## Overview & Current Events

Starbucks began with a single store in Seattle's Pike Place Market in 1971 and now has nearly 33,000 stores worldwide. The company operates under the namesake Starbucks brand, but also holds the Seattle's Best Coffee, Teavana, Evolution Fresh, and Ethos Water brands in its portfolio. The \$134 billion market cap company generates over \$25 billion in annual revenue.

On September 30<sup>th</sup>, 2020 Starbucks increased its dividend 9.8% from \$0.41 to \$0.45 per quarter.

On April 27<sup>th</sup>, 2021 Starbucks announced Q2 fiscal year 2021 results for the period ending March 28<sup>th</sup>, 2021. (Starbucks fiscal year ends the Sunday closest to September 30<sup>th</sup>.) For the quarter, the company generated net revenue of \$6.7 billion, representing an increase of 11.2% compared to Q1 2020. Global comparable store sales increased by 15%, driven by a 19% increase in the average ticket, partially offset by a -4% decline in comparable transactions. Adjusted earnings-per-share equaled \$0.62 compared to \$0.32 in the prior year's quarter.

During the quarter Starbucks opened 5 net new stores, bringing the total up to 32,943 stores globally, of which 51% and 49% were company-operated and licensed, respectively.

Starbucks also updated its fiscal 2021 guidance, reiterating its expectation of 18% to 23% global comparable sales growth and approximately 2,150 new store openings (1,100 net new stores). In addition, the company now expects \$28.5 billion to \$29.3 billion in revenue (from \$28 - \$29 billion) and adjusted EPS of \$2.90 to \$3.00 (from \$2.70 - \$2.90).

## Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
<b>EPS</b>	\$0.76	\$0.90	\$1.13	\$1.36	\$1.58	\$1.91	\$2.06	\$2.42	\$2.83	\$1.17	<b>\$2.95</b>	<b>\$4.75</b>
<b>DPS</b>	\$0.26	\$0.34	\$0.42	\$0.52	\$0.64	\$0.80	\$1.00	\$1.26	\$1.44	\$1.64	<b>\$1.80</b>	<b>\$2.64</b>
<b>Shares<sup>1</sup></b>	1,490	1,499	1,506	1,499	1,485	1,461	1,432	1,309	1,185	1,182	<b>1,170</b>	<b>1,160</b>

Starbucks had put together an excellent operating record, growing earnings-per-share by 18% per annum in the 2010 to 2019 period. During that time the company's net profit margin went from 5% to 13%, while the company-owned store count nearly doubled. Of course, this fantastic growth of the past makes future growth a bit harder to replicate.

Last year the company faced challenges amid the COVID-19 pandemic, as 2020 results clearly demonstrate. Demand was down significantly, and financial results were pressured in the short-term. However, we are encouraged by recent guidance, suggesting that the company can get back to "normal" in 2021 after a yearlong decline.

Looking further out, Starbucks has a strong growth trajectory available over the long-term in the way of a growing U.S. and International store count, where the company is still in the early innings of expansion, coupled with pricing power. We are forecasting 10% annual growth over the intermediate term as the company looks to get back to growth in 2021 and beyond.

<sup>1</sup> In millions.

## Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	22.8	27.5	26.5	27.9	30.2	30.4	27.7	23.2	26.6	---	38.8	23.0
Avg. Yld.	1.5%	1.4%	1.4%	1.4%	1.3%	1.4%	1.8%	2.2%	1.9%	2.0%	1.6%	2.4%

Excluding 2020, Starbucks has traded hands with an average P/E ratio of about 27 times earnings. However, this was during a time when the company's growth rate was much faster. Moving forward we have presumed a multiple of 23 times earnings, which still implies a premium valuation – reflecting the company's solid growth prospects and overall quality – but note that growth will be more and more difficult to formulate over time. At the current valuation, now trading near 38 times the midpoint of management's guidance, there is the possibility of a meaningful valuation headwind. Meanwhile, the dividend component should continue to grow.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	34%	38%	37%	38%	41%	42%	49%	52%	51%	140%	61%	56%

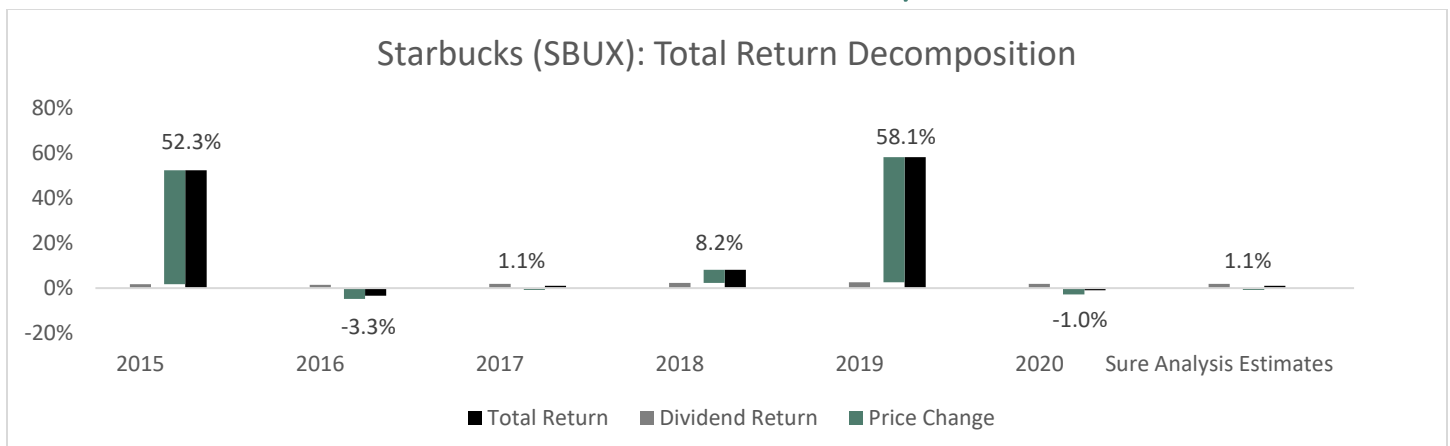

Starbucks sells an addicting product combined with a well-respected brand. This allows Starbucks to sell its coffee at premium prices and generate repeat business from customers. Still, the company is somewhat cyclical. From fiscal year 2007 to 2008, earnings-per-share fell -18%, before increasing by 11% and 60% in the next two years. Earnings climbed higher every year since, until 2020 when the company was tested once again – seeing EPS decline -59%.

At the end of Q2 2021, Starbucks held \$3.9 billion in cash and equivalents, \$7.0 billion in current assets and \$28.4 billion in total assets against \$6.5 billion in current liabilities and \$36.0 billion in total liabilities. Long-term debt stood at \$14.6 billion against underlying earnings power of ~\$3.5 billion annually. While the dividend payout ratio has increased significantly (from 0% in 2009 to over half of earnings) Starbucks continues to maintain a reasonable financial position.

## Final Thoughts & Recommendation

After being up 15% in our last report, shares are up another 14% in the last three months. Starbucks is one of those companies that you would love to own, with a terrific past, strong financial position, excellent brand and growth path ahead. Of course, the problem is that everyone knows about these great attributes, resulting in a share price that has been bid up accordingly. This really equalizes the value proposition when it comes to anticipated returns. We forecast 1.1% annual returns, comprising of a 10% intermediate-term growth rate and the company's 1.6% dividend yield offset by the potential for a material valuation headwind. Shares earn a sell rating.
