Overview & Current Events

Ingredion Inc (INGR) is a multinational ingredient solutions company headquartered in Westchester, Illinois. Founded in 1906, INGR was incorporated as a Delaware corporation in 1997, operates in over 44 countries, and employs more than 11,000 people. The company is principally engaged in producing and selling starches and sweeteners for a wide range of industries. Essentially Ingredion turns grains, fruits, vegetables, and other plant-based materials into value-added ingredient solutions for the food, beverage, animal nutrition, brewing, and industrial markets. Ingredion operates in four business segments: North America, South America; Asia-Pacific; and Europe, Middle East, and Africa ("EMEA").

INGR released Q2 2021 results on the 3rd of August 2021. The company has continued its improvement from the second half of last year by posting its best quarter since 2017. Higher volumes, particularly in PureCircle and Katech helped to drive net sales up 28%. All regions saw double-digit growth; however, South America had the most significant gain with a 47% increase on this time last year. The company's expansion of its specialty ingredient portfolio is starting to pay off as sugar reduction sales were up in all regions and account for over 50% of net sales in both Asia-Pacific and EMEA. The gross margin improved to 35%, while adjusted EPS improved by 64% to $2.05 from $1.12 in Q2 2020.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	$5.32	$5.47	$5.05	$4.74	$5.51	$6.55	$7.06	$6.17	$6.13	$5.15	**$5.30**	**$6.15**
DPS	$0.66	$0.92	$1.56	$1.68	$1.74	$1.90	$2.20	$2.45	$2.51	$2.54	**$2.56**	**$3.27**
Shares	76.4	76.5	77.0	73.6	71.6	72.3	72.0	70.9	66.9	67.2	**67.0**	**66.5**

Ingredion's earnings-per-share have grown at a CAGR of 1.6% over the last nine years. However, they have been declining since 2017 due to lower operating results in North America and the Asia Pacific segments. The main drivers of this decline were lower sweetener demand, commodity margin pressures, and higher production and supply chain costs. The company aims for high single-digit growth up to 2023 due to its cost-smart initiative. Under this initiative, the company has saved $135 million this year and are on track to beat their $170 million target. We are more conservative and expect the growth to be around 3% which is implied by our $6.15/share earnings estimate for 2026. The dividend growth rate over the last five years has been just over 6% annually. With a healthy payout ratio, we can see the dividend continuing to grow by at least 5% annually until 2026 to reach $3.27 per share.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	10.7	10.0	13.4	14.3	15.2	16.9	16.1	16.4	13.0	14.0	**16.0**	**15.0**
Avg. Yld.	1.2%	1.5%	2.1%	2.3%	2.0%	1.6%	1.7%	2.1%	2.9%	3.1%	**3.0%**	**3.5%**

Ingredion expects to return to high single-digit growth as the global market share in clean and simple ingredients, global alternative protein ingredients, and reduced sugar ingredients increase to over $70 Billion within the next five years. The company has positioned itself to take advantage of this growth by expanding its specialty ingredient portfolio in 2019 to enable rapid, efficient customer co-creation to develop new food and beverages.

Ingredion Inc. (INGR)

Updated August 4th, 2021 by Derek English

Ingredion is currently trading at a price-to-earnings ratio of 16, which is just above the five-year average of 15.5. Therefore, we believe the company is presently overvalued at its current price and considers the fair value closer to $80. Our 5-year price target is $92 based on an estimated annual earnings growth of 3% and a P/E ratio of 15.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	12%	17%	31%	35%	32%	29%	31%	40%	41%	49%	**48%**	**53%**

Ingredion is a leading provider of ingredients to industries that show growth potential, including the food and beverage industry. The company has a simple business model and has positioned itself nicely in the global food supply chain.

During the Great Recession, the company performed relatively better than the broader market, with a slight drop in sales and earnings in 2009 before quickly returning to growth in 2010. We have seen a similar trend during the COVID pandemic, and the company is quickly returning to growth this year. The starch and sweetener industry is a highly competitive industry, particularly in North America. Many companies' products are viewed as essential ingredients that compete with virtually identical products manufactured by other companies in the industry, such as Archer-Daniels-Midland (ADM). The company tries to gain a competitive advantage by investing heavily in R&D with a team of over 500 scientists who work on plant science, food formulations, and the development of non-food applications such as starch-based biopolymers. Over the last five years, Free cash flow has grown at a compounded annual rate of 3.8%, leaving an average FCF payout ratio of 40%. As consumer trends change, future growth can come from acquisitions, as demonstrated by the strategic investment of stevia supplier pureCirlce in 2020. Of course, purchases can harm the balance sheet of a company. Luckily Ingredion has a reasonably strong balance sheet. Total Debt has increased moderately over the last ten years; shareholder equity stands at around $3 billion, Total Debt/Equity is 74.8%, Net Debt/EBITDA is 1.79, and Interest coverage is above 9.

Final Thoughts & Recommendations

INGR is a solid and straightforward business that can grow its dividend for the next five years. However, some risks are considered, such as regulation, competition, and the price of raw materials, especially corn. Earnings have exceeded our expectations again this quarter, and we may adjust our long-term earnings-per-share growth estimate of 3% if the company continues this trend over the second half of the year. Combine these modest returns with the company's current high valuation, and Ingredion receives a hold recommendation.
