Overview & Current Events

Raytheon Technologies (RTX) was created on April 3rd, 2020, after the completion of the merger between Raytheon (previous ticker: RTN) and United Technologies (previous ticker: UTX), following United Technologies' spin-offs of its Carrier (CARR) and Otis (OTIS) businesses. The combined business, trading with a \$132 billion market cap and headquartered in Waltham, MA, is one of the largest aerospace and defense companies in the world with \$57 billion in 2020 sales and a global team of 195,000 employees, including 60,000 engineers and scientists. The company has four segments: Collins Aerospace Systems, Pratt & Whitney, Raytheon Intelligence & Space and Raytheon Missiles & Defense.

On April 26th, 2021, Raytheon Technologies increased its quarterly dividend 7.4% to \$0.51.

On July 27th, 2021, Raytheon Technologies reported Q2 2021 results for the period ending June 30th, 2021. This marks the fifth quarter of reporting all four segments together as a combined business. For the quarter sales totaled \$15.88 billion, representing a 12.9% gain compared to Q2 2020. Results were up across the board, with Collins Aerospace, Pratt & Whitney, Intelligence & Space and Missiles & Defense posting sales gains of 8%, 23%, 12% and 14% respectively. Adjusted net income equaled \$1.565 billion or \$1.03 per share compared to \$583 million or \$0.39 per share in Q2 2020.

Raytheon Technologies backlog at the end of the quarter was \$151.8 billion (up from \$147.4 billion last quarter), of which \$85.7 billion was from commercial aerospace and \$66.1 billion was from defense.

Raytheon Technologies also updated its full year 2021 outlook, now anticipating sales of \$64.4 - \$65.4 billion (up from \$63.9 - \$65.4 billion) and adjusted earnings-per-share of \$3.85 - \$4.00 (up from \$3.50 - \$3.70 prior).

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$5.49	\$5.34	\$6.21	\$6.82	\$6.29	\$6.61	\$6.60	\$7.61	\$8.26	\$2.73	\$3.90	\$5.47
DPS	\$1.87	\$2.03	\$2.20	\$2.36	\$2.56	\$2.62	\$2.72	\$2.84	\$2.94	\$2.16	\$2.04	\$2.86
Shares¹	907	919	917	909	838	809	799	861	864	1,515	1,510	1,490

Note that we have elected to show United Technologies' history through 2019, as ~57% of the new business is now owned by legacy UTX shareholders. However, the company is much different today with the merger and spin-offs. With that being said, both United Technologies and Raytheon have put together solid operating records. In the last decade United Technologies grew earnings-per-share by an average rate of 7.2%, while increasing its dividend for over 25 years. Meanwhile, Raytheon grew earnings-per-share by 9.3% annually while increasing its dividend for 15 consecutive years. Moving forward we anticipate solid growth to continue, forecasting 7% growth over the intermediate term. This takes into account the strong history of the underlying operating businesses, along with the idea of growth becoming more difficult given the size of the business along with the recent uncertainty related to the worldwide COVID-19 pandemic.

¹ In millions.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	14.6	14.7	16	16.4	17.0	15.3	17.7	16.8	16.1	22.0	22.4	16.0
Avg. Yld.	2.3%	2.6%	2.2%	2.1%	2.4%	2.6%	2.3%	2.2%	2.2%	3.6%	2.3%	3.3%

Once again note that we are using the history of United Technologies, which has traded with an average P/E ratio of about 16 times earnings over the past decade. We believe this is a fair starting multiple, considering the quality and growth prospects of the firm. With shares trading at 22 times estimated earnings, this implies a material valuation headwind.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	34%	38%	35%	35%	41%	40%	41%	37%	36%	79%	52%	52%

Both United Technologies and Raytheon showed tremendous resiliency during the last recession, with UTX posting \$4.90, \$4.12, \$4.74 and \$5.49 in earnings-per-share during the 2008 through 2011 timeframe, while Raytheon increased earnings every year during the recession. Moreover, both companies kept increasing their dividends during this period.

As of Q1 2021 Raytheon Technologies held \$8.1 billion in cash, \$40.9 billion in current assets and \$158.8 billion in total assets against \$34.8 billion in current liabilities and \$86.1 billion in total liabilities. Long-term debt stood at \$29.9 billion.

Final Thoughts & Recommendation

After being up 20% and 22% in our last two reports, shares are up another 5% in the last three months. There is uncertainty surrounding the new RTX, related to how the merged company will operate along with the global pandemic. We are enthused on a number of fronts, including the storied histories of the companies, the resilient businesses and tremendous backlog. However, the valuation leaves something to be desired in our view. We are forecasting 2.7% annual return potential stemming from 7% growth and a 2.3% dividend yield offset by the potential for a meaningful valuation headwind. Shares earn a hold rating.
