## Overview & Current Events

Dublin, Ohio-based Cardinal Health is one of the “Big 3” drug distribution companies along with McKesson (MCK) and AmerisourceBergen (ABC). Cardinal Health serves over 24,000 United States pharmacies and more than 85% of the country’s hospitals. The company has operations in more than 40 countries with approximately 48,000 employees. With 34 years of dividend increases, the \$17 billion market cap company is a member of the Dividend Aristocrats Index.

On May 6<sup>th</sup>, 2021 Cardinal Health released Q3 fiscal year 2021 results for the period ending March 31<sup>st</sup>, 2021. (Cardinal Health’s fiscal year ends June 30<sup>th</sup>.) For the quarter the company reported revenue of \$39.3 billion, up marginally from the \$39.2 billion in Q3 2020. On an adjusted basis the company posted earnings of \$451 million or \$1.53 per share compared to \$474 million or \$1.62 per share in Q3 2020.

Cardinal Health operates in two segments: Pharmaceutical and Medical. The Pharmaceutical segment makes up the lion’s share of revenues (~90%), but the Medical segment remains important due to its higher margins and growth potential. For the quarter the Pharmaceutical segment reported \$35.1 billion in revenue (flat vs. last year) and \$511 million in profit (down -4%). The Medical segment generated \$4.2 billion in sales (+3%) and \$174 million in profit (-2%).

Cardinal Health also updated its fiscal 2021 outlook, now anticipating \$5.90 to \$6.05 in EPS from \$5.85 to \$6.10. In addition, the company announced a \$0.4908 quarterly dividend, marking a 1.0% increase.

## Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
<b>EPS</b>	\$2.67	\$3.21	\$3.73	\$3.84	\$4.38	\$5.24	\$5.40	\$5.00	\$5.28	\$5.45	<b>\$5.98</b>	<b>\$6.93</b>
<b>DPS</b>	\$0.82	\$0.88	\$1.09	\$1.25	\$1.41	\$1.61	\$1.81	\$1.86	\$1.91	\$1.92	<b>\$1.96</b>	<b>\$2.38</b>
<b>Shares<sup>1</sup></b>	351	343	340	337	328	322	316	309	298	294	<b>294</b>	<b>280</b>

Since 2010 Cardinal Health has compounded both earnings-per-share and its dividend by about 10% annually. Moving forward we do not anticipate this sort of growth, especially considering the slowdown in earnings improvement in the last few years, although recent guidance continues to be more encouraging.

We are forecasting 3% intermediate-term earnings growth, from management’s midpoint guidance (which represents 9.6% growth compared to fiscal year 2020). Our subdued growth rate view could turn out to be conservative, especially with the company’s penchant for share repurchases. However, given the company’s earnings performance in 2016 through 2020, ongoing opioid litigation and a hot-topic drug pricing environment we are cautious for now. In addition, while the COVID-19 pandemic has helped results in the short-term, the long-term outlook remains quite uncertain.

That being said, we are encouraged by management comments related to elective procedures coming back and a material increase in personal protective equipment (PPE) demand. Cardinal Health is holding up well in the pandemic.

<sup>1</sup> In millions.

## Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	17.0	13.1	12.7	17.9	19.1	14.9	14.4	14.6	9.5	9.2	9.7	10.0
Avg. Yld.	1.8%	2.1%	2.3%	1.8%	1.7%	2.1%	2.3%	2.9%	3.8%	3.8%	3.4%	3.4%

Cardinal Health has traded hands with an average P/E ratio of about 14 times earnings dating back to 2011. However, this was during a time when growth was much more robust. We have used a multiple of 10 times earnings as a starting place for fair value in recognition of our lower anticipated growth rate and risks in the industry. Given the current valuation near 10 times our estimate of this year's earnings, this implies little impact from the valuation.

The dividend yield is now fairly robust partly due to an expanding payout ratio, but mostly as a result of a lower share price in the last few years. While the pace of dividend growth has slowed, the starting yield is solid.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	31%	27%	29%	33%	32%	31%	34%	37%	36%	35%	33%	34%

Collectively the three major pharmaceutical wholesalers have a competitive advantage in the industry. Competition is held at bay by the massive scale already in place and the exceptionally low margins.

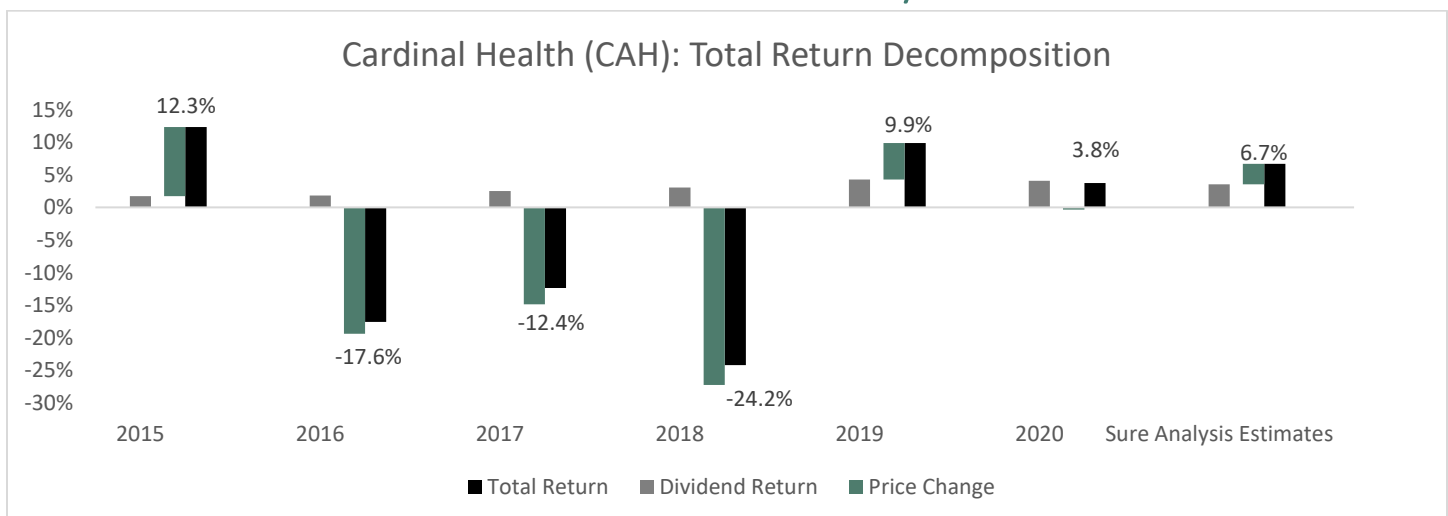

Cardinal Health has proven itself to be a solid operator in many ways – strong earnings for the past decade, a growing dividend and ample interest coverage. The dividend payout ratio had ticked up slightly in recent years, but its back to about a third of expected profits. In turn, the company has the ability to repurchase a meaningful number of shares.

As of the most recent report the company held \$3.5 billion in cash, \$30.4 billion in current assets and \$43.9 billion in total assets (23% of which is goodwill) against \$25.3 billion in current liabilities and \$42.1 billion in total liabilities. Long-term obligations stood at \$6.7 billion against underlying annual earnings power of ~\$1.8 billion.

## Final Thoughts & Recommendation

Shares are up 8% since our last report. Total return potential comes in at 6.7% per annum, stemming from a 3% growth rate, a 3.4% dividend yield and a small valuation tailwind. There are risks to the business - namely political pressure, opioid litigation, the ongoing COVID-19 pandemic and the low margin business - but the dividend is well covered. We are reiterating our hold rating.
