## Overview & Current Events

Manulife Financial Corporation is an international financial services group that helps individuals and corporations make decisions through its wealth, asset management, and insurance businesses. It also offers annuity products and services. The company operates as Manulife across its offices in Canada, Asia, and Europe, and primarily as John Hancock in the United States. It has 37,000 employees, over 118,000 agents, and thousands of distribution partners, serving over 30 million customers. Manulife Financial is based in Toronto, Canada. The company reports in Canadian Dollars. All figures in this report have been converted to USD.

On May 5<sup>th</sup>, 2021, Manulife Financial reported its Q1-2021 results for the period ended March 31<sup>st</sup>, 2021. Core earnings came in at \$1.32 billion, up 67% compared to last year. The great increase was due to the company's results being compressed in Q1-2020 due to the pandemic outbreak. During the quarter, the global strength and diversity of Manulife's business continued to shine. The company is now progressing on its digital transformation with auto-underwriting at 72%, straight-through-processing at 81%, and eClaims at 92%. Despite the company achieving double-digit growth across all its operating segments, net income came in at \$643 million, 38% lower year-over-year, reflecting the immediate impact of the steepening yield curve and higher risk-free rates. It's worth noting that a higher interest rate environment is beneficial to Manulife's business in the long term. EPS for the quarter was \$0.30, 34.7% lower YoY, as a result. For U.S. investors, the results were slightly boosted compared to last year due to the depreciation of the USD against the Canadian Dollar. We expect FY2021 EPS of \$2.66, expecting improving sequential performance in the coming quarters.

## Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
<b>EPS</b>	(\$0.02)	\$0.94	\$1.54	\$1.57	\$0.76	\$1.06	\$0.78	\$1.71	\$2.14	\$2.31	<b>\$2.66</b>	<b>\$3.64</b>
<b>DPS</b>	\$0.51	\$0.52	\$0.49	\$0.49	\$0.48	\$0.55	\$0.65	\$0.67	\$0.77	\$0.88	<b>\$0.93</b>	<b>\$1.30</b>
<b>Shares<sup>3</sup></b>	1,786	1,812	1,836	1,857	1,962	1,973	1,978	1,983	1,958	1,941	<b>1,940</b>	<b>1,786</b>

Manulife Financial has produced a growing net income over the past few years, powered primarily by growth in premiums and annuity revenues, as well as higher interest and dividend income derived by its investments. We expect the company to keep growing its EPS, driven by double-digit growth in its insurance segment in key Asian markets such as Japan and Hong Kong. Manulife should also generate higher wealth management fees going forward, enjoying consistent net inflows that grow its assets under management. During the quarter, the company achieved net inflows of \$1.4 billion, which helped grow the segment's core EBITDA margin by 340 bps to 30.7%. Hence, we expect EPS growth of 6.5% in the medium term, being cautious of potential FX fluctuations that could sway this figure either way.

The company has grown its DPS annually since 2014 in its local TSX listing, though U.S.-based investors have been slightly affected by currency effects. We expect the dividend to keep growing by around 7% in the medium term, slightly

lower than the company's latest increase of 12%. The company has not increased the dividend this year so far, with the \$0.93 being boosted by the CAD/USD increase. The company has paid six consecutive C\$0.25 quarterly dividends.

## Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	---	12.8	10.7	13.0	22.4	12.9	22.1	10.5	8.4	7.4	7.6	7.5
Avg. Yld.	2.9%	4.3%	3.0%	2.4%	2.8%	4.0%	3.8%	3.7%	4.3%	5.2%	4.6%	4.8%

Manulife Financial shares have historically traded at a forward P/E in the high single to low single digits, in line with its industry peers. The stock's valuation is currently at decade-low levels. Despite the improving financials, we believe that the stock remains fairly valued, taking into account the underlying risks (such as interest rates). Hence, we expect a forward P/E of around 7.5 in the medium term. The company ended the quarter with a book value per share of around \$19.23, which is quite close to the stock's actual price. Investors should continue expecting a relatively rich yield, powered by the stock's well-covered dividend.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	---	55%	32%	31%	63%	52%	83%	39%	36%	38%	35%	36%

Manulife's dividend should be well covered by the underlying income, with the payout ratio currently at 35%. The company enjoys several qualities, such as great brand value due to its obsession with customer satisfaction, a clear long-term underwriting strategy that has shifted smoothly online, and a healthy financial leverage ratio, currently at 27.1%, close to the company's target of 25%. However, the company faces several risks. A 50 basis point increase in interest rates could affect the bottom line by around \$100 million. The insurance industry can also be quite competitive, with disruptive up-and-coming companies, such as Snowflake, threatening to capture market share. A recession could adversely affect the company, including deferred premiums, defaults of its debt investments, and lower investment income. A surge in claims amid unforeseen reasons could also negatively impact the company.

## Final Thoughts & Recommendation

Manulife Financials is a quality insurer with healthy financials and the potential to grow its earnings further moving forward. The stock offers an above-average yield, which along with reasonable growth metrics are likely to result in annualized total returns of around 10.3% in the medium term. However, U.S.-based investors should be wary of the possible FX fluctuations between the Canadian Dollar and USD, which could significantly affect the company's financials and metrics, and consequently, total returns. Shares earn a Buy rating.
