Overview & Current Events

Genuine Parts Company was founded in 1928 and since that time, it has grown into a sprawling conglomerate that sells automotive and industrial parts, electrical materials and general business products. Its global span reaches throughout North America, Australia, New Zealand and Europe and is comprised of more than 3,000 locations. It has about 50,000 employees and trades with a market capitalization of \$15.9 billion, with just over \$17 billion in annual revenue.

Genuine Parts reported fourth quarter and full-year earnings on February 17th, 2021 with results coming in below expectations on both the top and bottom lines. Revenue was \$4.3 billion in Q4, down fractionally from the same period a year ago. The decline was due primarily to a -2.8% decline in comparable sales, which was partially offset by a 0.8% tailwind from acquisitions, as well as a 1.3% gain from forex translation. Net income from continuing operations came to \$221 million on an adjusted basis, up from \$186 million in the same period of 2019. On a per-share basis, earnings were \$1.52, up 20% from \$1.27 in the year-ago period.

For the year, sales were \$16.5 billion, down -5.6% year-over-year. Excluding divestitures, sales were down -2.3% year-over-year. Adjusted earnings were \$765 million, or \$5.27 per share, down from \$777 million and \$5.31 per share, respectively, in the year-ago period.

Free cash flow was \$1.9 billion for the year, nearly quadruple 2019's value of \$555 million. Debt was issued in the amount of \$500 million during the fourth quarter to refinance its revolving credit facility, but the company ended the year with \$749 million less debt than it began the year with.

We expect \$5.70 in earnings-per-share for this year following guidance from management.

The dividend was raised for the 65th consecutive year as well, for a new payout of \$3.26 per share annually.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$3.58	\$4.14	\$4.19	\$4.61	\$4.63	\$4.59	\$4.71	\$5.68	\$5.69	\$5.27	\$5.70	\$7.27
DPS	\$1.76	\$1.98	\$2.11	\$2.30	\$2.46	\$2.63	\$2.70	\$2.88	\$3.05	\$3.16	\$3.26	\$3.97
Shares¹	156	155	154	153	150	148	147	147	146	144	143	140

Earnings-per-share growth has seen stops and starts but over the long-term, Genuine Parts delivers. The company's businesses are all what could be considered staples as it serves businesses and consumers in areas where there is likely to be demand for the long run. The company's acquisitions have led the way in terms of growth and will continue to do so moving forward. We are forecasting 5% annualized earnings-per-share growth for the next five years in a continuation of this trend, in addition to positive organic sales in the Automotive segment. The company's nearly constant acquisitions should help keep the top line moving, but we note that margins have been less than stellar of late, which we believe will keep a lid on future growth. In addition, the company's Industrial segment continues to struggle with COVID-related issues. We note that divestitures in 2020 caused what we believe will be temporary weakness in revenue and earnings.

Genuine Parts Co. (GPC)

Updated March 5th, 2021 by Josh Arnold

Genuine Parts' pipeline of new acquisitions should keep the trend of higher revenue in place for the foreseeable future, with sales growth being the primary driver of earnings-per-share growth moving forward, in concert with a small amount of share repurchases. We are concerned by the company's inability to grow margins while revenue is moving in the right direction, but thus far, it has been able to overcome this with share repurchases and revenue growth.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	15.1	15.2	18.6	19.3	19.5	20.8	19.2	17.0	17.8	17.1	18.9	17.0
Avg. Yld.	3.3%	3.2%	2.7%	2.6%	2.7%	2.8%	3.0%	3.0%	3.0%	3.5%	3.0%	3.2%

Genuine Parts' price-to-earnings ratio rose steadily in the period from 2009 to 2017, moving from 13.8 to 19.2 in that time frame. The stock has rallied since our last update, now trading for 18.9 times our earnings estimate for this year. With the price-to-earnings ratio still above our long-term fair value estimate at 17, we see a modest annual headwind to total returns from the valuation.

Genuine Parts is famous for its dividend, as its 60+ consecutive years of increases makes it a Dividend King. The current yield of 3.0% is roughly in line with historical norms, and we expect the yield to remain in excess of 3% for the foreseeable future.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	49%	46%	50%	49%	52%	56%	57%	51%	54%	60%	57%	55%

Genuine Parts' payout ratio has been quite steady between 50% and 60% of earnings for many years, and we do not expect that to change anytime soon. We see the dividend rising slightly slower than earnings, keeping the payout ratio at less than two-thirds of earnings in the years to come, consistent with the past decade.

Genuine Parts' competitive advantages include its wide array of industries and customers served, geographic reach and the fact that it sells what amount to industrial staples. Genuine Parts is still prone to earnings declines during recessions but performs relatively well; this is a defensive stock for a retailer/wholesaler.

Final Thoughts & Recommendation

Overall, Genuine Parts Company looks overvalued based upon both its current valuation and dividend yield. Given this, we are expecting total annual returns of 5.6% for the next five years. Returns could accrue from the current 3.0% yield and 5% earnings growth offset by a headwind from the valuation. Given this total return outlook, stemming mostly from what we perceive as overvaluation, we rate the stock a hold.
