Overview & Current Events

Jack Henry & Associates is a business software & services company that is headquartered in Missouri. It was founded in 1976. The company provides information technology services to the financial services industry, including to more than 1,300 banks as well as other companies.

Jack Henry & Associates reported its fiscal first quarter earnings results on November 8. The company generated revenues of \$490 million during the quarter, which was 8% more than the revenues that Jack Henry & Associates generated during the previous year's quarter. Revenues were up 9% on an adjusted basis, which was down slightly on a sequential basis. Revenues were slightly lower than what the analyst community had expected. The company was able to grow the revenues for its services and support unit by 6%, while its processing business saw strong growth of 12% during the quarter. Jack Henry & Associates' operating income was up 16% compared to the prior year's period.

Jack Henry & Associates reported earnings-per-share of \$1.38 for the first quarter, which was ahead of the analyst consensus, beating estimates by \$0.06. Net earnings-per-share were up 16% year-over-year. Jack Henry's management announced guidance ranges for fiscal 2022, calling for ongoing growth during the current year. The company forecasts revenues in a range of \$1.91 billion to \$1.92 billion, which equates to revenue growth of around 9% year over year, while earnings-per-share are forecasted to come in at around \$4.64 to \$4.73 during the current year, which would represent a growth rate of around 14% compared to the company's earnings-per-share in 2021.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$1.78	\$2.04	\$2.36	\$2.59	\$3.12	\$3.14	\$3.65	\$3.52	\$3.86	\$4.12	\$4.68	\$7.37
DPS	\$0.44	\$0.56	\$0.84	\$0.94	\$1.06	\$1.18	\$1.36	\$1.54	\$1.72	\$1.78	\$1.84	\$2.83
Shares¹	86	85	83	81	79	77	77	77	77	77	77	75

Jack Henry & Associates has a great earnings-per-share growth track record. Since 2010, its earnings-per-share grew by 12% annually. Between 2013 and 2018, earnings-per-share grew by 12.3% annually, although 2019 and 2020 were years during which the company has not been able to grow its earnings-per-share in line with the years prior. Earnings growth has been relatively reliable in the past, as Jack Henry & Associates' earnings-per-share grew during almost every year over the last decade, even during the financial crisis. 2019 was the only year during which Jack Henry & Associates could not continue its growth track record, as profits declined slightly.

In the past, profit growth has been driven by rising revenues, as well as by growing margins. This is not a surprise, as Jack Henry & Associates benefits from solid operating leverage. Due to a relatively high portion of fixed costs, revenue increases allowed for margin expansion during most years. In recent years, Jack Henry & Associates did not manage to grow its operating margin by a lot, as product mix changes were a headwind for margins. In the long term, the company should continue to benefit from operating leverage once again, which is why we believe that profits will grow faster than revenues. Growth rates in the industry will likely decline somewhat due to a much higher base compared to ten years ago, but Jack Henry & Associates should nevertheless be able to record solid earnings growth in the future.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	18.0	20.1	23.3	24.1	24.8	29.1	43.8	37.1	47.7	40.0	33.8	25.0
Avg. Yld.	1.4%	1.4%	1.5%	1.5%	1.4%	1.3%	0.9%	1.2%	0.9%	1.1%	1.2%	1.5%

Jack Henry & Associates is a high-quality growth company. Shares had been trading at a relatively inexpensive valuation about ten years ago, but the stock has become much more expensive in recent years. The valuation currently stands at an earnings multiple of close to 34, which we do not deem justified. The current very high valuation will result in a meaningful headwind to the company's total returns over the coming years, we believe.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	24.7%	27.5%	35.6%	36.3%	34.0%	37.6%	37.3%	43.8%	44.6%	43.2%	39.3%	38.4%

Jack Henry & Associates has raised its dividend at a very compelling pace over the last decade, which was partially possible due to an increase in the company's dividend payout ratio, and partially due to its strong earnings growth. Jack Henry & Associates pays out roughly 40-50% of its net profits, which is why the dividend looks relatively safe. It is likely that Jack Henry & Associates will also be able to raise its dividend during recessions or economic downturns, as this is what the company did during the last financial crisis, too.

Jack Henry & Associates has shown that it operates a recession-resistant business model. The company was able to generate earnings-per-share growth during every year through the Great Recession. Jack Henry & Associates' services have high switching costs from the customers' perspective, which creates sticky customers with high lifetime values. The positive growth outlook for the whole industry is why competitive pressures are not a huge problem.

Final Thoughts & Recommendation

Jack Henry & Associates is a high-quality business that generated attractive earnings and dividend growth in the past, which went hand in hand with strong total returns for shareholders. The company's growth outlook over the coming years is robust as well, mainly due to industry tailwinds. The company is weathering the coronavirus crisis well, but due to a too-high valuation we still rate the stock a hold at current prices.
