Overview & Current Events

EastGroup Properties is an internally-managed equity real estate investment trust founded in 1969. The trust is a leading provider of multi-tenant distribution and logistics facilities primarily in Sunbelt markets such as in the states of Florida, Texas, Arizona, California, and North Carolina. Specifically, it owns 408 industrial properties and one office building in 11 states. The trust's property portfolio is currently 98.3% leased to over 1550 tenants, with no tenant accounting for more than 1% of its rental income. EastGroup generates nearly \$400 million in annual rental revenues and is headquartered in Ridgeland, Mississippi.

On April 27th, EastGroup reported its Q1 results for the quarter ended March 31st, 2021. Revenues came in at \$97.93 million, \$10.5 million higher year-over-year, with the trust achieving increased leasing activity, growing rental rates, while acquiring two new properties during the quarter.

FFO grew from \$51.1 million 12.7% higher to \$57.6 million, or by 10.6% on a per-share basis, to \$1.45 due to the additional shares issued to fund its acquisitions. To illustrate the trust's operational excellence, this marks 32 consecutive quarters of higher FFO/share as compared to the prior-year quarter, which is truly a long-term trend.

The trust continues to experience great demand for its industrial properties, recording average occupancy of 97%, up 20 basis points compared to Q1-2020, while collecting 99.5% of the rent. Management believes this is attributed to a healthy market that sees accelerating e-commerce and last-mile delivery trends boosted by COVID-19 and the work-from-home economy. Amid better than expected results, EastGroup's guidance was hiked, forecasting FFO/share in the range of \$1.42 to \$1.46 for Q2 and \$5.74 to \$5.84 for the year. We have utilized the higher-end of this range in our calculations following the trust's ever-customary tendency to deliver better results than its own estimates.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
FFO/shr	\$2.96	\$3.08	\$3.23	\$3.47	\$3.67	\$4.02	\$4.25	\$4.66	\$4.98	\$5.38	\$5.84	\$8.38
DPS	\$2.08	\$2.10	\$2.14	\$2.22	\$2.34	\$2.44	\$2.52	\$2.72	\$2.94	\$3.08	\$3.16	\$4.03
Shares²	26.9	28.6	30.2	31.3	32.1	32.6	34.0	35.4	37.4	39.2	39.4	50.0

As mentioned earlier, the trust's FFO/share growth track record is truly one of the most impressive amongst all REITs.

Besides achieving operational excellence, including maximizing its occupancy and benefiting from an ever-growing demand for distribution centers amid e-commerce's growth, the trust enjoys excellent demographic tailwinds.

Specifically, the trust's properties are located in 13 of 15 fastest-growing markets in the United States, while its two largest by income states, Texas (36% of rental income) and Florida (28% of rental income), are likely to see the fantastic rental growth ahead amid their overall net adds in populations and income-tax-free statuses. We don't see any catalysts for the trust's current growth course to materially slow down, and hence forecast FFO/share growth of 7.5% in the medium-term. This is also in line with the trust's FFO/share guidance in terms of YoY growth.

EastGroup Properties, Inc. (EGP)

Updated July 14th, 2021 by Nikolaos Sismanis

EastGroup also features one of the most impressive dividend growth track records amongst its industry peers, having hiked its dividend in 25 of the last 28 years. During the Great Financial Crisis, the REIT paused DPS growth for a few years, but the dividend has never been cut. We forecast DPS growth of 5% in the medium term, in line with the trust's latest increase of 5.3% and its 5-year average, which also stands at 5.3%

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/FFO	14.9	17.2	19.5	17.9	16.3	16.7	20.5	20.4	24.1	24.5	29.6	24.0
Avg. Yld.	4.7%	4.0%	3.4%	3.6%	3.9%	3.6%	2.9%	2.9%	2.5%	2.3%	1.8%	2.0%

EastGroup's valuation has historically hovered around 20 times the trust's underlying FFO. This multiple has significantly expanded over the past couple of years, currently standing at 29.4 despite us even utilizing the higher-end of the trust's outlook range. While we do appreciate the trust's qualities and can see why investors would keep pushing such a great trust higher during the current environment of low yields, we believe shares are currently overvalued. We assign a fair multiple of 24 in the medium-term, which better reflects the trust's growth trajectory.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	70%	68%	66%	64%	64%	61%	59%	58%	59%	57%	54%	48%

We consider EastGroup's dividend very safe. Not only are payouts widely covered, but amid slower hikes relative to the trust's FFO/share growth, coverage has even expanded over the past few years to just over 50% as of now. The trust showcases some of the highest quality characteristics amongst its peers. These include record occupancy rates, excellent rental growth prospects amid favorable demographics, and very cheap financing, including average cost of debt of just 2.48% and extremely low cost of additional share issuances amid the trust's overvaluation (a positive factor in that sense.) Finally, cash flows are greatly diversified, with the top 10 tenants only accounting for 7.9% of rents. The trust's advantageous industry of operations is also a great benefit in terms of driving its future growth. We believe the trust displays a great competitive advantage by specializing in the Sunbelt markets. Further, due to the critical nature of its distribution properties, cash flows should remain relatively resilient even under a recession. This was the case both during the Great Financial Crisis and the ongoing COVID-19 pandemic.

Final Thoughts & Recommendation

EastGroup is a truly great trust, having delivered excellent growth in its financials and capital returns. The trust is positioned to benefit from a favorable trading environment and its unique qualities, leading to robust FFO/share and DPS growth, as our estimates suggest. However, we believe that the stock has run ahead of itself regarding the current valuation, which we can see as a headwind in total shareholder returns. We forecast annualized returns of around 4.9% in the medium term. Shares earn a Sell rating at the moment.
