## Overview \& Current Events

Prudential Financial, now in business for over 140 years, operates in the United States, Asia, Europe and Latin America, with $\$ 1.7$ trillion in assets under management (AUM). The company provides financial products - including life insurance, annuities, retirement-related services, mutual funds and investment management. Prudential operates in four divisions: PGIM (formerly Prudential Investment Management), U.S. Workplace Solutions, U.S. Individual Solutions, and International Insurance. The $\$ 32$ billion market cap company employs approximately 50,000 people.
On February $4^{\text {th }}$, 2021 Prudential released Q4 and full year 2020 results for the period ending December $31^{\text {st }}, 2020$. For the quarter Prudential reported net income of $\$ 819$ million or $\$ 2.03$ per share compared to $\$ 1.128$ billion or $\$ 2.76$ in Q4 2019. After-tax adjusted operating income equaled $\$ 1.183$ billion or $\$ 2.93$ per share compared to $\$ 914$ million or $\$ 2.24$ per share in Q4 2019.

For the year Prudential reported a net loss of - $\$ 374$ million or $-\$ 1.00$ per share versus a gain of $\$ 4.186$ billion or $\$ 10.11$ per share in 2019. However, this included significant investment losses. After-tax adjusted operating income equaled $\$ 4.111$ billion or $\$ 10.21$ per share compared to $\$ 4.656$ billion or $\$ 11.24$ per share in 2019.
At quarter-end Prudential held $\$ 1.721$ trillion in AUM versus $\$ 1.551$ trillion in the year ago period. Prudential's adjusted book value per share equaled $\$ 94.79$, down from $\$ 101.04$ in 2019.
Prudential also authorized $\$ 1.5$ billion in share repurchases for 2021 and declared a $\$ 1.15$ quarterly dividend, a $4.5 \%$ year-over-year increase.

If you look at 2007 (when the company was earning $\$ 7.31$ and paying out $\$ 1.15$ ) through 2019, Prudential grew earnings-per-share by about $4.0 \%$ per year. However, 2020 proved to be a down year amid difficult circumstances. Higher interest rates and general economic improvement could be positives for the company's growth prospects over the long-term. Of course, there are offsetting factors; chief among them being lower rather than higher rates in the short-term. The majority of Prudential's business is in the U.S. and Japan, both of which are mature markets where we do not anticipate above average growth. Life insurance and annuities are highly competitive industries. Further, insurers do not know the price of the goods sold for years, allowing for the temptation to underprice policies in search for growth. We believe a slow, steady and profitable approach in this industry is prudent.
We are expecting earnings to bounce back in 2021, to go along with a $4 \%$ intermediate term growth. Of course, the timing and magnitude of a recovery from the COVID-19 pandemic will continue to be an unknown.

| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Avg. P/E | 8.9 | 8.7 | 7.4 | 8.8 | 8.3 | 8.7 | 10.2 | 8.6 | 8.0 | 6.9 | $\mathbf{7 . 0}$ | $\mathbf{8 . 0}$ |
| Avg. Yld. | $2.5 \%$ | $2.9 \%$ | $2.4 \%$ | $2.5 \%$ | $2.9 \%$ | $3.5 \%$ | $2.8 \%$ | $3.6 \%$ | $4.3 \%$ | $6.4 \%$ | $\mathbf{5 . 7 \%}$ | $\mathbf{5 . 0} \%$ |

In the last decade shares of Prudential have traded hands with an average P/E ratio between 8- and 9-times earnings.
This may seem low compared to your average firm, but this has been typical of insurers. With shares currently trading at 7 times expected earnings, this implies the potential for a moderate valuation tailwind.

The dividend ought to add meaningfully to shareholder returns as well, as it sits at nearly $6 \%$ and yet takes up less than half of earnings - leaving ample room for future growth.

## Safety, Quality, Competitive Advantage, \& Recession Resiliency

| Year | $\mathbf{2 0 1 1}$ | $\mathbf{2 0 1 2}$ | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ | $\mathbf{2 0 1 8}$ | $\mathbf{2 0 1 9}$ | $\mathbf{2 0 2 0}$ | $\mathbf{2 0 2 1}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Payout | $23 \%$ | $26 \%$ | $18 \%$ | $24 \%$ | $24 \%$ | $31 \%$ | $28 \%$ | $31 \%$ | $34 \%$ | $43 \%$ | $\mathbf{4 0 \%}$ |

While Prudential is highly profitable and well-known, we do not believe the firm carries a significant competitive advantage over its competitors as the products it sells are highly commoditized.
During the last recession, Prudential generated earnings-per-share of $\$ 7.31$ in 2007 followed by $\$ 2.69, \$ 5.58$ and $\$ 6.27$ in 2008 through 2010. It wasn't until 2014 that earnings finally eclipsed their pre-recession peak. Similarly, the dividend was slashed from $\$ 1.15$ in 2007 down to $\$ 0.58$ in 2008 and did not recover until 2010. This sort of cyclicality is certainly possible in the next downturn. Still, the company has a reasonable payout ratio and financial position. We do note that while earnings dipped significantly during the last recession, dilutive activity was not excessive.

## Final Thoughts \& Recommendation

Shares are up $25 \%$ since our last report. Prudential has proven to be a solid business over the years with a variety of positive attributes. We are forecasting $11.5 \%$ annual total return potential, stemming from $4 \%$ growth, a $5.7 \%$ starting dividend yield and a valuation tailwind. There is a lingering negative: even in good times growth is not especially robust and in lesser times the rate of improvement can fall off the rails completely. Still, the valuation remains compelling and the security continues to earn a buy rating.
