## Overview \& Current Events

Spire Inc. is a public utility holding company based in St. Louis, Missouri. The Company provides natural gas service through its regulated core utility operations while engaging in non-regulated activities that provide business opportunities. The Company was previously known as the Laclede Group, trading under the symbol LG. Laclede Gas Company was one of the first twelve industrial companies that made up the Dow Jones Industrial average. The Company was first listed on the NYSE on November 14, 1889. In 2009, The Company celebrated 120 years of trading on the exchange. In 2016, shareholders approved renaming the Company to Spire and trading on the NYSE under the new symbol SR. The Company has five gas utilities, serving 1.7 million homes and businesses across Alabama, Mississippi, and Missouri. This makes Spire the 5th largest publicly traded natural gas company in the country. The Company has a market cap of $\$ 3.75$ billion and generated $\$ 1,855$ million in sales in 2020 . Spire has been growing its dividends for 19 years.
On May 7, 2021, the Company reported its fiscal second-quarter for Fiscal Year (FY)2021. For the quarter, the Company generated $\$ 1,104.9$ million in sales, which is up $54.4 \%$ compared to the second quarter of $F Y 2020$. The increase in revenue year over year was driven by higher usage. For the first six months of FY2021, revenue is up $26.1 \%$. This was also driven by higher use compared to the six months of FY2020. For the three months, net income was $\$ 187.4$ million or $\$ 3.55$ per diluted share, up from $\$ 133.6$ million or $\$ 2.54$ per share a year ago. Net Economic Earnings (NEE) for the six months was $\$ 272.5$ million or $\$ 5.12$ per share, up from $\$ 215.8$ million or $\$ 4.06$ per share a year ago. The increase in NEE reflects higher Gas Marketing and Gas Utility earnings and lower other costs.
The management team is increasing its fiscal 2021 guidance to $\$ 4.30-\$ 4.50$ per share for the year. We will use $\$ 4.42$ for our fair value and total return calculations. The Company's long-term per share growth target is between 5-7\%, driven by the continuous and consistent growth of the company gas utilities.

Growth on a Per-Share Basis

Over the last ten years, Spire has grown Earnings per Share (EPS) at a Compound Annual Growth Rate (CAGR) of 3.4\%. However, over the past five years, EPS has grown by over 5.3\%. We expect Spire will grow earnings for the next five year at a CAGR of $5.5 \%$. This will give the Company a EPS of $\$ 5.78$ in 2026. Most of this growth will come from a growing customer base in the region and increasing utility fees. The dividend growth rate is in line with the Company's EPS growth rate. Over the past ten years, the Company has been paying a growing dividend rate of $4.9 \%$. We expect Spire to continue to grow its dividend at a slightly higher rate of $5 \%$ over the next five years.

| $\mathbf{3 . 6 \%}$ |  |  |  |  |  |  |  |  |  |  |  |

The Company has a current valuation of $16.8 x$ earnings, which is lower than its ten-year average of $17.7 x$ earnings. However, we think a fair PE of $16 x$ earnings is a good base case. Thus, this suggests that the Company has a $1.0 \%$ headwind. The current dividend yield is in line with the ten-year average of $3.5 \%$.

Safety, Quality, Competitive Advantage, \& Recession Resiliency

Spire's competitive advantage is its state-regulated utility business, which requires excessive capital expenses for infrastructure and poses high entry barriers to potential competitors in the area. During the Great Recession of 20082009, the Company grew earnings from $\$ 2.31$ in 2007 to $\$ 2.64$ in 2008 and $\$ 2.92$ in 2009. The dividend was well covered, and the Company increased its dividend by $2.7 \%$ in 2008 . This shows the dividend safety and the resilience of this Company. However, in 2010, earnings did drop by (14\%) to $\$ 2.52$ per share. The drop-in earnings did not affect the dividend that year has the Company had a dividend payout ratio of $62 \%$ and increased the dividend by $2.6 \%$ that year. The Company has a stable balance sheet with a debt to equity ratio of 1.4. Interest coverage increased to a better ratio of 3.0 than the 1.7 ratios at the end of FY2020. Spire's dividend payout ratio has been stable in the 60\% area. The dividend payout ratio aligns with where we would like to see it for utility companies like Spire.

## Final Thoughts \& Recommendation

The Company is a very safe company to invest in, as most utility companies are. However, at the current price, SR is slightly overvalued relative to our fair price estimate of \$71. There are not many growth prospects available to the Company currently. Thus, we see a 5 -year projected annual return of $7.6 \%$. Most of this return will come from the $3.5 \%$ dividend yield. We rate Spire as a Hold at the current price.
