Overview & Current Events

Prosperity Bancshares Inc. was formed in 1983 as a vehicle to acquire the former Allied Bank - chartered in 1949 as the First National Bank of Edna, Texas - which is now known as Prosperity Bank. The bank's main operation is receiving deposits from the general public and using the capital to originate commercial and consumer loans. The bank operates 261 branches in the greater Houston area and some neighboring counties in Texas and 14 more branches in Oklahoma. The company also has the following operations: wealth management, retail brokerage, and mortgage banking investment services. The bank's main lending focus is commercial mortgages, which make up 33% of their loan portfolio, followed by residential mortgages, which make up 24%. The company has a market capitalization of \$7.2 billion.

On November 1st, 2019, Prosperity Bancshares completed the acquisition of LegacyTexas Bank in a deal valued at \$2.1 billion. LegacyTexas has 42 branches in Texas and thus it has strengthened the position of Prosperity Bancshares in the area. As the deal value of \$2.1 billion was almost half of the market cap of Prosperity Bancshares before the deal, it is evident that this acquisition is major for the future growth of Prosperity.

In late April, Prosperity Bancshares reported (4/28/21) financial results for the first quarter of fiscal 2021. Loans grew 2.7%, deposits grew 5.1% over last year's quarter and non-performing loans remained low, at 0.15% of interest-earning assets. Moreover, the company grew its earnings-per-share 4%, primarily thanks to lower non-interest expense, which resulted from reduced costs in data processing. The bank has some exposure to the energy sector, which has been hit by the pandemic. However, it expects negligible losses from these loans. Moreover, Prosperity Bancshares has a reputation for its disciplined management and hence we expect it to endure the ongoing downturn without any problem. Its record earnings in 2020 and its 6.5% dividend raise last year are testaments to the resilience of this bank to downturns.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$3.01	\$3.23	\$3.65	\$4.32	\$4.09	\$3.94	\$3.92	\$4.61	\$4.52	\$5.68	\$5.75	\$6.67
DPS	\$0.72	\$1.00	\$0.65	\$0.99	\$1.12	\$1.24	\$1.38	\$1.49	\$1.64	\$1.87	\$2.00	\$2.60
Shares¹	46.9	56.5	66.1	69.8	70.0	69.5	69.5	69.9	94.7	92.6	92.0	90.0

Prosperity Bancshares has grown its earnings-per-share at a 7.3% average annual rate in the last decade, primarily thanks to strong economic activity in Texas and Oklahoma. Texas has the fastest-growing population in the nation and is expected by the Dallas Federal Reserve to post over 6% job growth in 2021. It is also expected to outperform most other states in economic growth over the next three years. Prosperity Bancshares stalled from 2014 to 2017 but it has reignited growth in the last three years. In addition, the pandemic has not disrupted the growth trajectory of the bank, primarily thanks to its recent major acquisition and the resultant synergies. Due to the all-time high earnings expected in 2021, we expect the bank to grow its earnings-per-share by 3.0% per year on average over the next five years. The bank initiated a quarterly dividend of \$0.025 per share in January-1999 and has grown it at a fast clip to \$0.49 per quarter. In the last five years, the bank has raised its dividend by 9.6% per year on average. Thanks to its low payout ratio (35%) and its promising growth prospects, it should be able to continue raising its dividend at a healthy pace.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	13.4	12.7	17.2	12.9	11.8	18.3	17.7	13.5	15.4	10.5	13.2	14.3
Avg. Yld.	1.8%	2.3%	1.2%	1.7%	2.1%	2.4%	2.1%	2.1%	2.4%	3.1%	2.6%	2.7%

Prosperity Bancshares is currently trading at a price-to-earnings ratio of 13.2, which is lower than its 10-year average earnings multiple of 14.3. If the stock reverts to its average valuation level over the next five years, it will enjoy a 1.6% annualized gain in its returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	24%	25%	24%	23%	27%	31%	35%	32%	36%	33%	35%	39%

Prosperity Bancshares believes that its competitive advantage is in its presence in areas with strong economic growth and excellent growth opportunities through acquisitions, new banking center locations and business development.

A risk for Prosperity is the downturn, which has been caused by the pandemic. The company could experience increased loan and lease charge-offs, though such charges have been very limited so far. Although this economic downturn is a risk for Prosperity Bank, the bank was able to grow immensely in the last recession. During the Great Recession (2008-2009), its stock rallied 36% throughout the year despite a declining broad market. The company was also able to grow its earnings-per-share by an outstanding 29% and its book value per share by nearly 7%. The bank is proving resilient in the ongoing recession as well, as it achieved record earnings-per-share in 2020.

Final Thoughts & Recommendation

Prosperity Bancshares is facing a headwind from the pandemic, but it is conservatively managed and should endure the downturn without any problem. However, the bank has rallied 52% in about eight months and hence it has become less attractive. We expect the stock to offer a 7.1% average annual return over the next five years and thus we lower our rating from “buy” to “hold”.
