Overview & Current Events

STAG Industrial is an owner and operator of industrial real estate. It is focused on single-tenant industrial properties and has 494 buildings across 39 states in the United States. STAG Industrial went public in 2011 and has a market capitalization of \$5.4 billion.

The focus of this REIT on single-tenant properties might create higher risk compared to multi-tenant properties, as the former are either fully occupied or completely vacant. However, STAG Industrial executes a deep quantitative and qualitative analysis on its tenants. As a result, it has incurred credit losses that have been less than 0.1% of its revenues since its IPO. As per the latest data, 53% of the tenants are publicly rated and 31% of the tenants are rated "investment grade." The company typically does business with established tenants to reduce risk.

In early May, STAG Industrial reported (5/4/21) financial results for the first quarter of fiscal 2021. The report was very similar to the previous seven reports. Core FFO grew 13% over last year's quarter thanks to the sustained strength of the tenants of the REIT. Core FFO per share grew only 4%, from \$0.47 to \$0.49, due to the extensive issuance of new units. Net operating income grew 11% over last year's quarter and the occupancy rate of the REIT marginally improved, from 96.9% to 97.0%. STAG Industrial is facing a headwind due to the recession caused by the pandemic. However, the effect of the pandemic on the REIT has been limited so far thanks to the high credit profile of its tenants. It is remarkable that the REIT has collected approximately 99% of its rental income in the last four quarter quarters.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
FFO	\$1.03	\$1.25	\$1.44	\$1.33	\$1.42	\$1.43	\$1.70	\$1.80	\$1.84	\$1.89	\$1.95	\$2.49
DPS	\$0.73	\$1.07	\$1.20	\$1.29	\$1.36	\$1.39	\$1.41	\$1.42	\$1.43	\$1.44	\$1.45	\$1.50
Shares¹	15.6	25.1	42.4	53.2	66.6	69.8	100.2	115.1	137.8	150.5	170.0	300.0

STAG Industrial has grown its FFO per share at a 7.0% average annual rate over the last decade and at a 5.9% average annual rate over the last five years. The U.S. industrial market is more than \$1 trillion in size and STAG Industrial still has a market share that is less than 1% of its target market, which includes the top 60 markets of the country. Therefore, the REIT has ample room to continue to grow for years. As we expect STAG Industrial to recover from the pandemic in the second half of this year, along with the economy, we expect it to grow its FFO per share around its historical pace in the upcoming years. If the REIT grows its FFO per share at a 5.0% annual rate, its FFO per share will grow from \$1.95 this year to \$2.49 in 2026.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026

STAG Industrial (STAG)

Updated May 13th, 2021 by Aristofanis Papadatos

STAG Industrial is currently trading at a P/FFO ratio of 17.4, which is higher than its historical average of 15.0. If the stock reverts to its average valuation level over the next five years, it will incur a -3.0% annualized drag due to the contraction of its P/FFO ratio.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	70.9%	85.6%	83.3%	97.0%	95.8%	97.2%	84.4%	78.9%	77.7%	76.2%	74.4%	60.3%

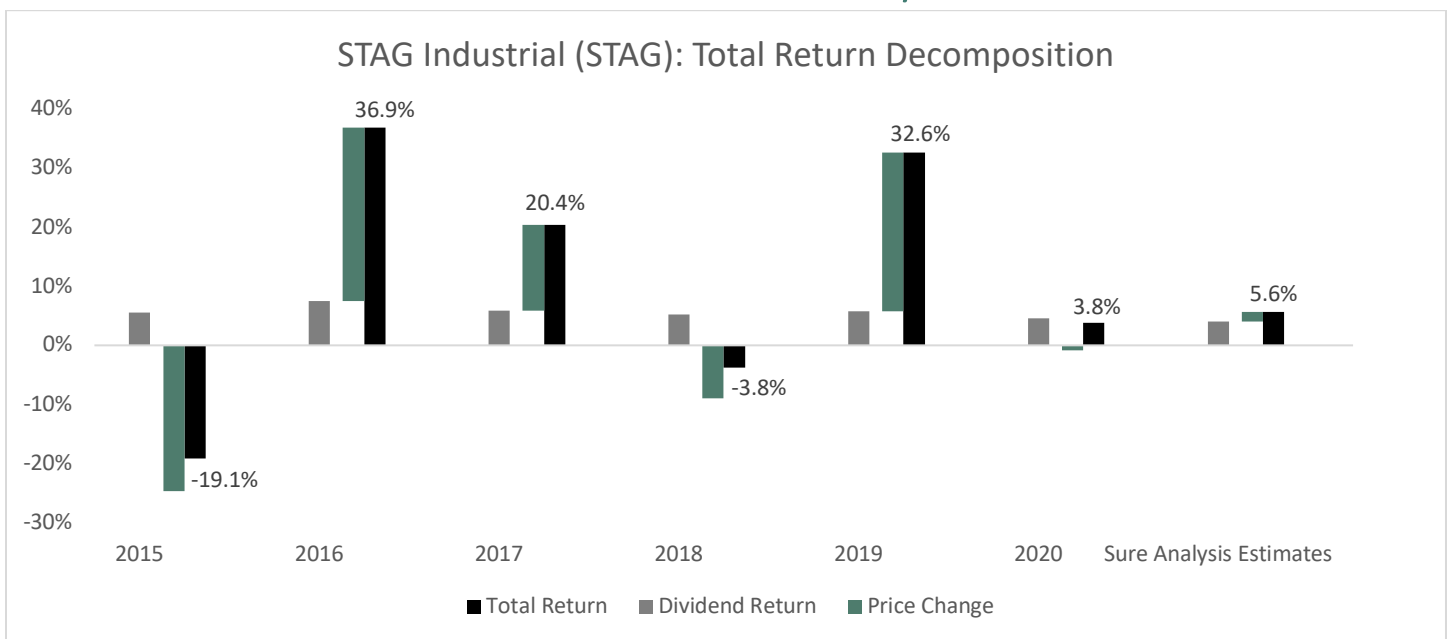

STAG Industrial has a well-laddered lease maturity schedule, with a weighted average lease term of 5.2 years and about half of the leases maturing after the end of 2025. Thus, the cash flows of the REIT can be considered fairly reliable under normal business conditions. Thanks to reliable cash flows, STAG Industrial is one of the few REITs that pay dividends on a monthly (instead of a quarterly) basis – a valuable characteristic for income investors. Income investors should also note that STAG Industrial currently offers a generous 4.3% yield and has never cut its dividend throughout its short history. Moreover, while its payout ratio rose to high levels during 2014-2016, it has fallen to healthy levels in the last two years. On the other hand, the REIT heavily dilutes its unitholders on a regular basis. Its unit count has more than tripled, from 42 million in 2013 to 159 million now. While the dividend per share has risen only 20% since 2013, the annual amount paid has more than tripled, from \$76 million in 2013 to \$229 million in the last 12 months. As a result, the financial burden of the dividend on the REIT has greatly increased.

Due to its focus on industrial properties, the REIT is highly vulnerable to recessions. The recession caused by the pandemic has hardly affected the performance of STAG Industrial so far, but it is likely to impact results if the pandemic lasts longer than currently anticipated. In such a case, the REIT will have an elevated probability of cutting its dividend.

Final Thoughts & Recommendation

STAG Industrial has proved markedly resilient to the pandemic so far. However, as the stock has nearly doubled off its bottom last year, we expect it to offer just a 5.6% average annual return over the next five years. We thus rate it as a hold.
