Overview & Current Events

Dillard's is a department store company that sells fashion apparel, cosmetics and home furnishings through 290 stores and clearance centers. The company competes with larger peers such as Macy's and Kohl's. Dillard's was founded in 1938 and is headquartered in Little Rock, AR.

Dillard's reported its first quarter earnings results on May 13. The company reported that its revenues totaled \$1.33 billion during the quarter, which was 69% more than the revenues that the company generated during the previous year's quarter. Revenues were above what the analyst community had forecast. This huge revenue increase can be explained by the impact that the coronavirus crisis had on the company's Q1 in 2020, which made for a rather easy comparison during this year's first quarter, as the economy is opening again. It should be noted that revenues were still lower than during the first quarter from 2 years ago, which shows that the company has not fully recovered yet.

The company reported a net profit of \$7.25 on a per-share basis for the first quarter, which came as a big surprise, as the analyst community had forecasted that the company would generate substantially lower earnings. Thanks to strong cost controls, Dillard's was quite profitable, although it should be noted that a one-time tax benefit had a positive impact on profits as well, which is why Q2-Q4 will likely not be this profitable. In 2020 Dillard's generated a net loss, but the analyst community is pretty certain that Dillard's profits will be dramatically higher this year. In fact, on the back of strong Q1 results, economic reopening tailwinds, Dillard's ambitious cost saving measures, and buybacks, analysts are expecting Dillard's to earn \$12.40 this year – which would be a new record profit for the company.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$4.29	\$6.32	\$6.99	\$7.79	\$6.91	\$4.93	\$4.89	\$6.23	\$4.38	-\$2.80	\$12.40	\$14.37
DPS	\$0.18	\$0.20	\$0.22	\$0.24	\$0.26	\$0.28	\$0.34	\$0.40	\$0.50	\$0.60	\$0.60	\$0.60
Shares¹	49	48	44	41	36	32	28	27	25	25	22	18

Dillard's recovered quickly from the financial crisis. By 2010, earnings-per-share were above pre-crisis levels. For several years Dillard's produced strong growth rates, but starting in 2015, profits started to decline. Revenue growth has not been strong over the last decade; sales in 2018 actually were lower than sales in 2008. Dillard's profit growth in the early 2010s was primarily driven by margin expansion, as gross and operating margins rose substantially – a trend that has unfortunately reversed, which was the reason for the declining profits over the last couple of years.

Following a very solid 2018, during 2019 the company had to battle with declining margins, which were the result of mark-downs, and headwinds from declining comparable store sales, which hurt the company due to negative operating leverage. Dillard's has returned a massive amount of cash to its owners via share repurchases in the past. The company's share count declined by more than 60% over the last decade, which has increased each share's portion of the company's earnings by a lot. 2020 was a weak year for Dillard's, but we believe that following the pandemic, the company will see a substantial increase in profitability, and over the next couple of years, ongoing share repurchases could result in a solid pace of earnings growth, although the future of brick-and-mortar retail is not certain.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	10.1	11.3	12.1	13.8	14.7	13.4	11.6	9.6	16.7	NMF	10.8	12.0
Avg. Yld.	0.4%	0.3%	0.3%	0.2%	0.3%	0.4%	0.6%	0.7%	0.7%	1.0%	0.4%	0.3%

Dillard's valuation has not been especially high throughout much of the last decade, as the company's shares usually were valued at a low-double-digit price-to-earnings multiple. Right now, shares trade for 11 times this year's estimated earnings-per-share, which is not a high valuation. We believe that shares are trading slightly below fair value today, on the back of the massive earnings growth that is expected for the current year.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	4.2%	3.2%	3.1%	3.1%	3.8%	5.7%	7.0%	6.4%	11.4%	NMF	4.8%	4.2%

Dillard's pays out only a marginal amount of its net profits in the form of dividends to the company's owners. Management is much more focused on reducing the share count, which the company has done very successfully in the past. It is very likely that management will continue to prioritize buybacks over dividends going forward. Despite the pressures during the current pandemic, Dillard's has decided to continue to pay its dividend.

One advantage that Dillard's has over some of its competitors is that it is not only active in apparel and cosmetics, but also in home furnishings, which provides some diversification and makes it less reliant on the performance of apparel sales – which are more easily done online compared to furniture. Management has pointed out that furniture performed better than other categories in recent years. Dillard's is not a recession-resilient stock.

Final Thoughts & Recommendation

Dillard's is a rather small department store company that has a somewhat unique product portfolio, due to also selling furniture on top of the more usual categories. The coronavirus crisis has been hurting Dillard's to a large extent in 2020, but the company is on track to see massively better results this year. The forecasted total returns are solid but not great, which is why we rate the stock a hold right here.
