## Overview & Current Events

CyrusOne provides mission-critical data center facilities that protect and ensure the continued operation of firms and their IT departments. The company's strategy is focused on attracting customers that have not historically outsourced their data center needs. CyrusOne has approximately 1000 customers, including 200 of the Fortune 1000 companies. CyrusOne operates in the United States, Europe, and Asia. Its data centers provide customers the flexibility and scale to match their specific growth needs ideally. The company has a market cap of \$8.35 billion, generates annual revenues of around \$1 billion, and is headquartered in Dallas, Texas.

On April 28<sup>th</sup>, CyrusOne announced its Q1 -2021 results for the period ended March 31<sup>st</sup>, 2021. For the quarter, revenues and normalized FFO grew 21% and 8% to \$298.6 million and \$120.2 million, respectively. FFO/share increased to \$1.00, 3% higher than the year before. The mismatch in growth with the normalized FFO is due to additional share issuance. The main revenue growth drivers included a 7% increase in occupied CSF (colocation square feet) and additional interconnection services. Overall, the company is set to keep growing as it ended the quarter with \$113 million in annualized revenue backlog, representing about \$955 million in future total contract value. Additionally, around 69% of the upcoming 380K CSF in CyrusOne's pipeline is preleased, indicating that demand for datacenters remains strong. Management reaffirmed its FY2021 FFO/share guidance of \$3.90 to \$4.00, suggesting a small growth of 1.2% from the prior year. The company's new data centers and backlog should eventually lead to an accelerating growth rate.

## Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
<b>FFO/share</b>	---	---	\$1.22	\$1.73	\$2.17	\$2.66	\$3.12	\$3.31	\$3.63	\$3.90	<b>\$3.95</b>	<b>\$5.54</b>
<b>DPS</b>	---	---	\$0.64	\$0.84	\$1.26	\$1.52	\$1.68	\$1.84	\$1.92	\$2.02	<b>\$2.08</b>	<b>\$2.65</b>
<b>Shares<sup>1</sup></b>	---	---	20.9	29.2	54.3	78.3	88.9	99.8	112.1	114.4	<b>120.6</b>	<b>200.0</b>

For REITs like CyrusOne, FFO is a better measurement of profitability and cash flow than the traditional earnings-per-share metric used to value most stocks. REITs often have high rates of depreciation, and therefore EPS is not an adequate measurement of performance. Since its IPO in 2013, the company has been able to expand its FFO consistently. Over the past five years, FFO/share has seen a CAGR of 8.2%.

DPS has also been increasing annually at a swift CAGR of 15.7% since the REIT's IPO. The company's latest DPS increase of just 2% should not worry investors, as the slowdown was more than likely attributed to preserving liquidity during the unpredictable environment caused by COVID-19.

CyrusOne should be able to leverage its cheap financing to sustain its speedy growth. Since data centers have been booming under COVID-19, creditors have meager demands, resulting in the company borrowing at rates as low as 2.15%. Consequently, future acquisitions such as its recent 12-acre site in Frankfurt should generate very high ROIs. We retain both our FFO/share & DPS estimates at 7% and 5%, respectively, remaining prudent against a potential saturation in the increasingly competitive data center market.

<sup>1</sup> Share count is in millions.

## Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Avg. P/FFO	---	---	18.23	15.86	14.02	16.91	18.58	17.58	17.9	19.5	<b>17.3</b>	<b>17.0</b>
Avg. Yld.	---	---	3.1%	3.9%	4.0%	3.4%	3.2%	3.3%	2.9%	2.9%	<b>3.0%</b>	<b>2.8%</b>

Like with the rest of high-growth data center REITs, CyrusOne trades at a premium compared to traditional REITs. The stock is currently hovering at the higher-end of its historical multiples, around 17.3 times its FFOs, primarily powered by the stability of cash flows generated by its properties. Data centers cannot simply shut down. Unlike, say, a mall tenant, firms that rent the company's facilities cannot suspend their usage of data centers, especially now, since online traffic is hitting all-time highs. As investors are rushing to capture such secure rental revenues, we expect shares to continue trading at a premium and retain our fair valuation multiple of 17X FFOs, reflecting datacenters remaining consistently attractive. Since our last report, the stock's yield has remained at 3%, which is quite close to CONE's industry peers.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

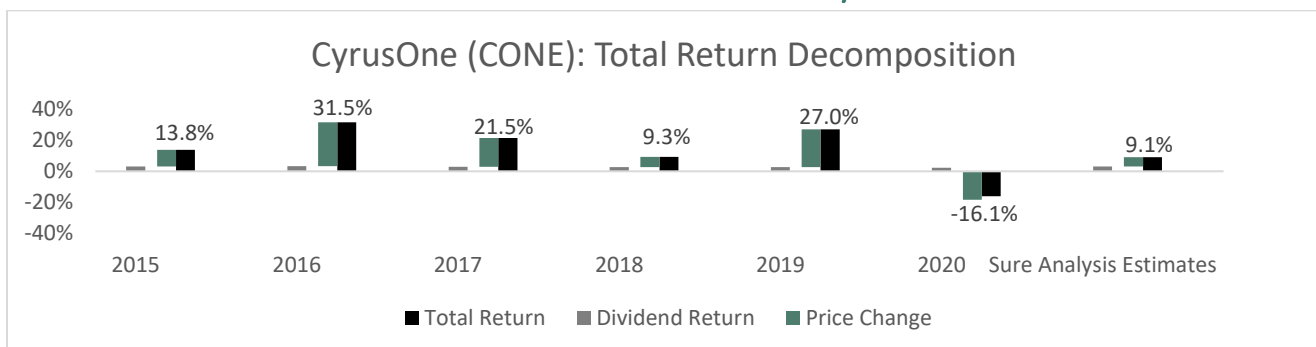

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	---	---	52%	49%	58%	57%	54%	56%	53%	52%	<b>53%</b>	<b>48%</b>

Being a data center REIT, CyrusOne is currently in an advantageous position, benefiting from its mission-critical tenants' secured cash flows. The company is unlikely to experience any rent deferrals, as was the case with the more traditional REITs over the past year. Moreover, the company is prudent with its payouts, proven by its thoughtful DPS increase despite delivering satisfactory FFO/share growth during such uncertain times. The balance sheet is robust, with approximately \$7.16 billion worth of real estate assets vs. \$3.37 billion of long-term debt, though the interest coverage ratio of around 0.97X its operating cash flows could be slightly worrisome. Finally, the dividend remains incredibly safe, and as already proven, CONE can easily withstand a potential recession going forward, facing little to no correlation with the overall economy's performance.

## Final Thoughts & Recommendation

CyrusOne offers a decent investment case. The company operates in probably the most exciting and secure sub-sector of REITs, so its premium valuation is understandable. Its attractive characteristics include robust FFO generation with predictable growth prospects, a low payout ratio, and a quality pool of mission-critical tenants. Due to the premium valuation and satisfactory, though not extraordinary growth estimates, we forecast annualized returns of around 9.1% going forward. Fueled by the consistent demand for its data centers, durable pricing power with embedded rental escalations, and a significant backlog in development soon to be contributing additional cash flows, CONE is likely to keep producing resilient results for years to come. Shares earn a hold recommendation due to projected annual returns.
