## Overview & Current Events

Sunoco is a master limited partnership that distributes a range of fuel products through its wholesale and retail business units. The wholesale unit purchases fuel products from refiners and sells those products to both its own and independently-owned dealers. Sunoco was founded in 2012 and is headquartered in Dallas, Texas.

Sunoco reported its first quarter earnings results on May 6. The company reported that its revenues totaled \$3.5 billion during the quarter, which was 6% more than the revenues that Sunoco generated during the previous year's quarter. Fuel prices were up compared to the previous year's quarter, but that was offset by lower sales volumes, as consumers drove less. Fuel prices are mostly a flow-through item for Sunoco, as a wholesaler Sunoco's costs increase as well when fuel prices rise. The revenue increase does thus not go hand in hand with an earnings increase of the same magnitude.

Sunoco reported that its adjusted EBITDA was down year over year, to \$157 million during the first quarter. Sunoco's distributable cash flows totaled \$108 million during the quarter, which was roughly one-third lower compared to the previous year's quarter, and which equated to DCF of \$1.29 per share, which covered the dividend easily.

## Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
<b>DCF/Share<sup>3</sup></b>	---	\$1.40	\$2.51	\$3.14	\$7.95	\$4.14	\$4.83	\$5.48	\$5.42	\$6.23	<b>\$6.25</b>	<b>\$6.73</b>
<b>DPS</b>	---	\$0.47	\$1.80	\$2.05	\$2.68	\$3.26	\$3.30	\$3.30	\$3.30	\$3.30	<b>\$3.30</b>	<b>\$3.30</b>
<b>Shares<sup>4</sup></b>	---	22	22	24	50	52	98	83	83	83	<b>84</b>	<b>87</b>

Sunoco does not have a long history, as the company was created not too long ago. During that time frame its results varied significantly. Sunoco's abnormally high EBITDA during 2015 was an outlier caused by above-average fuel price spreads, for example. During 2017 Sunoco was able to grow its EBITDA-per-share massively, despite the issuance of a high amount of new shares that was used to finance acquisitions. Sunoco issues new shares regularly, but the partnership only does this when the transaction/acquisition is expected to be accretive to its DCF-per-share.

Sunoco's sale of most of its convenience businesses have turned the company in a fuel wholesale-centered company. In this industry, the company profits from significant scale and revenue consistency. In Texas, Sunoco is one of the largest independent fuel distributors, and Sunoco is also among the top distributors of Chevron, Exxon, and Valero-branded motor fuel in the rest of the United States. In the fuel wholesale industry, scale is important, as increased scale allows for higher margins and a better negotiating position with suppliers. Total gasoline sales declined relatively steadily since around 2000, but bottomed in 2015, and have risen over the last couple of years. This macro shift towards higher gasoline consumption can be explained by customers' preference for larger, less efficient models such as SUVs and trucks. Higher gasoline demand is a macro tailwind for Sunoco's business, and although the coronavirus impacts the amount of miles driven in the near term, higher margins allowed Sunoco to grow its cash flows in 2020.

## Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
P/DCF	---	17.7	11.2	13.4	5.0	6.5	6.0	4.7	5.7	4.7	5.6	6.5
Avg. Yld.	---	1.9%	6.4%	5.1%	6.1%	9.8%	11.8%	12.7%	10.6%	11.4%	9.4%	7.5%

Sunoco trades at a low price-to-DCF multiple right now. Sunoco's share price is well below the peak of \$60 that was hit during 2014, whereas profitability, measured by DCF-per-share, hit a new peak in 2020. The combination of these factors explains why Sunoco's current valuation remains very low. We do not believe that the valuations seen in 2012-2014 will come back, as Sunoco was a different, more convenience store-oriented company back then, while the sentiment on the industry as a whole has also soured. But we still see upside potential from the current level.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	---	---	71.7%	65.3%	33.7%	78.7%	68.3%	60.2%	60.9%	53.0%	52.8%	49.0%

Sunoco's dividend payout ratio has moved in a wide range throughout its existence, as its cash flow has seen steep ups and downs. The company has never cut its dividend, but there have not been any dividend increases since 2017, either. The current yield of around 9% provides more than ample income. Sunoco has covered its dividend payout by a factor of 1.9 via distributable cash flows during the last 4 quarters, thus the dividend looks sustainable.

Sunoco is one of the largest fuel wholesalers in Texas, which provides competitive advantages in terms of size and scale. It is also a key distributor for Exxon and Chevron branded fuels, and the company has good relationships with these energy giants. Via tuck-in acquisitions, Sunoco could increase its scale advantage further over the coming years.

## Final Thoughts & Recommendation

Sunoco is a fuel wholesale company with significant scale in its biggest market of Texas. Fuel wholesale is an industry that is not experiencing a lot of growth, but Sunoco's business is throwing off a lot of cash. The company has weathered the coronavirus crisis very well, as distributable cash flows hit a new record high in 2020. The company trades below our fair value estimate and could produce compelling total returns, which is why we rate Sunoco a buy.
