## Overview & Current Events

Thomson Reuters Corporation is a global financial information and data solutions provider for businesses and professionals in the fields of finance, accounting, tax, and media. Thomson Reuters was created in 2008 when the Thomson Corporation purchased the British company Reuters Group. Thomson Reuters is cross listed in Toronto and New York, where it trades under the ticker TRI on both exchanges. Thomson Reuters is a rare example of an international company that trades on an American stock exchange and reports financial results in U.S. dollars. Accordingly, all figures referenced in this report are in USD and refer to the company's NYSE-listed common equity.

Thomson Reuters reported fiscal year 2020 earnings on February 23<sup>rd</sup>, and revenues grew 2% to \$1.62 billion. The majority of total revenue is recurring revenues (80%). Diluted earnings per share fell to \$2.25 from \$3.11 in the prior year, due to a \$1.2 billion non-cash deferred tax benefit. However, on an adjusted basis, EPS increased 43% to \$1.85 from \$1.29 in 2019. Adjusted EBITDA grew 32% to \$1.98 billion, while adjusted EBITDA margins grew 770 basis points to 33%. Free cash flow rose to \$1.33 billion from \$159 million last year.

The company announced a \$0.10 increase to the annual dividend to \$1.62, a 6.6% raise. This is the 28<sup>th</sup> consecutive annual dividend increase. Under its NCIB, the company repurchased \$200 million of common shares. No further share repurchases are anticipated for 2021, but TRI aims to maintain 500 million common shares outstanding by offsetting any dilution due to dividend reinvestments and equity incentive plans.

The sale of Refinitiv to LSEG in an all-share transaction was completed on January 29<sup>th</sup>, 2021. TRI owns roughly 82.5 million LSEG shares, which as of February 22<sup>nd</sup>, have a market value of \$11.2 billion. The LSEG shares are held in an entity jointly owned by Blackstone and Thomson Reuters.

As Thomson Reuters generates most of their revenue from selling information and software solutions electronically and on a subscription basis, the business has historically been resilient, and this resiliency has benefited them throughout the pandemic impact. Thomson Reuters provided detailed outlook out to 2023, at which point they anticipate 5.5% total revenue growth. In 2021, they expect 3.5% revenue growth, with a 31.5% adjusted EBITDA margin, and \$1.05 billion free cash flow.

## Growth on a Per-Share Basis

| Year                      | 2011   | 2012   | 2013   | 2014   | 2015   | 2016   | 2017   | 2018   | 2019   | 2020   | 2021          | 2026          |
|---------------------------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|---------------|---------------|
| <b>EPS</b>                | \$2.05 | \$2.11 | \$1.54 | \$1.85 | \$2.13 | \$1.79 | \$2.51 | \$0.75 | \$3.11 | \$2.25 | <b>\$2.05</b> | <b>\$2.62</b> |
| <b>DPS</b>                | \$1.24 | \$1.28 | \$1.30 | \$1.32 | \$1.34 | \$1.36 | \$1.38 | \$1.39 | \$1.44 | \$1.52 | <b>\$1.62</b> | <b>\$1.70</b> |
| <b>Shares<sup>1</sup></b> | 833.0  | 830.0  | 831.0  | 811.0  | 784.0  | 749.0  | 720.0  | 550.0  | 503.0  | 490.0  | <b>500.0</b>  | <b>450.0</b>  |

Just as the sale of Refinitiv to LSEG comes to completion, Thomson Reuters sets off on a two-year Change Program to become an operating company from a holding company, and to position themselves as a content-driven technology company rather than a content provider. The program will take 24 months and require roughly \$550 million in investments, but by 2023 should achieve organic revenue growth of around 5.5%, adjusted EBITDA margins of 39%, and

free cash flow of \$1.9 billion. They hold roughly \$1.8 billion in cash to target acquisitions that strengthen the value proposition; and no debt maturities until 2023.

In addition, the company has made it clear that share repurchases are a priority, which will help drive earnings-per-share higher as well, though this will return after 2021. Finally, the 82.5 million LSEG shares should prove fruitful as LSEG has a healthy track record of earnings growth. Between 2021 and 2026, we expect Thomson Reuters to grow its earnings-per-share by 5% annually.

## Valuation Analysis

| Year      | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | Now  | 2026 |
|-----------|------|------|------|------|------|------|------|------|------|------|------|------|
| Avg. P/E  | 16.8 | 13.5 | 24.4 | 21.8 | 23.9 | 29.9 | 23.2 | 64.4 | 8.9  | 33.1 | 43.4 | 28.0 |
| Avg. Yld. | 3.6% | 4.5% | 3.5% | 3.3% | 2.6% | 2.5% | 2.4% | 3.2% | 2.4% | 1.9% | 1.8% | 2.3% |

We see fair value for this stock at 28 times earnings and today, shares trade for 43.4 times earnings, significantly higher than the 10-year average of 32. We therefore see a significant 8.4% headwind to total returns annually as the valuation moderates over time. A moderating valuation should see the yield rise over time as the dividend increases. We are forecasting mediocre dividend growth as the company is targeting a 50% to 60% dividend payout ratio, which it is far from in 2020.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

| Year   | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2026 |
|--------|------|------|------|------|------|------|------|------|------|------|------|------|
| Payout | 60%  | 61%  | 84%  | 71%  | 63%  | 76%  | 55%  | 185% | 46%  | 68%  | 79%  | 65%  |

Qualitatively, Thomson Reuters' strongest competitive advantage is its brand recognition, which provides it with strong pricing power in the competitive world of financial information. The company's payout ratio appears to be safe today, and we expect the 28-year annual dividend streak to continue. TRI was founded during the last recession, so it is difficult to know exactly how much its business was impacted. However, since over 75% of revenues are subscription-based, the company has some built-in defense to the current pandemic.

## Final Thoughts & Recommendation

We see total returns for Thomson Reuters coming in negative at -1.7%, entirely due to an expected negative unwinding of the valuation level. The expected results of the two-year Change Program are a net positive, but the stock today is at its all-time high, and is already pricing in much of that benefit. We are maintaining our sell recommendation on Thomson Reuters given the unattractive valuation.
