Overview & Current Events

MSA Safety Incorporated, formerly Mine Safety Appliances, was established in 1914. Today, it develops and manufactures safety products. Customers come from a variety of industrial markets, including oil & gas, fire service, construction, mining, and the military. MSA Safety's major products include gas and flame detection, air respirators, head protection, fall protection, air purifying respirators, and eye protection gear. The \$6 billion market cap company employs about 5,200 people worldwide.

On May 3rd, 2021, MSA increased its quarterly dividend to \$0.44, marking the 50th consecutive yearly increase.

On July 1st, 2021, MSA acquired Bacharach, Inc., a leader in gas detection technologies, for \$337 million.

On October 27th, 2021, MSA released Q3 2021 results for the period ending September 30th, 2021. For the quarter revenue came in at \$340.2 million, an 11.8% increase compared to Q3 2020. Sales in the Americas segment was up 17.9%, while sales in the International segment increased 0.9%. Adjusted earnings equaled \$37 million or \$0.94 per share compared to \$36.8 million or \$0.94 per share in the year ago period.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$1.87	\$2.42	\$2.28	\$2.52	\$2.52	\$2.77	\$3.65	\$4.50	\$4.80	\$4.50	\$4.40	\$5.89
DPS	\$1.03	\$1.10	\$1.18	\$1.23	\$1.27	\$1.31	\$1.38	\$1.49	\$1.64	\$1.71	\$1.76	\$2.48
Shares¹	37	37	37	38	37	38	38	39	39	39	39	39

Note that we have used adjusted earnings in the table above. MSA has put together a solid growth record in the past decade, growing by an average rate of 8.5% per year during the 2008 through 2019 period. Last year proved to be a down year, which is not unexpected given the operating environment. We anticipate earnings bouncing back near pre-pandemic levels this year.

MSA's acquisition of Globe Manufacturing in 2017 boosted the company's revenue growth profile and provided the company with an expansion into new product categories such as protective clothing for firefighters. Innovations such as the thermal imaging camera in the self-contained breathing apparatus and the company's V-Series line of fall protection have helped as well. In addition, the Sierra Monitor acquisition, Bristol Uniforms acquisition, Bacharach acquisition and a strong backlog cement the idea of the possibility of continued growth.

Results were down in 2020, but still resilient, falling less than -7%. Moreover, many of MSA's products continue to be in demand in the current environment. Over the intermediate term we are assuming 6% annual growth.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026

MSA Safety Inc. (MSA)

Updated November 4th, 2021, by Eli Inkrot

Over the past 10 years shares of MSA have traded hands with an average P/E ratio of about 21 times adjusted earnings. We are using this multiple as a starting place for a “fair” valuation. However, with a current P/E ratio near 35 times expected earnings, this implies the possibility of a meaningful valuation headwind over the intermediate term.

While the dividend has increased nicely, and indeed has a spectacular long-term record of being increased every year for half a century, the current 1.1% dividend yield does not add materially to an investment thesis.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	55%	45%	52%	49%	50%	47%	38%	33%	34%	38%	40%	42%

MSA Safety has several competitive advantages that fuel its growth as the leader across the safety and protection products industry. It has a global reach that competitors cannot match, with roughly a third of annual sales from outside the Americas, and it can invest in growth initiatives to retain its industry leadership.

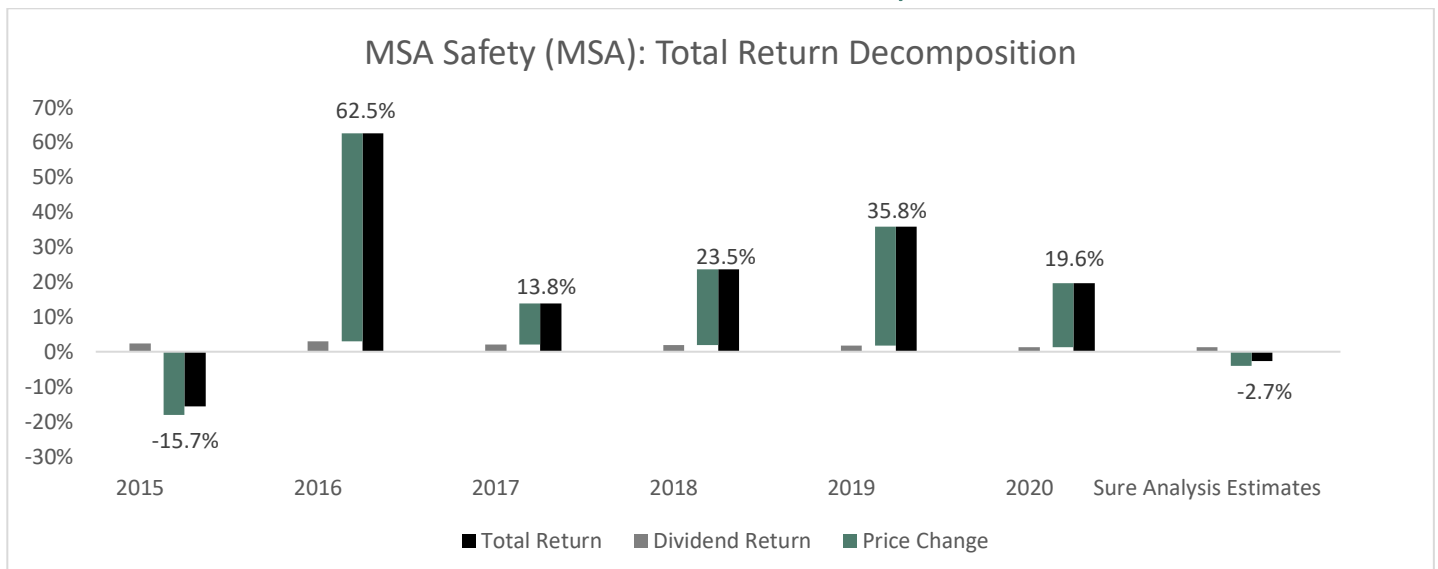

During the Great recession MSA posted earnings-per-share results of \$1.96, \$1.21, \$1.05 and \$1.87 for the 2008 through 2011 stretch. This gives you a fair idea of the cyclical nature inherent in the business – safety is always important, but budgets become squeezed in lesser times. We are somewhat encouraged by the idea that the dividend kept increasing during this time. That was good news for the current income investor, but the payout ratio did become quite elevated for a few years. The current crisis has put MSA’s resilience on display once again.

As of the most recent report MSA held \$117 million in cash, \$725 million in current assets and \$2.3 billion in total assets against \$337 million in current liabilities and \$1.4 billion in total liabilities. Notably, about a fourth of total assets are made up of goodwill. Long-term debt stood at \$593 million.

Final Thoughts & Recommendation

Shares are up 19% in the last year. MSA Safety is a strong business with competitive advantages. Moreover, the company also has a reasonable growth profile, 6% over the intermediate-term, coupled with a solid, albeit currently low-yielding 1.1% dividend. The main downside, in our view, is the elevated valuation which could lead to a significant headwind and the potential for a -2.7% total annual return. This has the prospect of turning solid business performance into poor investment returns. Shares earn a sell rating.
