Overview & Current Events

BancFirst Corp. (BANF) serves as the financial holding company for BancFirst, a state-chartered bank headquartered in Oklahoma City, Oklahoma. The Company was founded in 1984, and the subsequent year proceeded to merge with seven other bank holding companies based in Oklahoma. For the next several years, the Company acquired other banks and bank holding companies. BancFirst has 107 banking locations serving 58 communities throughout Oklahoma and has over 1,900 employees. BancFirst offers a variety of commercial banking services to retail customers and small and mid-sized businesses. For retail customers, this includes checking, savings, CDs, personal loans, and other services. The bank offers business lending services for commercial customers, including agricultural and multi-family loans, and various business banking services. The Company has a \$21.5 billion market capitalization.

On January 21, 2021, BancFirst Corporation reported fourth-quarter and full Fiscal Year (FY)2021 earnings. The Company reported net income of \$35.4 million, or \$1.06 diluted earnings per share, for the quarter compared to net income of \$35.5 million, or \$1.07 diluted earnings per share, for the fourth quarter of 2019. Net income for the twelve months was \$99.6 million, or \$3.00 diluted earnings per share, compared to \$134.9 million, or \$4.05 diluted earnings per share, for the year of 2019. This is a decrease of (25.9)%. A higher provision for credit losses negatively impacted the results for the quarter and FY2020. The Company's total assets were \$9.2 billion, an increase of \$646.6 million compared to the end of 2019. However, The Company beats market expectations. BancFirst beat by \$0.32 on GAAP EPS of \$1.06 and exceeds revenue by \$3.1 million to \$115 million, a 5.1% increase for the quarter.

We estimated that the Company would make about \$3.69 in earnings per share for FY2021, a 23% increase vs. 2020 earnings of \$3.00 per share. We will use \$3.69 per share for our fair value calculation and our total return projections.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$1.47	\$1.68	\$1.75	\$2.02	\$2.09	\$2.22	\$2.79	\$3.76	\$4.05	\$3.00	\$3.69	\$4.94
DPS	\$0.52	\$0.56	\$0.60	\$0.65	\$0.70	\$0.74	\$0.80	\$1.02	\$1.24	\$1.32	\$1.36	\$1.82
Shares²	31.0	31.0	31.0	31.0	32.0	32.0	33.0	33.0	33.0	33.0	33.0	33.0

BancFirst has grown EPS, averaging 8.2% per year over the past ten years and 10.7% over the past five years. However, going back to a more extended 15-year period to account for the prior recession, the bank has only grown earnings by an average of 6.1% per year. With the low-interest environment, we expect EPS to grow at around a rate of 6% for the next five years, which is in line with its long-term earnings growth.

The bank's net margin has increased in recent years, from 25.38% in FY2017 to 33.05% in FY2018, but it reduced slightly to 32.6% in FY2019. For 2020, the net margin came was 23%. We see it lowering more as the Fed drops the interest rate to 0% because of the COVID-19 economic recession.

¹ Ex-dividend date and dividend payment date are estimates.

² Share count is in millions.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	NOW	2026
Avg. P/E	13.3	12.6	16.5	16.1	14.1	21.8	19.4	14.8	15.4	19.6	17.5	15.0
Avg. Yld.	2.8%	2.6%	2.1%	2.1%	2.4%	1.6%	1.6%	2.0%	2.0%	2.3%	2.1%	2.5%

BancFirst's P/E ratio has averaged 16.4 over the past ten years, with relatively little change from year-to-year. We feel that a multiple of 15.0 is fair for a company of this size with a low estimated growth rate and yield. Thus, the company looks to be overvalued based on the average PE. The stock currently has a price-to-book (PB) ratio of 2, which is higher than its five-year average of 1.9. We Would like to see the PB ratio to be lower than its 5-year average.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	35.4%	33.3%	34.3%	32.2%	33.5%	33.3%	28.7%	27.1%	30.6%	44.0%	37%	37%

BancFirst is a well-managed bank that has raised its dividend for 27 consecutive years and emerged from the global financial crisis relatively unscathed. Although earnings fell approximately 35% from their peak in 2007 to their bottom in 2009 and then took five years to surpass the 2007 peak, this was very healthy compared to many other banks in the country. At no point did earnings fall enough to put the dividend payout ratio above 50%. Today, the bank has a highly diversified asset base with commercial loans, real estate loans, and debt securities, maintaining compliance with banking regulations and capital reserve ratios.

Oklahoma's banking industry is diversified, and the company does not have a significant competitive advantage over regional or national banks. However, well-run banks generally enjoy high switching costs, as depositors are unlikely to go through the hassle of switching banks in most scenarios. BancFirst has considerably outperformed the S&P 500 and all of the "Big Four" national banks over the past 25 years in terms of total shareholder returns, which indicates an above-average company culture and management team. David Rainbolt was the CEO for virtually the entirety of this long period of outperformance, but two years ago moved on to become the executive chairman. At the same time, David Harlow, former BancFirst president, is now the CEO.

Final Thoughts & Recommendation

BancFirst is a small bank with a long stretch of consistent dividend growth, significant resilience through recessions, and a history of considerably outperforming the broader banking industry and the stock market more generally. Interest rates and other factors outside of their control may be a negative headwind as we advance. BANF stock price increased since our second-quarter report over 50%, which we rated it as a BUY. However, we see a 5.0% total annual return for the next five years, mostly from dividends. Thus, we change our last BancFirst report recommendation from HOLD to now SELL at the current price because of the low expected total return.
