#### **Overview & Current Events**

V.F. Corporation is one of the world's largest apparel, footwear and accessories companies. The company's brands include The North Face, Vans, Timberland and Dickies. The company, which has been in existence since 1899, has a market cap of \$32 billion and generated over \$9 billion in sales last year. On May 22<sup>nd</sup>, 2019, V.F. Corp separated its VF's Jeanswear organization, including the Wrangler, Lee and Rock & Republic brands. The separation was completed via a 100% distribution of shares to V.F. Corp shareholders, with the new entity named Kontoor Brands trading as an independent, publicly traded company under the "KTB" ticker.

On October 16<sup>th</sup>, 2020, V.F. Corp announced a \$0.49 quarterly dividend, representing a 2.1% year-over-year increase and marking the company's 48<sup>th</sup> consecutive year of increasing its payout.

On July 30<sup>th</sup>, 2021, V.F. Corp released Q1 fiscal 2022 results for the period ending July 3<sup>rd</sup>, 2021. (V.F. Corp's fiscal year ends the Saturday closest to March 31<sup>st</sup>.) For the quarter revenue came in at \$2.2 billion, a 104% increase compared to Q1 2021, driven by V.F. Corp's largest brands and the EMEA and North American regions, which were significantly impacted by the COVID-19 pandemic last year. Adjusted operating income equaled \$148 million compared to a loss in the prior year. Adjusted earnings-per-share equaled \$0.27 versus a loss of -\$0.57 in Q1 fiscal 2021.

V.F. Corp also updated its fiscal 2022 outlook. For this year the company expects revenue of at least \$12.0 billion (from \$11.8 billion) and adjusted earnings-per-share of at least \$3.20 (up from approximately \$3.05).

#### Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$2.01	\$2.41	\$2.73	\$3.08	\$3.08	\$3.11	\$2.97	\$3.78	\$2.68	\$1.31	\$3.20	\$4.49
DPS	\$0.65	\$0.76	\$0.92	\$1.11	\$1.33	\$1.53	\$1.72	\$1.94	\$1.90	\$1.93	\$1.96	\$2.38
Shares <sup>1</sup>	442	441	440	433	427	414	396	397	389	392	394	390

Note that while V.F. Corp has already completed fiscal year 2021 (ended in April 2021), we are electing to display the above information closer to the actual calendar year. In addition, the above historical numbers include the Jeanswear business, whereas results from 2019 forward do not – explaining the fall in earnings and the dividend, in that year.

Through fiscal 2019, V.F. Corp had grown earnings-per-share by an average compound rate of 10.5% per annum. This result was driven by strong sales growth (basically doubling) along with a solid uptick in the company's operating and net profit margins. Continued success can come from these areas, but there could be enhanced volatility due to the company becoming more of a "pure play" provider. In addition, the COVID-19 pandemic significantly impacted last year's results. However, management is expecting earnings to bounce back materially this year.

V.F. Corporation has not only paid but increased its dividend for 48 consecutive years. Moving forward we believe this record will remain intact, albeit perhaps with a more subdued dividend growth rate as the company begins to digest an abnormally high payout ratio. Note that the lower dividend in 2019 takes into account the Kontoor spin-off.

# **Valuation Analysis**

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	13.7	15.3	17.4	20.8	23.1	19.3	20.1	22.1	31.9		25.2	19.0
Avg. Yld.	2.4%	2.1%	1.9%	1.7%	1.9%	2.5%	2.9%	2.3%	2.2%	2.7%	2.4%	2.8%

Over the past decade shares of V.F. Corp have traded hands with an average P/E ratio of about 20-times earnings. We consider 19 times earnings as a reasonable starting point. This takes into consideration the quality of the company's earnings along with its potential growth rate, coupled against short-term demand uncertainties and the recent spin-off. With shares trading at 25 times our earnings estimate, this implies a meaningful valuation headwind.

### Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	32%	32%	34%	36%	43%	49%	58%	51%	71%		61%	53%

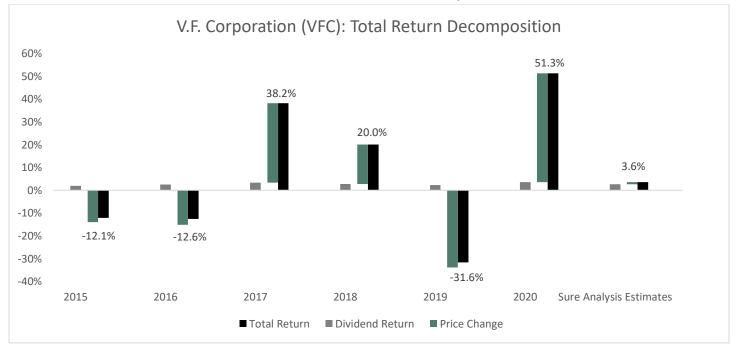

V.F. Corp has a competitive advantage in the way of a stable of well-known, premium brands that demand pricing power. During the last recession the company posted earnings-per-share of \$1.39, \$1.29 and \$1.61 in the 2008 through 2010 stretch, indicating the resiliency of the business. Also, of note is the company's storied dividend record. While the dividend payout ratio is moderately elevated, we believe this payout can continue to rise over time.

As of the most recent report V.F. Corp held \$1.3 billion in cash, \$4.6 billion in current assets and \$13.6 billion in total assets against \$3.1 billion in current liabilities and \$10.3 billion in total liabilities. Long-term debt stood at \$4.7 billion.

### Final Thoughts & Recommendation

Shares are up marginally since our last report. We are forecasting 3.6% total return potential, stemming from 7% growth and a 2.4% dividend yield weighed against the possibility of a valuation headwind. There are things to like about the business, including strong brand names, an excellent dividend history and a solid balance sheet. However, shares earn a hold rating due to the elevated valuation.
