Overview & Current Events

Suncor Energy is one of the largest integrated energy producers in Canada. The company is involved in all the aspects of the energy value chain, including exploration & production, marketing, and refining. The company operates in three segments: Exploration & Production, Refining & Marketing, and Other. Suncor is headquartered in Calgary, Alberta, Canada and is cross-listed on both the Toronto Stock Exchange and the New York Stock Exchange, where it trades under the ticker 'SU' with a market capitalization of US\$35.2 billion. Suncor reports financial results in Canadian dollars. However, the figures listed in this research report are in USD.

In early May, Suncor reported (5/3/21) financial results for the first quarter of fiscal 2021. Total upstream production grew 6% over last year's quarter thanks to record production of synthetic crude oil. In addition, the company greatly benefited from the rally of the price of oil and the improvement in refining margins, which resulted from the aggressive production cuts of OPEC+ and the expectations for a recovery from the pandemic. As a result, the company switched from an adjusted loss of -\$0.85 per share to an adjusted profit of \$0.41 per share. Due to the severe downturn in the energy market in 2020, Suncor cut its quarterly dividend by -55% last year and thus it broke its 18-year dividend growth streak (in CAD). On the bright side, the pandemic could subside in the second half of this year. Given the impressive rally of the oil price and the improved outlook, we have raised our earnings-per-share forecast for the full year from \$0.80 to \$1.80 but we reiterate that the results of Suncor are very sensitive to commodity prices.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$2.70	\$1.79	\$2.52	\$1.60	-\$1.04	\$0.20	\$2.06	\$1.56	\$2.18	-\$1.15	\$1.80	\$2.41
DPS	\$0.43	\$0.50	\$0.71	\$0.89	\$0.86	\$0.84	\$0.99	\$1.11	\$1.27	\$0.83	\$0.68	\$0.91
Shares¹	1,559	1,523	1,478	1,444	1,446	1,668	1,641	1,585	1,536	1,525	1,510	1,480

Suncor was greatly affected by the pandemic last year, but we expect the company to begin to recover this year, along with the energy market. Suncor expects to achieve growth thanks to the ramp-up of production at Fort Hills and Hebron and other growth projects, which enhance value within its integrated asset portfolio. The company also makes sustained efforts to reduce its operating expenses. Overall, we expect Suncor to grow its earnings-per-share by 6.0% per year on average. Despite the strong results in 2017-2019, the losses posted in the last quarter of 2018 are a harsh reminder of the company's sensitivity to oil prices, particularly the discount of Canadian crude to WTI. Investors should also note the markedly volatile performance record of Suncor.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	13.6	17.8	13.0	21.8	---	---	15.6	23.7	14.4	---	13.3	13.0

Suncor Energy Inc. (SU)

Updated May 19th, 2021 by Aristofanis Papadatos

Like many large energy companies, Suncor's valuation history has been very volatile, as the company has battled tremendous fluctuations in its earnings-per-share. As we expect the company to recover over the next five years, we believe that a fair price-to-earnings ratio for this energy company in 2026 is 13. Suncor is currently trading at a price-to-earnings ratio of 13.3, which is slightly higher than our assumed fair ratio. If the stock trades at our fair valuation level in five years, it will incur a modest -0.5% annualized drag in its returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	16.1%	27.9%	28.1%	55.4%	---	43.0%	47.8%	71.3%	58.0%	---	37.8%	37.8%

The integrated structure of Suncor Energy somewhat mitigates its exposure to the fluctuations of commodity prices. However, the company is still very sensitive to the underlying crude oil prices. In addition, as a commodity producer, Suncor lacks a meaningful competitive advantage. On the bright side, the company has a decent balance sheet, with only 56% of its assets financed through liabilities and a healthy interest coverage ratio.

Until recently, Suncor was a member of the S&P/TSX Canadian Dividend Aristocrats Index, which is comprised of companies included in the S&P Canada BMI that have increased their dividends for at least five consecutive years. Suncor's dividend growth streak extended well beyond this arbitrary five-year cutoff, but its high sensitivity to oil prices and its vulnerability to downturns forced the company to end its 18-year dividend growth streak (in CAD) in the ongoing downturn. The high cyclical nature of the stock and its volatile performance render its dividend unsuitable for income-oriented investors.

Final Thoughts & Recommendation

We expect the pandemic to subside and the energy market to recover later this year. Suncor has doubled off its bottom in November, but it still has upside potential. We expect Suncor to offer an 8.1% average annual return over the next five years, though we lower our rating from "buy" to "hold", as the stock is not as attractive as it was a few months ago. Moreover, due to its volatile performance record and its high sensitivity to oil prices, the stock will be vulnerable if the pandemic lasts longer than expected. Therefore, the stock is suitable only for patient investors, who can endure stock price pressure for a considerable period.
