Overview & Current Events

DTE Energy was founded in 1849, as City of Detroit Gas. Since then, the company has changed its name multiple times and has grown significantly. It operates all around the United States, with the majority of its business being conducted in Michigan. Now that DTE Energy has spun off its midstream segment, it operates under four reportable segments: Electric, Gas, Power & Industrial Projects, and Energy Trading. Its Electric and Gas segments are state-regulated utilities which contribute 70% of total net income. The large percentage of income coming from regulated utilities gives the company reliable growth and supports the dividend. DTE Energy has a market capitalization of \$23.4 billion.

In late July, DTE Energy reported (7/27/21) financial results for the second quarter of fiscal 2021. Operating earnings-per-share grew 11%, from \$1.53 to \$1.70, primarily thanks to the strong performance of the regulated divisions of Electric and Gas. Both segments benefited from warmer weather in this year's quarter while the former also benefited from rate hikes. Thanks to solid results, management raised its guidance for annual earnings-per-share from \$5.36-\$5.66 to \$5.62-\$5.92. Given management's tendency to issue conservative guidance, we expect earnings-per-share of \$6.00.

On July 1st, 2021, DTE Energy completed the previously announced spin-off of its midstream business, which includes non-utility natural gas pipeline, storage and gathering operations. The spin-off has rendered DTE Energy a pure play regulated electric and natural gas utility. Due to the spin-off, the expected earnings-per-share of \$6.00 is lower than our previous forecast of \$7.20 and the new quarterly dividend of \$0.825 is lower than the previous level of \$1.085, but the total dividend (including DTM's dividend) is not lower than the previous dividend.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$3.67	\$3.88	\$3.76	\$5.10	\$4.44	\$4.83	\$5.73	\$6.17	\$6.31	\$7.19	\$6.00	\$7.66
DPS	\$2.32	\$2.42	\$2.59	\$2.69	\$2.84	\$3.06	\$3.36	\$3.60	\$3.78	\$4.05	\$3.82	\$4.21
Shares²	169.3	172.4	177.1	177.0	179.5	179.4	179.4	181.0	185.0	196.0	194.0	210.0

DTE Energy plans to invest \$18 billion in growth projects over the next five years. As this amount is nearly equal to the market cap of the stock, it is evident that the company is heavily investing in its growth.

Moving forward, DTE has been taking steps to produce cleaner energy, which is where the utility industry is generally headed in the foreseeable future. The company's goal is to have over half of its energy produced coming from renewable sources by 2030. DTE Energy has announced plans to replace its coal fleet with renewable options. The company's renewable investments have already started paying off; in 2019, Ford and GE's Michigan subsidiaries decided to power their facilities with DTE's wind power generation.

We expect 5% average annual earnings-per-share growth over the next five years thanks to heavy investment in the regulated segments and renewable energy sales growth. This growth rate is at the low end of the guidance for 5%-7% growth over the next five years but we prefer to be on the safe side.

¹ Forward dividend yield.

² In millions.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	13.5	14.9	17.9	14.9	18.1	19.0	18.6	17.4	19.9	16.1	20.2	17.0
Avg. Yld.	4.7%	4.2%	3.8%	3.5%	3.5%	3.3%	3.2%	3.3%	3.0%	3.5%	2.7%	3.2%

DTE Energy has traded at elevated earnings multiples in recent years. The stock is currently trading at a price-to-earnings ratio of 20.2, which is higher than its 10-year historical average of 17.0. If the stock trades at its average valuation level in five years, it will incur a -3.4% annualized drag in its returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	62%	61%	64%	53%	58%	57%	58%	56%	61%	56%	55%	55%

As DTE Energy is primarily a regulated utility, its revenue is protected by local regulators. This provides DTE Energy with reliable growth projects and a safe dividend. The company has been able to keep its payout ratio close to 60% over the past decade and is expected to maintain its payout ratio around this level for the foreseeable future. This payout ratio is much healthier than the payout ratio of most utilities. The 2.7% dividend yield of DTE Energy may not seem exciting on the surface but the company is likely to grow its dividend at an attractive 5%-7% annual rate over the next five years. As a result, the stock is suitable for income-oriented investors.

Since DTE Energy has been operating in the Michigan area for so long, the company has favorable relationships with local regulators, which take away some risk of new regulation surprises. Another factor that protects the company from unexpected regulation changes is its proactive effort to reduce its carbon emissions.

Final Thoughts & Recommendation

DTE Energy is growing faster than most utilities and is much more resilient in the current coronavirus crisis than the vast majority of stocks. The stock is ideal for risk-averse, income-oriented investors amid the uncertainty caused by the pandemic. However, the stock has nearly doubled off its bottom last year and it may now offer a 4.3% average annual return over the next five years. As a result, we rate the stock as a hold.
