Overview & Current Events

Republic Services, Inc. is an industry leader and national provider of recycling and non-hazardous solid waste disposal, operating in 41 states. The company holds around 20% market share of the landfill volume in the United States and is only behind Waste Management, which holds around 26%. Moreover, by operating in an industry with increasing consolidation, its position should improve further. The trash-collection industry benefits from predictable cash flows because of its non-cyclical business model. As a result, Republic Services has been able to return capital to its shareholders consistently. The dividend has been growing for the past 17 years, as the company has never cut its distribution since its first one in 2004. The company generates around \$10 billion in annual revenues and is based in Phoenix, Arizona.

On July 29th, 2021, Republic Services reported its Q2 results for the period ended June 30th, 2021. For the quarter, adjusted EPS was \$1.09, 36% higher than Q2-2020, while revenues increased by 14.6% year-over-year to \$2.81 billion. Revenues were boosted by higher pricing and higher volumes, while profitability growth exceeded revenue growth due to lower financial costs and economies of scale. EBITDA margin once again expanded vs. the comparable period last year, by 110 basis points to 30.6%. In addition, the company again converted more of its customers' contracts (around 38%) to be tied to a waste-related index or a fixed-rate increase of 3% or more, locking in contractually locked rate increases. As a result of increased margins, rate charges, and a gradual resumption towards normality, management raised its FY2021's EPS guidance to \$4.00-\$4.05 (previously \$3.74-\$3.79) and its free cash flow guidance to \$1.45-\$1.475 billion. We have updated our estimates accordingly. The quarterly dividend was also increased for the 17th consecutive year by 8% to \$0.46, or an annualized rate of \$1.84.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$1.57	\$1.56	\$1.63	\$1.54	\$2.14	\$1.79	\$3.79	\$3.17	\$3.34	\$3.56	\$4.03	\$5.92
DPS	\$0.84	\$0.91	\$0.99	\$1.08	\$1.16	\$1.24	\$1.33	\$1.44	\$1.56	\$1.66	\$1.84	\$2.52
Shares¹	376	367	362	357	350	343	337	327	321	319	319	270

Republic Services' EPS CAGR has been around 9.5% over the past decade, while DPS CAGR has been about 8% over the same period. We retain our EPS growth estimate to 8%, sustained by the company's organic growth, contractually secured payment increases, and stock buybacks. The company bought back \$79.5 worth of its stock during Q2. The company's current repurchase program remains at \$1.9 billion and is to be completed through 2023. It represents around 5.1% of the company's current market cap. Hence EPS is likely to grow by ~3% annually at the current stock's price levels, from share repurchases alone. For context, since 2010, the company has retired more than 18% of the outstanding shares. Margins are expanding, more contracts are switching to annual rate increases, and Republic is constantly beating and raising its own estimates. EPS growth is likely to be faster through 2026, though we remain prudent. However, we raise our DPS growth estimates from 5% to 6.5% to reflect the DPS growth acceleration following the latest increase and Republic's overall higher affordability for future dividend hikes.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	17.6	15.2	22.5	18.1	21.16	25.0	27.14	16.57	26.8	30.2	28.5	26.0
Avg. Yld.	2.8%	3.3%	2.9%	2.7%	2.8%	3.0%	2.0%	2.0%	1.8%	1.8%	1.6%	1.6%

Over the past decade, investors must have been increasing their appreciation of Republic's stable and reliable cash flows, causing the stock to undergo a prolonged valuation expansion. Due to its robust guidance, the stock's forward P/E is currently hovering at a relatively pricy P/E of around 28.5, quite higher than its historical average. We continue to believe that a lower multiple around 26 is a fair one. Hence, we retain our valuations expectations. Republic is currently offering a 13-year low yield of just 1.6% due to the stock's valuation expansion. Investors should expect the yield to remain quite low.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	54%	58%	61%	70%	54%	69%	35%	45%	47%	47%	46%	43%

The company's large market share is clear evidence of its competitive advantage. With the three largest operators having captured more than 75% of the industry and continuous consolidation, entry into the market by new competitors is almost impossible. The long-term contracts tied to annual rate increases and Republic Services' robust customer base (which includes municipalities) allow it to operate in an extremely low volatility environment. Following debt repayments and Republic refinancing its notes at lower rates, the ongoing interest expenses declined during the quarter from \$91.8 million to \$78.4 million, while interest outflows are also covered by around 21 times the company's operating cash flows. Further, the dividend remains very well-covered, under 50% of Republic's EPS, despite the latest DPS increase. In FY2008, during the Great Financial Crisis, the company increased its revenues and also merged with Allied Waste Services to strengthen its market position. If another recession occurs, the company has enough cash to repeat such strategic acquisitions, continue its dividends, and even buy back more shares. In Q2, liquidity remained robust at about \$2.9 billion, suggesting heavy firepower is available to be deployed in future opportunities.

Final Thoughts & Recommendation

Republic Services appears to be a safe investment option considering its stability, robust cash flows, and consistent return of capital to shareholders. The company should shine in times of uncertainty and wild market swings, featuring its quality, low-volatility characteristics. We now expect annualized returns of around 7.5% in the medium term. While our growth estimates remain satisfactory, the company's compressed dividend yield and the possibility for a valuation reversion headwind weigh down on our expected returns. Shares earn a hold rating at their current price levels.
