Overview & Current Events

In 1933, Jim Ryder made a \$35 down payment on one truck. Today that has transformed into a \$4 billion commercial transportation, logistics and supply chain management solutions company with 250,000+ vehicles and 55 million square feet of warehouse space. The business is divided into three segments – Fleet Management (FMS), Dedicated Transportation (DTS) and Supply Chain Solutions (SCS) – providing commercial truck rental, truck leasing, used trucks for sale, and last mile delivery services. Ryder generated over \$8 billion in revenue last year.

On July 14th, 2021, Ryder increased its quarterly dividend to \$0.58 after paying the same \$0.56 dividend for 8 quarters.

On July 28th, 2021, Ryder released Q2 2021 results for the period ending June 30th, 2021. For the quarter, Ryder recorded revenue of \$2.38 billion, a 25.7% increase compared to Q2 2020. Results were driven by 18%, 49% and 21% gains in the Fleet Management, Supply Chain Solutions and Dedicated Transportation segments respectively. Adjusted earnings equaled \$129.1 million or \$2.40 per share compared to a loss of -\$49.5 million or -\$0.95 per share in Q2 2020.

Ryder also updated its 2021 outlook, now anticipating adjusted earnings-per-share of \$7.20 to \$7.50, up significantly from the \$5.50 - \$5.90 and \$4.15 - \$4.65 previously forecast. We have updated our estimate accordingly.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$3.49	\$4.04	\$4.87	\$5.59	\$6.13	\$5.41	\$4.53	\$5.79	\$1.01	-\$0.27	\$7.35	\$7.72
DPS	\$1.12	\$1.20	\$1.30	\$1.42	\$1.56	\$1.70	\$1.80	\$2.12	\$2.20	\$2.24	\$2.32	\$2.44
Shares²	51.1	51.4	53.3	53.0	53.5	53.5	53.0	53.1	53.3	52.4	53	53

If you look back to 2008, when the company was earning \$4.49 per share, Ryder grew earnings-per-share by an average compound rate of roughly 2.6% per annum through 2018. However, results dropped off materially in 2019 as the company dealt with a significant impact from residual value changes. Moreover, 2020 results were negative.

Ryder faces challenges from increasing costs, more stringent regulation, and disruptive technologies; not to mention softer demand in the power vehicle resale market. And this was before the COVID-19 pandemic. While the company is considered essential, providing supply chain and transportation services, demand weakened in the short-term, showing up in 2020 with a loss.

Of course, there are opportunities as the company offers solutions for driver and labor shortages in the industry for the short to intermediate-term, and Ryder can play a key role in the ongoing shift toward e-commerce and asset sharing / autonomous vehicles in the long-term. The company paid the same \$0.15 quarterly dividend from 1989 through 2004 but began increasing it in 2005. From 2008 to 2019, this payment increased by 8.2% per annum.

We are now forecasting \$7.35 in earnings-per-share, the midpoint of management's recent guidance. This would get the company to record profitability. We are also forecasting 1% annual growth, implying significantly higher results over the intermediate term due to the expectation for standout results in 2021.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Avg. P/E	14.3	11.4	12.5	15.1	13.7	12.1	16.6	12.2	---	---	10.4	12.0
Avg. Yld.	2.2%	2.6%	2.1%	1.7%	1.9%	2.6%	2.4%	3.0%	4.0%	5.6%	3.0%	2.6%

Excluding 2019 and 2020, shares of Ryder have traded hands with an average P/E ratio of about 14 times earnings, with a range from 8 to 19 times earnings. We are using 12 times earnings as a fair value multiple. With shares presently trading hands near 10 times the midpoint of management's guidance, this implies the potential for a valuation tailwind. The dividend yield, sitting at 3.0%, should aid shareholder returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	32%	30%	27%	25%	25%	31%	40%	37%	---	---	32%	32%

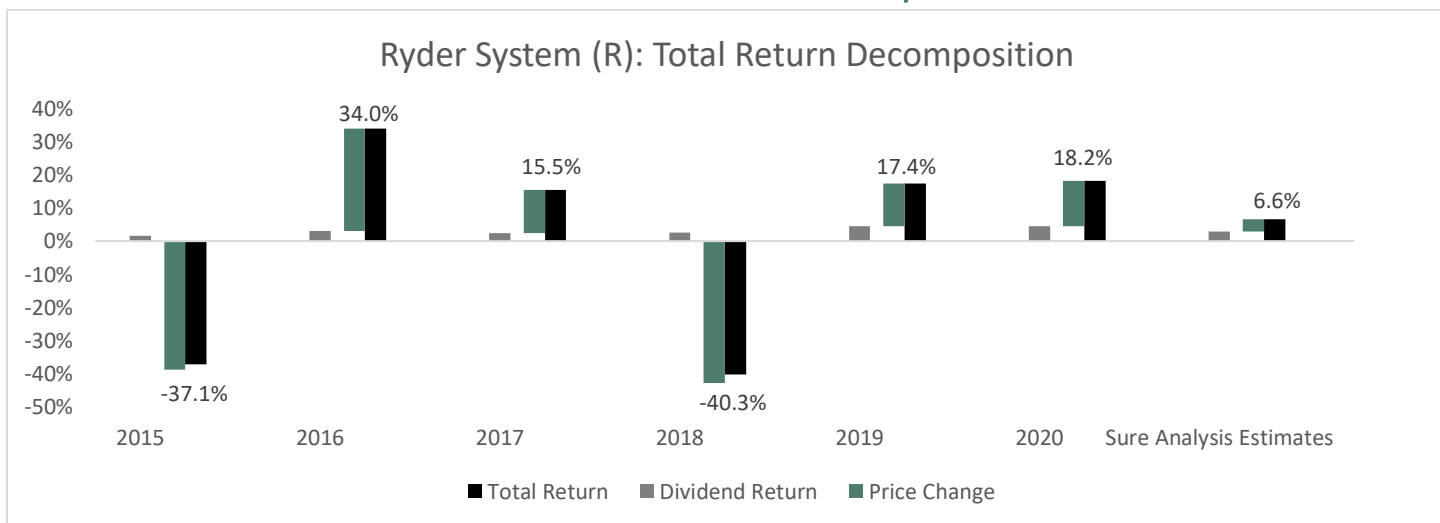

There have been three instances – 2008-09, 2015-17 and 2018-29 – where the company reported a material decline in per share earnings (-65%, -26% and -83% respectively). Further, 2020 results were negative. While this comes with a cyclical industry, we are encouraged by Ryder's ability to rebound. If the company can get back to normalized earnings power, the dividend would be reasonably covered. Indeed, this is what management is now expecting.

Of particular note to Ryder's safety is the company's interest expense, which totaled \$261 million last year against underlying earnings power near ~\$400 million. The company has suggested that it is comfortable with this type of significant leverage – targeting a debt-to-equity ratio of 200% to 250%. However, this could mean that the company would have to take dilutive action if business conditions deteriorate. This is something to watch in the current crisis.

Final Thoughts & Recommendation

After being up 32%, 33% and 23% in our last three reports, shares are down -5% in the last three months. Total return potential comes in at 6.6% per annum, stemming from 1% growth, a 3.0% dividend yield and the potential for a valuation tailwind. We note that the company posted a loss in 2020 and is still working through several challenges, not to mention a hefty debt load. We remain cautious in this regard, as earnings may not come back as anticipated, and the company's leverage is significant. Shares earn a hold rating.
