Overview & Current Events

National Fuel Gas Co. is a diversified energy company that operates in five business segments: Exploration & Production, Pipeline & Storage, Gathering, Utility, and Energy Marketing. The company's largest segment is Exploration & Production. National Fuel Gas was founded in 1902 and has grown to a market capitalization of \$4.7 billion. With 51 years of consecutive dividend increases, National Fuel Gas qualifies to be a Dividend Champion.

In early August, National Fuel Gas reported (8/5/21) financial results for the third quarter of fiscal 2021. The company grew its production by an impressive 48% over last year's quarter, primarily thanks to the acquisition of Appalachian assets. In addition, the average price of natural gas rose 15%, from \$1.92 in last year's quarter to \$2.20. As a result, adjusted earnings-per-share grew 63%, from \$0.57 to \$0.93, and exceeded analysts' consensus by \$0.11. Management raised the dividend by 2.2% and thus the company has now grown its dividend for 51 consecutive years.

The pandemic has affected the natural gas market much less than the oil market. In addition, the pipeline & storage and gathering segments provide a strong buffer to the earnings of National Fuel Gas. The two segments grew their EBITDA 5% and 43%, respectively, in the latest quarter thanks to strong volume growth. Management raised its guidance for a fourth consecutive quarter thanks to favorable commodity prices. It now expects earnings-per-share of \$4.05-\$4.15 (vs. previous guidance of \$3.85-\$4.05), for 40% growth at the mid-point. It also initiated guidance for earnings-per-share of \$4.40-\$4.80 in fiscal 2022, implying 12% growth at the mid-point, thanks to an improved outlook for natural gas prices and the completion of the FM100 expansion project, which is expected to generate \$50 million of annual revenues.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$3.09	\$2.63	\$3.14	\$3.52	-\$4.50	-\$3.43	\$3.30	\$3.34	\$3.45	\$2.92	\$4.05	\$4.93
DPS	\$1.40	\$1.44	\$1.48	\$1.52	\$1.56	\$1.60	\$1.64	\$1.68	\$1.72	\$1.76	\$1.80	\$2.00
Shares²	82.9	83.3	83.7	84.2	84.6	85.1	85.5	86.0	86.8	91.0	91.5	94.0

National Fuel Gas pursues growth by growing its natural gas production and expanding its pipeline network. However, the company's earnings have barely grown over the last decade, primarily due to the cyclicity of the natural gas market. Earnings-per-share have compounded at a rate of 2.9% per year since 2010. Thanks to the strong business momentum of the company, we are now forecasting 4% (vs. 2% previously) long-term earnings-per-share growth for this Dividend Champion, which allows us to calculate a 2026 earnings-per-share estimate of \$4.93.

Investors should note that 90% of the production of National Fuel Gas is natural gas. Therefore, as the Exploration & Production segment generates about half of total profits, the earnings of the company greatly depend on the price of natural gas. As a result, there is always great uncertainty in the long-term forecasts of the earnings of this company.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	21.4	19.3	18.6	20.6	---	---	17.2	12.8	15.6	14.6	12.6	15.0
Avg. Yld.	2.8%	2.1%	2.8%	2.5%	2.1%	2.5%	3.1%	2.9%	3.2%	4.1%	3.5%	2.7%

National Fuel Gas is trading at a price-to-earnings ratio of 12.6, which is much lower than its historical 10-year average of 17.5. As we expect record earnings by 2026, we assume a fair price-to-earnings ratio of 15.0 for that year. If the stock reverts to this valuation level over the next 5 years, it will enjoy a 3.6% annualized gain in its returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	45.3%	54.8%	47.1%	43.2%	---	---	49.7%	50.3%	50.0%	60.3%	44.4%	40.5%

National Fuel Gas has a healthy balance sheet while its interest coverage level stands at a decent level, around 4.0. Moreover, its dividend payout ratio is sufficiently low to enable continued dividend growth even if earnings stall temporarily. Management has always targeted a dividend payout ratio around 50% in order to have a high margin of safety against the wide fluctuations of the price of natural gas. As the 3.5% dividend yield of National Fuel Gas is more than twice as much as the yield of the S&P (1.3%), the stock may entice income-oriented investors. However, these investors should be aware of the company's high dependence on the price of natural gas.

Qualitatively, National Fuel Gas' competitive advantage is its combination of regulated and stable businesses (like pipelines and utilities) with cyclical and potentially higher-growth sectors (like exploration & production). This allows the company to endure difficult operating environments and downturns, such as the ongoing one, with less difficulty than its peers who may focus exclusively on the more cyclical areas of the energy sector.

Final Thoughts & Recommendation

National Fuel Gas has sustained production growth, promising outlook and a reasonable valuation. As a result, it could offer a 10.4% average annual return over the next five years. The stock is attractive but it receives a hold rating due to the cyclical nature of its business, which warrants a greater expected return.
