Overview & Current Events

While the history of AT&T dates back to Alexander Graham Bell and the original telephone in the late-1800's, the current iteration of the firm is rooted in a spun off "baby bell," SBC, that acquired AT&T Corp. in 2005 and changed its name to AT&T Inc. Today AT&T is the largest communications company in the world, operating in three business units: AT&T Communications (providing mobile, broadband and video to more than 100 million U.S. consumers and nearly 3 million businesses), WarnerMedia (including Turner, HBO, Warner Bros. and Xandr) and AT&T Latin America (offering pay-TV and wireless service to 10 countries). The \$211 billion company generated \$172 billion in revenue last year.

On January 27th, 2021 AT&T reported Q4 and full year 2020 results for the period ending December 31st, 2020. For the quarter the company generated \$45.7 billion in revenue, down from \$46.8 billion in Q4 2019, as the COVID-19 pandemic continues to weigh on results. Reported net income equaled a loss of -\$13.9 billion or -\$1.95 per share due to non-cash charges. On an adjusted basis, earnings-per-share equaled \$0.75 compared to \$0.89 in the year ago quarter. The \$0.75 figure does not adjust for -\$0.08 in COVID-19 impacts.

For the year AT&T generated \$171.8 billion in revenue, down from \$181.2 billion in 2019, as the pandemic impacted revenue across all businesses, particularly WarnerMedia and domestic wireless service revenues. Reported net income equaled a loss of -\$5.4 billion or -\$0.75 per share due to non-cash charges. On an adjusted basis earnings-per-share equaled \$3.18 versus \$3.57 in 2019. This figure does not adjust for -\$0.43 in COVID-19 impacts. AT&T ended the quarter with a net debt-to-EBITDA ratio of 2.70x.

AT&T also provided a full year 2021 outlook. For this year the company anticipates 1% revenue growth, adjusted earnings-per-share to be stable with 2020 and a dividend payout ratio in the high-50% range.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$2.20	\$2.33	\$2.50	\$2.50	\$2.69	\$2.84	\$3.05	\$3.52	\$3.58	\$3.18	\$3.20	\$3.71
DPS	\$1.72	\$1.76	\$1.80	\$1.84	\$1.88	\$1.92	\$1.96	\$2.00	\$2.04	\$2.08	\$2.08	\$2.28
Shares¹	5,927	5,581	5,226	5,187	6,145	6,139	6,139	7,282	7,255	7,126	7,125	7,125

AT&T is a colossal business, easily generating profits of \$20+ billion annually, but it is not a fast grower. From 2007 through 2019 AT&T grew earnings-per-share by 2.2% per annum, with 2020 being a down year. While the company has some growth opportunities due to recent acquisitions, we are cognizant of both the premiums paid and the fact that the company's legacy businesses are steady or declining. AT&T is optimistic about generating reasonable growth and the payout ratio had been falling, resulting in excess funds to divert toward paying down debt. Moreover, after the debt is under control, management has indicated the potential for share repurchases down the line. However, share buybacks were suspended for 2020 and we are cautious on this front.

We are using \$3.20 in expected earnings for 2021 – in line with management's guidance – to go along with a 3% annual anticipated growth rate. We are encouraged by the company's resilience, but we are not expecting terrific growth from this point.

¹ In millions.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Avg. P/E	13.4	14.5	14.2	13.8	12.6	13.8	12.7	9.5	9.5	10.3	9.3	11.0
Avg. Yld.	5.8%	5.2%	5.1%	5.3%	5.6%	4.9%	5.1%	6.0%	6.0%	6.3%	7.0%	5.6%

During the past decade shares of AT&T have traded with an average P/E ratio of around 12 to 13 times earnings, with a range of 8 to 16. We believe that 11 times earnings is a fair baseline, given that new growth prospects are not yet proven, the dividend is robust, and the payout ratio is getting better. At the current valuation, there is the potential for a moderate uptick in valuation.

AT&T has a record of not only paying but also increasing its dividend for 36 consecutive years. Granted this payment has only been increasing by 4 cents annually since 2009, but it remains an important driver of shareholder returns. From this point, with a well above average dividend yield, protecting the payout is more important than growing it.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	78%	76%	72%	74%	70%	68%	64%	57%	57%	65%	65%	61%

AT&T has a competitive advantage with its entrenched position in various important industries. Although this position could be eroding due to technological change, it remains that the company has direct contact with ~170 million customers. The debt is an issue, but it is being addressed. At the close of the Time Warner merger it equaled \$180 billion and the net-debt-to-adjusted EBITDA metric came in at 3.0x. By the end of 2018 this number got down to 2.8x. By the end of 2019 it was 2.5x and 2.7x at the end of 2020. The goal is to get it down to 2.0x to 2.25x by 2022.

During the last recession AT&T posted results of \$2.76, \$2.16, \$2.12 and \$2.29 in earnings-per-share for the 2007 through 2010 period. The company did not eclipse its pre-recession high on an earnings basis until 2016, but the dividend did continue to grow throughout the entire period. Speaking of which, we are encouraged with the progress made on the dividend payout ratio. Some bemoan the slow rate of dividend growth, but we believe it has (and will continue to be) prudent given the company's current financial position.

Final Thoughts & Recommendation

Shares are up 7% since our last report. In our view AT&T faces two main challenges: a slow-moving business and a significant debt load. If it can overcome these obstacles the valuation multiple could expand. Total return potential is appealing, with a 7.0% starting yield, a 3% expected growth rate and the potential for a moderate improvement in valuation, adding up to a 11.8% prospective annual gain. We acknowledge the risks in the business, especially as it relates to the transition away from legacy businesses, but we believe the current value proposition makes up for a lot of this. We continue rate shares as a buy.
