Overview & Current Events

Atmos Energy can trace its beginnings all the way back to 1906 when it was formed in Texas. Since that time, it has grown both organically and through mergers to a \$13.2 billion market capitalization. The company distributes and stores natural gas in eight states, serves over 3 million customers, and should generate about \$3.3 billion in revenue this year. Atmos has a 37-year history of raising dividends, putting it in rare company among dividend stocks.

Atmos reported third quarter earnings on August 4th, 2021, and results were better than expected on both the top and bottom lines. The company reported earnings-per-share for Q3 of 78 cents, and for the first nine months of the year, \$4.77 in earnings-per-share. Net income for Q3 was \$102 million, and for the nine months, \$617 million.

Consolidated operating income was down \$5.6 million in Q3 to \$133 million, which was off slightly from \$139 million in the year-ago period. Rate case outcomes in both of the company's operating segments were more than offset by increased depreciation and property tax expenses, the timing of maintenance costs, and increased bad debt expenses in both of the company's segments.

Distribution operating income was up \$5.6 million to \$68 million, from \$63 million a year ago. The increase was due to a \$25 million gain from rates, a \$9 million gain from weather and consumption, and a \$13 million offsetting decline from bad debt expense, among other factors.

Pipeline and storage operating income was down \$11 million to \$65 million. The decline was primarily due to a \$14 million increase in rates that was offset by a \$10 million decline from the refund of excess deferred income taxes to customers, an \$8 million increase in system maintenance, and other smaller factors.

The company said it expects earnings-per-share to be at the high end of its prior guidance range, and we've boosted our estimate accordingly, adding a nickel to \$5.10.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$2.26	\$2.10	\$2.50	\$2.96	\$3.09	\$3.38	\$3.60	\$4.00	\$4.35	\$4.69	\$5.10	\$6.82
DPS	\$1.36	\$1.38	\$1.40	\$1.48	\$1.56	\$1.68	\$1.80	\$1.94	\$2.34	\$2.34	\$2.50	\$3.67
Shares¹	90	90	90	91	100	101	104	106	117	123	127	140

Atmos' earnings-per-share has risen steadily in the past decade as the company continues to grow both organically and through acquisitions. We are forecasting a five-year annual growth rate of 6% moving forward.

The company can achieve this growth through continued improvements in gross margin, reductions in operating costs as a percentage of revenue, and top line growth via acquisitions as well as customer growth. Along with margin improvements, Atmos should be able to produce mid-to-upper single-digit earnings-per-share growth annually. It continues to file favorable rate cases with its various localities that provide for small revenue increases over time as well, as we saw again in 2020 full-year results, and indeed in year-to-date 2021 results. The distribution segment continues to lead the way while pipeline and storage struggles.

Atmos Energy Corp. (ATO)

Updated August 19th, 2021, by Josh Arnold

We are forecasting similar growth for the dividend as years of weak dividend growth have given way to a management team that is more willing to boost the payout. The company's payout ratio is much lower than it has been in the past and thus a dividend growth rate congruent with earnings-per-share growth, or slightly higher, looks reasonable given recent history. Indeed, the most recent dividend increase for 2021 was 8.7%. We see the dividend rising to \$3.67 over the next five years.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	14.4	15.9	15.9	16.1	17.5	20.8	22.0	21.8	23.5	22.4	19.4	19.0
Avg. Yld.	4.2%	4.1%	3.5%	3.1%	2.9%	2.4%	2.3%	2.2%	2.0%	2.2%	2.5%	2.8%

Atmos, like many other utilities and dividend stocks in general, has seen a sizable increase in its valuation in recent years. Shares have pulled back slightly since our last update and stand at 19.4 times this year's earnings. Thus, we are forecasting a very small headwind to total returns based upon a return to a more normalized valuation level of a price-to-earnings ratio of 19. Given this, we see the yield rising from 2.5% to 2.8% over the next five years.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	62%	65%	56%	50%	51%	50%	50%	49%	48%	50%	49%	54%

Atmos' payout ratio has drifted lower in recent years as dividend increases have been a lower priority than other spending. We expect the payout ratio to remain around 50%, where it is today, as dividend increases roughly match the growth rate of earnings in the coming years. Atmos' dividend is safe and with the 2.5% yield, we see the payout as attractive compared to the broader market.

The company's competitive advantage is in its wide distribution area and lack of direct competition in its service areas for residential and commercial customers. In addition, discretionary use of natural gas is low as people use what they need, regardless of economic conditions, meaning Atmos' recession performance is likely to be resilient, as seen in 2020.

Final Thoughts & Recommendation

Atmos has strong fundamentals and a long track record of solid performance, and the valuation has moderated of late. We are forecasting total annual returns of 8%, consisting of the current 2.5% yield, 6% earnings-per-share growth and a small potential headwind from the valuation. Given this, we're reiterating the stock at a hold rating.
