Overview & Current Events

SBA Communications Corporation a leading independent owner and operator of wireless communications infrastructure, primarily including tower structures that support antennas used for wireless communications. The company owns 33,711 towers which it leases to multiple wireless telecom providers. SBA also owns a site development business, through which it assists telecom providers in developing and maintaining their own wireless service networks. The company generates over \$2 billion in annual revenues and is headquartered in Boca Raton, Florida.

On April 26th, SBA Communications reported its Q1 results for the quarter ended March 31st, 2021. The company achieved record revenues of \$548.7 million, 6.1% higher year-over-year, powered by a larger portfolio of towers and higher leasing activity. The company executed new master agreements with Verizon and Dish, becoming a key partner in deploying their new C-Band spectrum for the build-out of their nationwide 5G network. The contracts also extended the committed terms under SBA's existing lease agreements. Consequently, AFFO came in at \$286.3 million, 10.2% higher YoY. The more significant increase compared to revenues is attributed to operational efficiencies, including lower per-unit costs (growing margins) as the company achieves growing economies of scale. On a per-share basis, AFFO grew by 13.2% to \$2.58 due to the company repurchasing 0.7 million shares for \$168.9 million during the period.

According to management, the strong demand for the company's towers amid telecom providers' 5G rollout has resulted in "tremendous confidence in increased organic leasing growth over the next couple of years". Hence, the company hiked its FY2021 outlook, expecting total revenues of \$2.22 billion to \$2.26 billion and AFFO/share of \$10.15-\$10.57. Accordingly, we have used the midpoint of \$10.36 in our calculations.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
AFFO/shr²	\$2.36	\$3.09	\$4.10	\$5.23	\$5.69	\$5.95	\$6.95	\$7.60	\$8.48	\$9.43	\$10.36	\$16.68
DPS	---	---	---	---	---	---	---	---	\$0.74	\$1.86	\$2.32	\$5.77
Shares³	111.6	120.3	127.8	128.9	127.8	124.4	119.9	114.9	112.8	111.5	110.9	100.0

SBA Communications displays an excellent record of AFFO/share growth powered by continuous development and acquisitions of new towers, increased leasing activity, and rate hikes (typically in the range of 3-4% per year). Additionally, the company maximizes its tower capacity by accommodating multiple tenants per tower structure without incurring additional costs just by placing additional antennas. SBA currently accommodates around 2 tenants per tower, with the capacity for more to be added going forward.

As a result, we forecast AAFO/share of 10% in the medium-term, powered by the aforementioned drivers, as well as stock buybacks, which are rare for REITs, and showcase the company's ability to self-fund its future growth without diluting shareholders.

¹ Estimated dates based on past dividend dates

² The metric is used due to real estate-related depreciation, amortization, and accretion as well as other meaningful adjustments.

³ Share count is in millions.

SBA Communications Corporation (SBAC)

Updated July 4th, 2021 by Nikolaos Sismanis

Despite its REIT status, due to SBA reporting losses amid reinvesting the majority of its gross profits over the past decade, the company was not required to pay dividends. Dividend payments were initiated only recently and are growing rapidly amid starting out from humble levels. The previous two quarterly hikes were 25.6% and 25%, respectively, with ample room for further growth. We forecast DPS growth of around 20% in the medium-term, as the company gradually pays out a larger chunk of its bottom line to shareholders.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	16.1	22.0	19.5	17.2	20.7	16.6	20.1	20.4	26.5	31.8	31.1	23.0
Avg. Yld.	---	---	---	---	---	---	---	---	0.3%	0.6%	0.7%	1.5%

SBA Communications has historically traded at around 20 times its underlying AFFO, though amid increasing growth prospects, 5G's rollout, and economies of scale expanding its profitability potential, the multiple has materially increased to around 31x. While we share the market's excitement to SBA's growth potential, we believe shares are overvalued and forecast a fair multiple of around 23X AFFO. Also, due to the company's humble dividend payments and expanded valuation, the stock's yield is and should be expected to remain only a token despite its rapid growth.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	---	---	---	---	---	---	---	---	9%	20%	22%	35%

We consider SBA's dividend quite safe, widely covered by the underlying AFFO. The company enjoys several qualities, including a highly scalable business model, credit-worthy tenant base of telecom majors, contractually secured and predictable revenues, and a clear runway for gradual growth ahead. The company also enjoys a distinct competitive advantage along with the handful of other tower REITs which have formed an oligopoly in the space, which has become quite expensive to penetrate into. Unlike traditional real estate properties, whose tenants may struggle to pay rent upon a potential recession, telecom companies enjoy extremely resilient revenues, while the essential and mission-critical nature of telecommunication ensures no adverse impact on SBA's performance. This was proven both during the Great Financial Crisis and the COVID-19 pandemic when revenues kept on growing during both periods.

Final Thoughts & Recommendation

SBA has produced great returns to its shareholders over the past decade, powered by consistent growth in financials. The recent dividend initiation, while tiny, should gradually increasingly contribute to total returns. Our growth forecasts remain strong, and the company enjoys unique qualities. Still, we consider shares significantly overvalued, which could materially pressure future total returns. We forecast annualized returns of around 4.7% in the medium term. Hence SBA Communications earns a hold rating at the moment.
