Overview & Current Events

Mueller Water Products is a leading manufacturer and marketer of products and services used to transmit, distribute, and measure water in North America. The company's products and services are used by municipalities and the residential and non-residential construction industries. The majority of its revenues (>90%) are derived from spending on water and wastewater infrastructure upgrades, repairs, and replacements, typically associated with the construction of new residential communities. Management estimates it has one of the largest installed bases of Iron Gate valves and fire hydrants in the United States. The company generates nearly \$1 billion in annual sales and is based in Atlanta, Georgia.

On August 4th, 2021, Mueller Water Products reported its fiscal year Q3 results for the quarter ended June 30th, 2021. For the quarter, revenues came in at \$310.5 million, 35.9% higher year-over-year. The sales increase was primarily due to rebounding end-market demand from continued increases in municipal spending and the booming residential construction industry. Adjusted EPS came in at \$0.18 vs. \$0.07 in the comparable period last year, due to considerably higher margins following increased sales volumes and lower operating and interest costs. Specifically, the company refinanced its \$450 million Senior Notes, which decreased its annual interest rate by 150 basis points to 4.0%.

During the quarter, Mueller also acquired i2O Water Ltd for approximately \$20 million in cash. i2O Water delivers pressure management solutions to reduce water loss at more than 100 water companies in over 45 countries, largely in Europe and Asia. By integrating i2O Water to the rest of its product portfolio, Mueller will hopefully be able to achieve internal synergies and economic efficiencies, further boosting its financials. While management did not provide an FY2021 EPS outlook, it increased its expectations and currently anticipates that consolidated net sales will increase between 14%-16% as compared with the prior year. Based on this and the more recent results, we raise our FY2021 EPS from \$0.59 to \$0.63.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	(\$0.25)	(\$0.69)	\$0.26	\$0.35	\$0.19	\$0.40	\$0.77	\$0.67	\$0.40	\$0.46	\$0.63	\$0.80
DPS	\$0.07	\$0.07	\$0.07	\$0.07	\$0.08	\$0.10	\$0.15	\$0.19	\$0.20	\$0.21	\$0.22	\$0.27
Shares²	155.3	156.5	157.7	159.2	160.5	161.3	160.1	158.2	157.8	157.8	157.8	155.0

Despite Mueller's revenue modestly growing over the past few years, they are still on the same levels they were a decade ago. The company has sustained a positive bottom line since 2013, though also lagging over the past few years. Its industry is very mature, with little to no expansion prospects.

Hence apart from acquisitions, the company has few growth avenues. Further, the currently accelerated inflation could hurt the company if it isn't able to match higher costs with adequate price increases.

Mueller Water Products, Inc. (MWA)

Updated August 5th, 2021 by Nikolaos Sismanis

Still, amid management's positive comments, we estimate EPS growth of 5% in the medium-term. Mueller has never cut its dividend since its IPO. It has grown annually over the past 7 years, though at a humble rate since 2018. We expect DPS growth of around 4% going forward, considering Mueller's limited profitability growth catalysts ahead.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	---	---	29.8	26.1	48.5	29.7	15.6	17.2	26.2	22.5	23.7	22.0
Avg. Yld.	2.8%	2.0%	0.9%	0.8%	0.9%	0.8%	1.3%	1.7%	1.9%	2.0%	1.5%	1.5%

Over the past decade, Mueller's valuation multiple has hovered to various levels based on the company's profitability expectations. Shares are currently trading at around 23.7 times our expected FY2021 EPS, close to its historical average. Despite the recent sales rebound, due to its overall lagged financials, we believe that shares would be more fairly valued at a lower multiple of around 22. The stock's average yield, both over the past 5 and 10 years, has been 1.5%, similar to the current one. We expect it to remain stable going forward, providing a tiny capital return to Mueller's shareholders.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	---	---	27%	20%	42%	25%	19%	28%	50%	46%	35%	33%

We consider the stock's dividend relatively safe, with the payout ratio gradually improving over the past few years. The company is a market leader in water and wastewater infrastructure upgrades that see relatively stable annual demand. Water utility companies must modernize their facilities every a certain time period; hence robust demand should remain. The company claims that while the valve and hydrant products industry is competitive, it is a mature one and many end users are slow to transition to brands other than their historically preferred brand. Hence sales should not fluctuate wildly. Sales should remain relatively stable under a recession as well, as was the case during the Great Financial Crisis. However, the company still has little to no competitive advantages and is subject to limited growth catalysts ahead. On the positive side, Mueller's net debt position has been declining consistently, from \$1.5 billion in 2006 to \$217 million as of the latest quarter. The company also has no outstanding debt repayments until 2026, which should allow for flexible capital allocation in the medium term.

Final Thoughts & Recommendation

Mueller Water Products' shares have lagged over the past few years, as the company's profitability prospects appear relatively restrained. We believe that the company possesses certain qualities such as robust revenues, an improving balance sheet, and a healthy payout ratio. However, we forecast annualized returns of around 4.8% in the medium term due to humble growth projections and the potential for valuations headwinds ahead. We believe there are better opportunities around water-related stocks. Consequently, we rate shares a sell at their current levels.
