Overview & Current Events

Chubb Ltd is a global provider of insurance and reinsurance services headquartered in Zurich, Switzerland. The company provides insurance services including property & casualty insurance, accident & health insurance, life insurance, and reinsurance. The current version of Chubb was created in 2016, when Ace Limited acquired the 'old' Chubb and adopted its name. American investors can initiate an ownership position in Chubb through shares listed on the New York Stock Exchange, where they are traded with the ticker symbol CB.

Chubb reported its second quarter earnings results on July 27. The company reported that its revenues totaled \$8.9 billion during the quarter, which was 15% more than the revenues that Chubb generated during the previous year's quarter. Net written premiums were up 16% year-over-year in Chubb's P&C segment, despite some headwinds for the consumer business. Chubb was able to generate net investment income of \$950 million during the quarter, which was up 10% from the previous year's quarter, and which set a new record high.

Chubb generated earnings-per-share of \$3.62 during the second quarter, which was easily ahead of what the analyst community had forecasted. Chubb's strong profitability during the quarter can be explained by a very healthy combined ratio, despite some natural catastrophes that impacted Chubb's catastrophe losses. It is expected that, thanks to some premium growth and tailwinds from declining catastrophe losses, Chubb's profits will be strong in H2 this year as well, which should help the company in generating new record profits compared to the last decade. Chubb's book value was up considerably during the period, ending the quarter at \$136.90.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$6.96	\$7.66	\$9.34	\$9.80	\$9.77	\$10.11	\$8.02	\$9.45	\$10.11	\$7.31	\$12.40	\$15.83
BVPS	\$74.1	\$81.5	\$85.6	\$90.0	\$89.8	\$103.6	\$110.3	\$109.6	\$122.4	\$131.9	\$142.0	\$181.2
DPS	\$1.50	\$1.94	\$2.14	\$2.56	\$2.64	\$2.72	\$2.80	\$2.90	\$3.00	\$3.09	\$3.20	\$4.18
Shares²	331	338	337	329	325	466	464	463	456	453	450	440

Chubb does not have a very strong earnings growth track record. The company's earnings-per-share in fiscal 2019 were just ~20% higher than the equivalent figure in 2009, which equates to an earnings-per-share growth rate of just 1-2% annually. Chubb's company-wide net profits rose at a higher pace, but the company's share count rose considerably throughout the last decade, which offset most of the business growth that Chubb generated during that time.

We believe that the more important metric to pay attention to is the company's book value per share (BVPS), due to the cyclicity of the insurance industry. Chubb has compounded its book value per share at more than 7% per year since 2009. Looking ahead, we believe that a 5% growth rate in per-share book value is feasible for Chubb. In 2018 Chubb's book value per share declined due to mark-to-market losses, but book value started to rise again in 2019 and hit a new record level in 2020, despite the pandemic. Further growth is expected during the current year.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	9.3	9.5	9.8	10.6	11.2	12.2	17.7	13.7	15.4	15.4	13.8	12.0
Avg. P/B	0.88	0.92	1.07	1.15	1.22	1.19	1.29	1.17	1.27	1.17	1.20	1.05
Avg. Yld.	2.3%	2.6%	2.3%	2.5%	2.4%	2.2%	2.0%	2.3%	1.9%	2.0%	1.9%	2.2%

After Chubb's valuation declined from the peak level that it had reached during 2017, shares became less expensive in recent years. In 2020, Chubb's shares sold off, but they have recovered meaningfully from the lows. Chubb's share price is now back at pre-crisis levels, and Chubb's price-to-book multiple has risen above what we deem fair value. We think that multiple compression could result in moderate total return headwinds going forward.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	21.6%	25.3%	22.9%	26.1%	27.0%	26.9%	34.9%	30.7%	29.7%	42.3%	25.8%	26.4%

Chubb's profits can vary from year to year, depending on the catastrophe losses and the performance of Chubb's investments during that individual year. The company nevertheless was easily able to cover its dividend payments with its net profits during each year of the last decade. The dividend payout ratio, which is less than 30% based on our estimates for fiscal 2021, leaves a lot of room for future dividend increases.

Chubb remained highly profitable during the last financial crisis, unlike many other financial companies. The company also had a relatively stable, non-volatile stock price in the past. Chubb thus may appeal to risk-averse investors who want to avoid dividend cuts and minimize the price volatility of their investment portfolios. Chubb's size and scale grew considerably thanks to the combination with ACE in 2016, which provides for scale advantages over smaller competitors.

Final Thoughts & Recommendation

Chubb has not delivered a lot of earnings growth in the past, but thanks to consistent profitability, even during the last financial crisis, its book value rose meaningfully, and should continue to rise in the long run. Chubb is a lower-risk stock, and the company was able to weather the current coronavirus crisis without too much harm – in fact, book value rose to a new record level in 2020. Shares thus appeal to income investors looking for a reduced-risk investment. The total return outlook is not great, however, which is why we rate Chubb's stock a sell at the current price.
