Overview & Current Events

Mueller Water Products is a leading manufacturer and marketer of products and services used to transmit, distribute, and measure water in North America. The company's products and services are used by municipalities and the residential and non-residential construction industries. The majority of its revenues (>90%) are derived from spending on water and wastewater infrastructure upgrades, repairs, and replacements, typically associated with the construction of new residential communities. Management estimates it has one of the largest installed bases of Iron Gate valves and fire hydrants in the United States. The company generates nearly \$1.1 billion in annual sales and is based in Atlanta, Georgia.

On November 8th, 2021, Mueller Water Products reported its FQ4 and full-year results for the period ended September 30th, 2021. For the quarter, revenues came in at \$295.6 million, 11.4% higher year-over-year. Revenues for the year reached \$1.1 billion, an increase of 15.2% versus FY2020. Following record sales growth in Q3, Mueller experienced continued strong demand in Q3 driven by both new residential construction and municipal repair and replacement activity. Q4 orders remained elevated compared with pre-pandemic levels, and the company ended the year with a record backlog for its Infrastructure products. Net income per diluted share came in at \$0.44 as compared with \$0.45 last year.

For the FY-2022, Mueller currently anticipates that consolidated net sales will increase between 4% - 8% as compared with the prior year. These expectations take into account current backlog, higher pricing, new product initiatives, and channel strategies. Following what is likely conservative guidance, which is likely to be hiked moving forward, we introduce an initial estimate of FY2022 EPS at \$0.50, which we will narrow as we advance through the year.

The company also hiked its dividend by 5.5% to a quarterly rate of \$0.058. This marks the 8th consecutive annual hike.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	(\$0.69)	\$0.26	\$0.35	\$0.19	\$0.40	\$0.77	\$0.67	\$0.40	\$0.45	\$0.44	\$0.50	\$0.64
DPS	\$0.07	\$0.07	\$0.07	\$0.08	\$0.10	\$0.15	\$0.19	\$0.20	\$0.21	\$0.22	\$0.23	\$0.28
Shares¹	156.5	157.7	159.2	160.5	161.3	160.1	158.2	157.8	157.8	158.4	158.4	158.4

Despite Mueller's revenue modestly growing over the past few years, they are still on the same levels they were a decade ago. The company has sustained a positive bottom line since 2013, but with no growth success, nonetheless. Its industry is very mature, with little to no expansion prospects. Hence apart from acquisitions, the company has few growth avenues. Further, the currently accelerated inflation could hurt the company if it isn't able to match higher costs with adequate price increases.

Still, amid management's positive comments, we estimate EPS growth of 5% in the medium-term. Mueller has never cut its dividend since its IPO. It has grown annually over the past 7 years, though at a humble rate since 2018. We expect DPS growth of around 4% going forward, considering Mueller's limited profitability growth catalysts ahead.

¹ Share count is in millions.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	---	29.8	26.1	48.5	29.7	15.6	17.2	26.2	22.5	48.0	30.9	22.0
Avg. Yld.	2.0%	0.9%	0.8%	0.9%	0.8%	1.3%	1.7%	1.9%	2.0%	1.5%	1.5%	2.0%

Over the past decade, Mueller's valuation multiple has hovered to various levels based on the company's profitability expectations. Shares are currently trading at around 30.9 times our expected FY2022 EPS, close to its historical average. Despite the recent sales rebound, due to its overall lagged financials, we believe that shares would be more fairly valued at a lower multiple of around 22. The stock's average yield, both over the past 5 and 10 years has been 1.7% and 1.4% respectively. We expect it provide a small tailwind to total returns for Mueller's shareholders.

Safety, Quality, Competitive Advantage, & Recession Resiliency

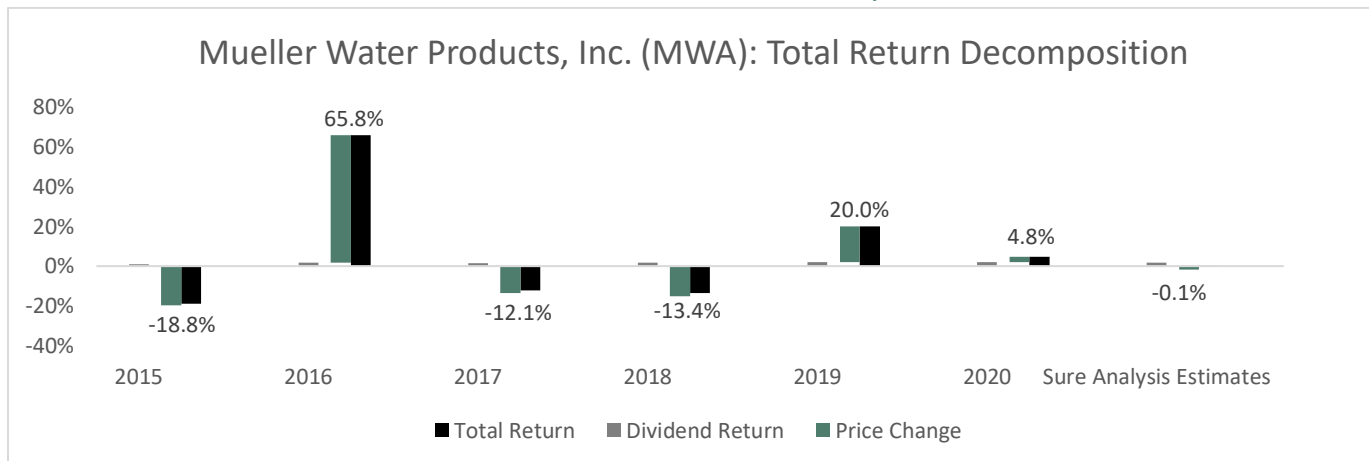

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	---	27%	20%	42%	25%	19%	28%	50%	46%	50%	46%	44%

We consider the stock's dividend relatively safe, with the payout ratio gradually improving over the past few years. The company is a market leader in water and wastewater infrastructure upgrades that see relatively stable annual demand. Water utility companies must modernize their facilities every a certain time period; hence robust demand should remain. The company claims that while the valve and hydrant products industry is competitive, it is a mature one and many end users are slow to transition to brands other than their historically preferred brand. Hence sales should not fluctuate wildly. Sales should remain relatively stable under a recession as well, as was the case during the Great Financial Crisis. However, the company still has little to no competitive advantages and is subject to limited growth catalysts ahead. On the positive side, Mueller's net debt position has been declining consistently, from \$1.5 billion in 2006 to \$219.4 million as of the latest quarter. The company also has no outstanding debt repayments until 2026, which should allow for flexible capital allocation in the medium term.

Final Thoughts & Recommendation

Mueller Water Products possesses certain qualities such as robust revenues, an improving balance sheet, and a healthy payout ratio. However, we forecast the stock will deliver no positive returns in the medium term due to potentially massive valuation headwinds ahead which could offset gains from growth in the company's financials and yield. We believe there are better plays in water-related stocks. Consequently, we rate shares a sell at their current levels.
