Overview & Current Events

UBS Group's roots go back to the mid-19th century through many different financial institutions. In 1998, two of the three largest banks in Switzerland, Union Bank of Switzerland and Swiss Bank Corporation (SBC), merged to form UBS Group. A few years later, in 2000, the bank acquired PaineWebber, a U.S. brokerage and asset management firm, to establish a presence in the U.S. market. The primary goal of UBS is to provide financial services to private, corporate and institutional clients. The bank has a market cap of $52.9 billion and offers investment, retail, corporate and institutional banking, in addition to wealth management planning and asset management services.

In mid-July, UBS reported (7/20/21) financial results for the second quarter of fiscal 2021. Thanks to improved market sentiment and favorable market conditions, UBS grew its assets under management by 4% sequentially, to $4.4 trillion. The global wealth management segment, which generated 50% of the total earnings of the bank, grew its pre-tax profit 47% over last year's quarter thanks to high levels of client activity in all regions. Recurring net fee income grew 30% thanks to higher fee-generating assets. UBS enjoyed strong activity in all its segments and thus grew its net income 63% over last year's quarter.

UBS is facing a headwind due to the pandemic, but the bank has begun to recover. Moreover, the rally of the stock market to new all-time highs results in higher recurring fees in asset management. In addition, UBS greatly benefits from the unprecedented fiscal stimulus packages offered by most governments in response to the pandemic.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Book/S	$15.20	$13.40	$14.30	$14.00	$14.80	$14.20	$14.10	$14.40	$15.07	$16.76	***$17.50***	***$19.32***
DPS	$0.10	$0.14	$0.22	$0.58	$0.77	$0.59	$0.67	$0.71	$0.69	$0.73	***$0.37***	***$0.45***
Shares[2]	3,747	3,747	3,768	3,629	3,751	3,712	3,721	3,821	3,745	3,713	***3,650***	***3,600***

UBS Group had a terrific 2018, as it grew its earnings-per-share from $0.28 in 2017 to $1.18, but growth stalled in 2019. Moreover, UBS has a poor and inconsistent earnings growth record. We have thus used book value per share as its primary growth metric, as it shows how the company has been able to acquire new assets and revenue while it has also issued new shares. Unfortunately, UBS has grown its book value per share at a dismal 1% average annual rate since 2011, with a remarkably volatile performance record. We assume only 2% annual growth of book value per share over the next five years off this year's expected record level.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/B	---	---	---	1.25	1.35	1.01	1.15	1.15	0.80	0.70	***0.86***	***0.90***
Avg. Yld.	0.9%	0.0%	0.0%	2.9%	2.5%	0.0%	3.3%	5.3%	5.7%	6.2%	***2.5%***	***2.6%***

UBS failed to post a meaningful profit during the 2009-2013 period. In the last seven years, the stock has traded at an average price-to-book value ratio of 1.06. The stock is now trading at a P/B ratio of 0.86. Given the volatile performance record of UBS and some credit losses expected from the pandemic, we assume a fair price-to-book value ratio of 0.90 for the stock. If the stock trades at our fair value estimate in five years, it will enjoy a 1.0% annualized gain in its returns during this period.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	9%	52%	92%	52%	51%	70%	230%	57%	61%	43%	***27%***	***30%***

UBS currently offers a 2.5% dividend yield. This yield may entice some investors, particularly given the healthy payout ratio of 27% this year. However, it is important to remember that the bank posted sizeable losses during the Great Recession. In the recession caused by the pandemic last year, UBS performed much better but its volatile performance record raises concerns. We believe that this bank is not suitable for income-oriented investors due to its volatile performance and its vulnerability to recessions.

Final Thoughts & Recommendation

UBS has posted decent results in the last two years. In addition, the pandemic could subside in the second half of this year thanks to the massive vaccination program underway. As a result, the stock of UBS has nearly doubled off its bottom last year. Due to its steep rally, UBS has become less attractive and we expect it to offer just a 5.4% average annual return over the next five years. We thus rate it as a hold. With that said, we caution investors that this security is likely to perform poorly during a severe recession as evidenced by its weak performance over the Great Recession, when earnings collapsed, and the dividend was cut. Moreover, its volatile earnings record is a great concern to us.
