Overview & Current Events

Artisan Partners Asset Management Inc. is a global investment management firm that provides a broad range of high value asset investment strategies across several asset classes. Artisan executed its initial public offering on March 1st, 2013. The company has been a very shareholder-friendly allocator of capital since then, paying special dividends of \$0.95 per share in 2015, \$0.40 per share in 2016, \$0.36 per share in 2017, \$0.79 per share in 2018, \$1.03 in 2019, and \$0.31 in 2020, in addition to its ample quarterly dividend. Artisan generates \$1.2 billion in annual revenue and trades with a market capitalization of \$4.1 billion.

Artisan reported second quarter earnings on August 3rd, 2021, and results came in better than expectations on both the top and bottom lines. Assets under management ended the quarter at \$175 billion, up sharply from \$121 billion in the same period a year ago, which was during the initial selloff from the pandemic. Sharp market appreciation since then has helped Artisan and others boost their AUM. Revenue came to \$305 million, up from \$203 million in the year-ago period, and operating income nearly doubled. That metric grew from \$77 million to \$138 million year-over-year, as the company's higher revenue also produced strong operating leverage, as is customary with asset managers. Operating margins rose from 37.8% of revenue to 45.2% year-over-year, producing the enormous gain in operating profits.

Adjusted earnings-per-share also nearly doubled, rising from 71 cents to \$1.28, and given the outstanding results in Q2, we raised our estimate for this year once again, this time to \$5.10. Artisan declared its variable dividend, this time at \$1 per share, and we've boosted our estimate of dividends to \$4 per share for this year.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	---	---	\$2.54	\$3.17	\$2.69	\$2.13	\$2.41	\$2.94	\$2.67	\$3.30	\$5.10	\$6.51
DPS	---	---	\$0.86	\$2.25	\$2.40	\$2.40	\$2.40	\$2.40	\$2.36	\$2.79	\$4.00	\$4.64
Shares¹	---	---	20	34	39	42	51	54	56	63	66	75

Artisan has failed to generate meaningful per-share growth since its initial public offering, due largely to a ballooning share count. Because of this, we are hesitant to expect significant growth from the firm moving forward. Our 5-year earnings-per-share growth estimate for Artisan is 5%. Artisan's 2018 performance was quite strong against 2017 but given lower assets under management and operating margins that moved unfavorably, 2019 earnings-per-share were more in line with 2017 than 2018. We had anticipated weakness in 2020, but Artisan performed much better than expected and indeed, earnings soared thanks to a rising market. We expect this to continue in 2021 barring a major selloff in the equity markets as operating margins remain quite elevated, as confirmed by Q2 results.

Income investors should note that the dividend figures listed in the above table exclude the numerous special dividends paid by the company since its IPO in 2013. Artisan pays a regular quarterly dividend, but it also pays out significant special dividends annually. The company's policy is to pay out 80% of the cash the company generates. At the end of the year, the board considers several factors, and determines a variable special dividend. The special dividend in 2020 was \$0.31, which is much smaller than it has been in past years, but the total dividends paid were still \$3+ per share.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	---	---	20.0	17.7	16.1	13.7	13.0	10.9	10.2	10.6	10.0	12.0
Avg. Yld.	---	---	---	4.2%	5.4%	8.3%	7.7%	7.5%	8.9%	8.0%	7.8%	5.9%

Like many firms, Artisan traded at elevated levels for some time following its initial public offering. Because of this, we do not believe that the company's historical valuation multiples are indicative of its fair value. Instead, we believe that a fair value for Artisan lies somewhere around 12 times earnings. The company is trading at a price-to-earnings ratio of 10 today. With the \$4 annual dividend, the stock is yielding 7.8%, excluding any special dividend received this year. We also note that because of Artisan's unusual policy of paying out most of its earnings on a variable basis, we could potentially see higher dividend payments this year than currently forecast if equity markets perform well.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	---	---	34%	71%	89%	113%	100%	82%	89%	85%	78%	71%

Artisan's payout ratio is back to nearly 80% of earnings at current projections, but investors should keep in mind that Artisan pays special dividends at the end of the year, and that its quarterly dividend policy is variable. Thus, how the payout ratio performs depends significantly upon how much earnings the company can generate.

Artisan wasn't public during the Great Recession, but we expect the damage to earnings could be meaningful during a prolonged recession that brings with it lower equity prices. Artisan is a highly cyclical company, so investors looking for safety and defensiveness would look elsewhere. Adding to this risk, Artisan's competitive advantage of its well-performing funds hasn't resonated with customers. We do note that Artisan performed extremely well in 2020, and 2021 is off to a great start.

Final Thoughts & Recommendation

Artisan can be seen as a leveraged play on the equity markets. When markets are rising, the company will benefit from ballooning AUM due to market returns and stronger client inflows, as we saw in 2020. Conversely, the company will likely perform very poorly during a bear market, as it did at the end of 2018. With recent price action in the stock, as well as earnings estimates, we are moving Artisan from hold to buy.
