Overview & Current Events

Best Buy Co. Inc. is one the largest consumer electronics retailers in North America with operations in the U.S. and Canada. Best Buy sells consumer electronics, personal computers, software, mobile devices, and appliances and provides services. At end of Q3 FY2021, Best Buy operated 956 Best Buy stores in the U.S, 14 Best Buy Outlet Centers in the U.S., 21 Pacific Sales Stores, 131 Best Buy stores in Canada, 33 Best Buy Mobile Stand-Alone Stores in Canada, 4 Best Buy stores in Mexico. The company continues to lower total store count during the COVID-19 pandemic continuing a long-term trend. The company's annual sales exceeded \$47B in fiscal 2021.

Best Buy reported solid Q4 FY2021 and full-year results on February 25, 2021. For the quarter, enterprise revenue increased to \$16,937M from \$15,196M and non-GAAP diluted EPS increased to \$3.48 from \$2.90 on a year-over year basis. Comparable enterprise revenue increased 12.6%, slower, but still the third quarter of double-digit growth.

Domestic revenue rose 11.2% driven by a 12.4% rise in comparable sales offset by permanent store closures.

Comparable domestic online sales rose 89.3% to \$6.66B compared to the prior year as consumers continued to move more purchases online. Domestic online sales now comprise about 43.2% of total domestic revenue versus 25.4% last year. International segment revenue rose 14.0% to \$1.54B due to 14.9% comparable sales growth. Best Buy is exiting operations in Mexico and closing stores there.

For the year, revenue rose to \$47,262M from \$43,638M on 9.7% enterprise comparable and 144% on-line sales growth. Adjusted diluted earnings per share rose to \$7.91 from \$6.07.

Best Buy was initially adversely affected by COVID-19 due to local government restrictions and store closures. But Best Buy is benefitting from rising on-line sales from consumers and businesses. COVID-19 has changed how people work, attend school, entertain, and eat. This has driven sales of electronics, appliances, tablets, and home theater. However, rising vaccine distribution portends slowing growth, and the company is estimating flat sales growth in fiscal 2022.

Growth on a Per-Share Basis

Year ¹	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS²	\$3.61	\$2.54	\$2.07	\$2.60	\$2.78	\$3.56	\$4.42	\$5.32	\$6.07	\$7.91	\$8.38	\$11.21
DPS	\$0.62	\$0.66	\$0.68	\$0.72	\$0.92	\$1.12	\$1.36	\$1.80	\$2.00	\$2.20	\$2.80	\$4.11
Shares³	341	338	347	352	324	311	283	266	255	247	241	207

Best Buy's diluted non-GAAP EPS growth is volatile. It was affected by the Great Recession and more recently the ongoing transition to online shopping. In fact, sales growth was flat-to-negative from fiscal 2012 to 2017. But saying that, the company's efforts to prioritize online sales growth, optimize store count and extract cost efficiencies has been taking hold leading to organic sales growth and higher earnings accelerated by the COVID-19 pandemic. We are forecasting on average 6% EPS and 8% DPS growth out to fiscal 2027, but growth will be uneven. The payout ratio is low so there is room for further dividend increases. Indeed, the quarterly payout was raised 27.3% in fiscal 2022.

¹ Best Buy's fiscal year ends at the beginning of February. All tables are in fiscal year.

² Diluted Non-GAAP EPS including restructuring charges, intangible asset amortization, and acquisition-related transaction costs.

³ Share count in millions.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
P/E	7.6	7.4	15	11.8	12.5	10.1	12.7	13.3	11.9	13.5	12.7	12.0
Yld.	2.3%	3.5%	2.2%	2.4%	2.7%	3.1%	2.4%	2.6%	2.8%	2.1%	2.6%	3.1%

Best Buy's stock price is up since our last report. After a brief downturn in the first quarter, the company's on-line sales are surging during COVID-19 and the company performed better than we expected in FY 2021. Our earnings estimate is \$8.38 in fiscal 2022. Our estimate of the fair value multiple is 12X near the trailing 10-year valuation. Our fair value is now \$101. Our 5-year price target is now \$135.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	17%	26%	33%	28%	33%	31%	31%	34%	33%	28%	33%	37%

As a retailer Best Buy is in a very competitive industry. Although it is one the largest electronics retailer by revenue, the company has for the most part no significant advantage. Both Walmart and Costco sell electronics and have scale and cost advantages. Best Buy is also not the clear market leader for online electronics retailing as Amazon, Walmart, Apple and others provide significant competition there. However, Best Buy's Geek Squad does provide an advantage relative to other traditional retailers as they provide a level of expertise and service not typically found at other retailers.

Best Buy makes very conservative use of debt with only \$110M in short-term debt and \$1,253M in long-term debt that is offset by \$5,494M in cash and equivalents giving the company a net cash position.

Final Thoughts & Recommendation

At present we are forecasting 7.4% annualized total return over the next five years. Best Buy is benefitting from the work, learn, and entertain from home trend that is driving electronics sales during the COVID-19 pandemic. The accelerating trend to online shopping is also a tailwind. But the outlook for fiscal 2022 is muted as vaccine distribution scales. The company raised the dividend over 27% in fiscal 2022. At the current price, we rate this stock a hold.
