## Overview & Current Events

Synchrony Financial is a consumer financial services company. It operates through the following business units: Payment Solutions, Retail Credit, and CareCredit. Synchrony Financial offers private label credit cards, small-size business credit products, promotional financing for higher-priced consumer goods, promotional financing for healthcare procedures such as dental and vision, as well as a range of other services to its customers. The company is headquartered in Stamford, CT, and was founded in 2003.

Synchrony Financial reported its fourth quarter earnings results on January 29. The company managed to generate revenues of \$2.7 billion during the quarter, which represents a decline of 13% versus the prior year's quarter. Its top line decline was partially caused by lower spending volumes by card holders due to the current pandemic, while slightly lower net interest income, due to a lower net interest margin, played a role as well. Synchrony Financial's purchase volume was \$40 billion during the quarter, a major sequential improvement versus Q3's \$36 billion.

Synchrony Financial generated earnings-per-share of \$1.24 during the fourth quarter, which was ahead of the analyst consensus forecast. Profits were up substantially from the previous year's quarter, mainly due to lower provisions for credit losses, as the company realized that provisions during Q1-Q3 were more than enough to cover the pandemic fallout. Net charge-offs remained at a quite solid level of 3.1% during November and December, thus credit losses have not risen a lot so far.

## Growth on a Per-Share Basis

| Year                      | 2011 | 2012 | 2013 | 2014   | 2015   | 2016   | 2017   | 2018   | 2019   | 2020   | 2021          | 2026          |
|---------------------------|------|------|------|--------|--------|--------|--------|--------|--------|--------|---------------|---------------|
| <b>EPS</b>                | ---  | ---  | ---  | \$2.78 | \$2.65 | \$2.71 | \$2.61 | \$3.74 | \$4.29 | \$2.28 | <b>\$3.70</b> | <b>\$4.72</b> |
| <b>DPS</b>                | ---  | ---  | ---  | ---    | ---    | \$0.26 | \$0.56 | \$0.72 | \$0.86 | \$0.88 | <b>\$0.88</b> | <b>\$1.18</b> |
| <b>Shares<sup>1</sup></b> | ---  | ---  | ---  | 757    | 834    | 834    | 771    | 719    | 662    | 584    | <b>550</b>    | <b>450</b>    |

Synchrony Financial was founded in 2003, but the company's initial public offering was in 2014, which is why there is no long-term data available for the company. Between 2014 and 2019 Synchrony Financial grew its earnings-per-share by 9% a year, although almost all of that growth took place in 2018 and 2019. Before that, profits remained relatively stagnant. In 2019, Synchrony Financial managed to grow its earnings-per-share at a strong pace.

Synchrony Financial has broadened its cooperation with key vendors in the recent past, which includes companies such as Amazon, Walgreens, and QVC. The relationships with these retailers should positively impact Synchrony Financial's growth during the coming years, as this will allow for a rise in the company's active accounts. On top of that, purchase volumes and loan balances should grow in the long term, which is the basis for rising transaction fees and further growth for Synchrony Financial's net interest income. The coronavirus crisis has hit the company's bottom line to a significant degree in 2020, but Synchrony Financial nevertheless remained profitable during the most recent year. We don't believe that the pandemic will hurt the company in future years to the same extent, which is why, in the above table, we see our estimate for this year's actual earnings-per-share that is almost back at pre-crisis levels. Synchrony Financial has recently announced a new \$1.6 billion buyback program that should result in earnings-per-share tailwinds going forward.

## Valuation Analysis

| Year      | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | Now  | 2026 |
|-----------|------|------|------|------|------|------|------|------|------|------|------|------|
| Avg. P/E  | ---  | ---  | ---  | 9.5  | 12.0 | 10.7 | 12.4 | 8.7  | 8.4  | 14.9 | 9.2  | 10.0 |
| Avg. Yld. | ---  | ---  | ---  | ---  | ---  | 0.9% | 1.7% | 2.2% | 2.4% | 2.6% | 2.6% | 2.5% |

Synchrony Financial has been valued at a price to earnings ratio of roughly 10 throughout the majority of the years since its IPO. More recently, shares have become cheaper, even before the current pandemic. Based on our earnings-per-share estimate of \$3.70 for 2021, the multiple is roughly 9 right now. Some multiple expansion tailwinds should occur over the coming years, which will positively impact Synchrony Financial's total returns.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

| Year   | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017  | 2018  | 2019  | 2020  | 2021  | 2026  |
|--------|------|------|------|------|------|------|-------|-------|-------|-------|-------|-------|
| Payout | ---  | ---  | ---  | ---  | ---  | 9.6% | 21.5% | 19.3% | 20.0% | 38.6% | 23.8% | 24.9% |

Synchrony Financial started to make dividend payments just a few years ago. Since then, the company has raised its dividend regularly and at a meaningful pace. Yet, Synchrony Financial's dividend payout ratio is still relatively low. We do not know whether Synchrony Financial will maintain its dividend during every recession, as the company's track record does not date back to the last financial crisis. During the current pandemic, the company has maintained its dividend.

Synchrony Financial is not the largest credit card company in the world; it has significantly larger peers, such as American Express. The market is large enough for a many companies to operate profitably, though, which is why Synchrony Financial's relatively small size is not necessarily a large disadvantage. During and following the current recession, Synchrony Financial should see a larger-than-normal amount of credit losses, but the company remained profitable in 2020. As this crisis is passing, profitability should recover as things revert back to normal.

## Final Thoughts & Recommendation

Synchrony Financial is one of the smaller credit card players. During the pandemic, shares initially sold off a lot, but shares recovered most of their losses over the last couple of months. The long-term growth outlook is not too bad, and we believe that Synchrony Financial should get back to pre-crisis profitability levels eventually. Based on this expectation, we rate shares a buy, but we want to note that Synchrony Financial is not a low-risk investment.
