal Year (FY)2020. COVID-19 pandemic has hit Marriott hard as people were not traveling and staying in hotels starting around mid-March and throughout the year. The total revenue for the Company was down (57)% for the quarter. Net income took a big hit as well. The company profit \$100 million vs. the \$387 million that Marriott made last year's third quarter, a decrease of (74)%. Thus, diluted earnings also took a hit. The Company earned \$0.31 a share compared to \$1.16 in 3Q19, which is a drop of (73)%. However, the Marriott management team is seeing a slight growth in demand returning. The Company did, however, added 19,000 new room worldwide lodging portfolio during the quarter. In total, net rooms grew 3.8% for the year-ago quarter. Over 228,000 rooms in the pipeline were under construction as of the end of the third quarter. The Company's net liquidity totaled approximately \$5.1 billion, representing roughly \$1.5 billion in available cash balances and \$3.6 billion of unused borrowing capacity under its revolving credit facility. This gives Marriott the flexibility to withstand another shutdown if it happens.

Since earnings are expected to be negative because of the COVID-19 pandemic, we will be using the normalized earnings for the past five years, which average out to \$4.68. This will be used for our fair value calculations.

Growth on a Per-Share Basis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
EPS	\$1.14	\$1.33	\$1.72	\$2.00	\$2.54	\$3.15	\$2.64	\$5.26	\$5.38	\$3.80	\$4.68	\$5.97
DPS	\$0.21	\$0.39	\$0.49	\$0.64	\$0.77	\$0.95	\$1.15	\$1.29	\$1.56	\$1.85	\$0.48	\$0.48
Shares¹	366.9	333.0	310.9	305.0	289.9	256.3	383.6	359.1	339.1	324.0	337.0	337.0

Despite Marriott Intl.'s large size, the company continues to grow at a relatively brisk pace. The company expects continued growth in the number of new projects using Marriott's 30 brands. Across the hospitality industry, luxury lodging continues to be a strong trend. Marriott currently has more than 700 luxury properties open or under development, with 60% of 200 luxury pipeline properties already under construction. The company also expects to grow in the trendy and growing all-inclusive space. Marriott is expanding its all-inclusive portfolio in North and South America and the Caribbean, and Europe and Southeast Asia.

However, there's no denying that, despite growth prospects, there's plenty of challenge in the industry. Currently, the most significant difficulties are related to fears of the coronavirus. China is Marriott's fastest-growing market, and the

¹ Share count is in millions.

Marriott Intl. (MAR)

Updated January 4th, 2021 by Felix Martinez

hospitality chain has already seen a substantial drop in demand for hotel rooms in that country. And that pain isn't limited to travelers to China -- the massive number of Chinese travelers from the country to destinations worldwide has plummeted. And as the outbreak sweeps around the globe, all worldwide tourism will be affected as well.

Valuation Analysis

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Avg. P/E	29.5	25.4	21.5	21.1	25	24	26.3	19.6	24	24	26.9	18.0
Avg. Yld.	0.6%	1.1%	1.3%	1.5%	1.2%	1.3%	1.7%	1.3%	1.2%	1.2%	0.0%	0.0%

Looking at Marriott's performance during the last ten years, we notice the P/E has tended to remain solidly in the 21-25 range. Given this year's sluggish performance, we can conservatively expect MAR's 2020 P/E to hang below 23.

Looking ahead to 2025, we'll assign an expected P/E of 18, given the hospitality industry's continuing challenges. When it comes to dividend payouts, Marriott has a history of playing it slow but steady. We see this trend continuing for the foreseeable future, but the company needs to restate its dividends first.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2025
Payout	18.3%	29.8%	28.5%	32.0%	30.3%	30.2%	31.4%	29.6%	25.1%	30.8%	10%	0%

Although Marriott Intl. trades in excitement – luxury getaways, exotic destinations, and even room amenities that might trick you out of believing you're on business travel – the company's stock performance has been anything but thrilling. The company's best advantage is its sheer size. At this point, if you're staying at a chain hotel anywhere in the world, there's a decent chance Marriott owns the brand.

During the first decade of the 21st century – which saw one of the most significant historical slumps in travel – Marriott remained profitable. The company used that time to develop new luxury brands and programs and found ways to trim the fat. The lowest EPS that the company clocked was in 2009, at \$0.94. Thanks to the coronavirus, we're about to see another considerable drop-off in tourism. Unfortunately, there's no way to tell how long or how serious this event will be. We'll have to wait to see how the panic pans out. The company balance sheet is not so strong. The current ratio is only 0.6, and the debt to equity ratio is 51.6 at the end of 3Q20.

Final Thoughts & Recommendation

Marriott Intl. is facing challenges, including the continued growth of alternative stay platforms such as Airbnb and now the coronavirus. With weak expected annualized total returns of (2.6)% for the next five years, we rate Marriott Intl. as a sell at current prices.
