## Overview & Current Events

Founded in 1993, and headquartered in Houston, Texas, Camden Property Trust is one of the largest publicly traded multifamily real estate companies in the United States. The company is structured as a Real Estate Investment Trust (REIT), owning, managing, and developing multifamily apartment communities. As of March 31<sup>st</sup>, 2021, Camden owned 167 properties containing 56,851 apartments. The \$12 billion market cap company has approximately 1,600 employees.

On April 29<sup>th</sup>, 2021 Camden released Q1 2021 results for the period ending March 31<sup>st</sup>, 2021. For the quarter the company reported property revenue of \$267.6 million, a 0.6% increase compared to Q1 2020. Net income equaled \$32.5 million versus \$44.9 million the prior year's quarter, while adjusted Funds From Operations (FFO) totaled \$113.1 million or \$1.12 per share compared to \$121.5 million or \$1.20 per share in Q1 2020.

In Q1 2021 Camden reported occupancy of 96.0%, even with Q1 2020, with 98.4% of rent being collected versus 97.9% in Q1 2020. During the quarter three properties were completed and eight properties were under construction.

Camden also updated its 2021 guidance, now anticipating \$4.94 to \$5.24 in FFO per share (from \$4.80 to \$5.20 prior).

## Growth on a Per-Share Basis

| Year                      | 2011   | 2012   | 2013   | 2014   | 2015   | 2016   | 2017   | 2018   | 2019   | 2020   | 2021          | 2026          |
|---------------------------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|---------------|---------------|
| <b>FFO</b>                | \$2.73 | \$3.62 | \$4.11 | \$4.29 | \$4.54 | \$4.64 | \$4.53 | \$4.77 | \$5.05 | \$4.90 | <b>\$5.09</b> | <b>\$6.19</b> |
| <b>DPS</b>                | \$1.96 | \$2.24 | \$2.52 | \$2.64 | \$2.80 | \$2.95 | \$3.00 | \$3.08 | \$3.20 | \$3.29 | <b>\$3.32</b> | <b>\$4.04</b> |
| <b>Shares<sup>2</sup></b> | 78.8   | 96.2   | 85.3   | 88.5   | 97.6   | 89.9   | 91.5   | 103.1  | 97.3   | 99.4   | <b>100</b>    | <b>110</b>    |

Note that we have presented FFO in the table above, as this better reflects the underlying earnings power of a REIT. Dating back to 2011, Camden has been able to grow its dividend and FFO by 5.9% and 6.7% per annum respectively. However, in the last five years these growth rates have slowed to 3.3% and 1.5% respectively. We are forecasting 4% annual growth over the intermediate-term – in-between these two historical marks – for a variety of reasons.

On the positive growth side, we expect Camden to come off a subdued 2020 base, making future growth easier to come by. In addition, we are impressed by the resilience that the company has demonstrated thus far amid the pandemic. In addition, general economic growth over the long-term ought to help drive growth and the properties recently completed and under construction will add over 3,000 units.

Counterbalancing these positive notions, is the idea that growth began to slow even before the pandemic and Camden routinely issues shares to fund new properties. While this is a common practice among REITs, it does create a higher return bar that must be met before growth can occur on a per share level.

## Valuation Analysis

| Year             | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | Now         | 2026        |
|------------------|------|------|------|------|------|------|------|------|------|------|-------------|-------------|

Updated May 5<sup>th</sup>, 2021 by Eli Inkrot

Over the past decade shares of Camden have traded with an average price-to-FFO ratio of about 18. We believe this is more or less fair, taking into consideration the company's history and valuation of similar securities. With shares trading closer to 23 times estimates FFO, this implies the potential for a notable valuation headwind. The dividend was cut during the Great Recession, but has since recovered nicely, having increased each year for the past decade. This component ought to buoy investor returns over time.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

| Year   | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2026 |
|--------|------|------|------|------|------|------|------|------|------|------|------|------|
| Payout | 72%  | 62%  | 61%  | 62%  | 62%  | 64%  | 66%  | 65%  | 63%  | 67%  | 65%  | 65%  |

Camden has a competitive advantage in its position as one of the largest multifamily REITs in the U.S. Its scale and expertise allow it to leverage its experience across a wide portfolio of properties and actively pursue developments.

The company's FFO payout ratio has hovered in the 60% to 70% range for the last decade, which is where we anticipate it will remain with dividend growth tracking FFO growth over time. During the last recession, Camden posted FFO of \$2.90, \$1.68, \$2.72 and \$2.73 over the 2008 through 2011 stretch. Meanwhile, the dividend was cut from \$2.80 down to \$1.80 on an annual basis. This gives you some idea of the toll that recessions can take on the business, along with Camden's ability to bounce back. The company is holding up much better this time around, so far.

As of the most recent report, Camden held \$6.5 billion in net real estate and \$7.3 billion in total assets against \$3.6 billion in total liabilities. The company's net debt-to-adjusted EBITDA ratio equaled 4.9x.

## Final Thoughts & Recommendation

After being up 11% in our last report, shares are up another 16% in the last three months. Camden is a leading multifamily REIT with a solid operating history in the last decade. The last recession was not especially kind to the company, but so far Camden is holding up quite well this time around. We are forecasting 2.0% annual total return potential, stemming from 4% growth and a 2.8% starting yield, offset by a valuation headwind. Shares earn a hold rating.
