Overview & Current Events

Algonquin Power & Utilities Corp. trades on both the Toronto Stock Exchange and New York Stock Exchange under the ticker, AQN. The renewable power and utility company was founded in 1988. All the figures in this report are in U.S. dollars unless otherwise noted.

The company has increased its dividend every year since 2011. It has two business segments: regulated utilities (natural gas, electric, and water) and non-regulated renewable energy (wind, solar, hydro, and thermal). Combined, its entire portfolio has 4 GW of generating capacity that it aims to achieve 75% renewable energy generation by 2023. Algonquin serves more than 1 million connections primarily in the U.S. and Canada. It also has renewable and clean energy facilities that are largely (about 93%) under long-term contracts with inflation escalations.

Algonquin reported its Q2 2021 results on 08/12/21. For the quarter, revenue rose 54% to \$527.5 million, adjusted net earnings climbed 93% to \$91.7 million, adjusted earnings-per-share (“EPS”) climbed 67% to \$0.15, and adjusted EBITDA, a cash flow proxy, increased by 39% to \$244.9 million, against Q2 2020.

In the first half of the year (“H1”), Algonquin invested ~\$3.1 billion – roughly 50/50 into regulated utilities and its renewables portfolio. For example, it acquired 3 wind facilities for its regulated portfolio, and it’s constructing about 400-MW worth of projects for its renewable portfolio. We’re maintaining our \$0.74 2021 EPS estimate.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$0.23	\$0.14	\$0.26	\$0.37	\$0.46	\$0.42	\$0.57	\$0.66	\$0.63	\$0.64	\$0.74	\$1.01
DPS	\$0.27	\$0.29	\$0.33	\$0.37	\$0.49	\$0.55	\$0.60	\$0.51	\$0.55	\$0.61	\$0.68	\$0.89
Shares¹	136	189	207	238	256	274	432	489	526	599	629	802

Investors should note that Algonquin previously paid Canadian dollar-denominated dividends and started paying a U.S. dollar-denominated dividend in 2014. It also began reporting in U.S. dollars in 2018. So, in the table above, the EPS from 2010 to 2017 are in Canadian dollars. To match the dividends with the earnings, the dividend-per-share is also displayed in Canadian dollars from 2010 to 2017. From 2018 and onwards, the data is in U.S. dollars. Historically, Algonquin’s EPS has been volatile. However, they have become more stable in the past few years, as the company has increased its scale with a more diversified asset base that is largely regulated utilities with predictable returns or renewable facilities with long-term contracts that generate stable cash flow. Specifically, its 2015 to 2020 EPS growth rate was 14.2% based on USD. It’s common for Algonquin to use equity as a source of capital to make acquisitions – its share count is more than four times what it was from about 10 years ago. Going forward, it’s likely to issue new shares for growth, which is fine as long as the company’s EPS, DPS, and its stock’s long-term upward trend remains intact. The company’s five-year capital program through 2025 consists of \$9.4 billion of investments across its businesses, including \$6.3 billion in regulated opportunities and \$3.1 billion of investments for its renewable energy segment. AQN’s H1 2021’s investments of \$3.1 billion are keeping on track with its five-year program. 3.4 GW of potential greenfield opportunities could provide greater growth. We forecast an EPS growth rate of 6.5% through 2026.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	24.9	47.4	27.3	22.9	22.4	27.5	22.3	15.7	19.0	22.5	21.1	18.0
Avg. Yld.	4.7%	4.4%	4.6%	4.4%	4.8%	4.8%	4.7%	4.9%	4.6%	4.2%	4.4%	4.9%

Taking out the outlier in 2012, from 2011 to 2020, the average price-to-earnings ratio was 22.7 and the average yield was 4.2%. Algonquin is a very different and much larger company versus a decade ago. We think a reasonable price-to-earnings of 18 makes sense for its long-term growth rate of 6.5%. The stock appears to be overvalued here. We don't think Algonquin's yield would stray far away from the 4-5% range.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	117%	207%	127%	100%	107%	131%	105%	77%	87%	95%	90%	88%

Algonquin cut its dividend during the previous recession as earnings fell drastically. Most of the decade displayed payout ratios that were extended. That said, its earnings have been much more stable so far through the pandemic thanks to most of its operations being either regulated or having long-term contracts. After aligning the company's U.S. dollar reporting to its U.S. dollar-denominated dividend, its payout ratio has been more telling since 2018. Going forward, it'd be more prudent for the company to further lower its payout ratio by growing its dividend at a slower pace than its earnings growth. Therefore, we estimate a 6% dividend growth rate versus an estimated EPS growth rate of 6.5%. Algonquin is awarded an investment-grade S&P credit rating of BBB.

Final Thoughts & Recommendation

Algonquin is a higher-risk utility due to its higher payout ratio but offers above-average growth in the space. The stock is overvalued. Over the next five years, we estimate total returns of 7.3%, coming from a yield of 4.4%, a decline of -3.1% from P/E contraction, and earnings growth of 6.5% per year. We rate the stock as a hold.
