Overview & Current Events

New York Community Bancorp is the parent of a state-chartered bank called New York Community Bank. The wholly owned subsidiary operates 236 branches in New York, New Jersey, Ohio, Florida, and Arizona. The holding company was founded in 1993 but the banking operations of the company can be traced to 1859. The bank focuses on multi-family loans in New York City, particularly in buildings that are rent controlled. That book of business is about three-quarters of its entire lending portfolio. The \$58 billion asset company has a market capitalization of \$5.8 billion.

NYCB reported third quarter earnings on October 27th, 2021, and results were very weak on both the top and bottom lines. Total revenue was \$333 million, up 13% year-over-year, but missed estimates by \$13 million. Adjusted diluted earnings-per-share came to 31 cents, up 35% year-over-year. Credit loss provisions came to a benefit of \$1 million, versus losses of \$13 million a year ago. The bank's efficiency ratio was 38.9%, which is excellent.

Net interest margin was up 15bps to 2.44% year-over-year but declined sequentially due to lower prepayment income. That metric was \$16 million versus \$27 million in the prior quarter. Net interest income was \$318 million, up 13% year-over-year.

Total loans held for investment rose \$858 million to \$43.7 billion year-over-year. We have left our estimate of earnings-per-share unchanged for this year following Q3 results at \$1.25.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$1.09	\$1.13	\$1.08	\$1.09	-\$0.11	\$1.01	\$0.81	\$0.79	\$0.77	\$0.87	\$1.25	\$1.60
DPS	\$1.00	\$1.00	\$1.00	\$1.00	\$1.00	\$0.68	\$0.68	\$0.68	\$0.68	\$0.68	\$0.68	\$0.68
Shares¹	437	439	441	443	485	487	488	474	467	464	465	680

NYCB's growth prospects are somewhat murky. The bank's leverage to New York City with its multi-family loan portfolio makes its results more volatile than a diversified bank that has lots of different types of lending strategies. In recent years, New York City passed stricter regulations that make it more difficult for landlords to raise rents on rent-controlled units, which is where NYCB is heavily leveraged. This could crimp the bank's customers' ability to improve properties over time and raise prices, which may cause some of them to lose the ability to service their loans. Some of this occurred in 2019, but we note 2020 saw this headwind abate somewhat. NYCB has been prudent in its underwriting standards, so risks are still somewhat low, but the possibility of lower growth because of this is noticeable.

On the bright side, NYCB's deposit mix is very strong for an environment where rates are moving around. About 40% of its deposits are in time deposits, so those rates are locked in until maturity. In addition, strong deposit growth should help NYCB pay down more expensive borrowings and improve margins, along with strong expense controls. In total, we see 5% earnings-per-share growth from 2021's level. We note that the bank's loan-to-deposit ratio is extremely high, meaning risks are higher, and the runway for additional growth is essentially nothing due to already-high leverage. In addition, NYCB has tremendously high exposure to the markets in and surrounding New York City, which has had one of the worst outbreaks of COVID-19 in the US, although that market is showing signs of improving in 2021.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	13.8	11.6	13.5	14.6	---	15.0	16.7	14.6	14.9	11.4	10.1	11.5
Avg. Yld.	6.7%	7.6%	6.8%	6.3%	5.8%	4.5%	5.0%	5.9%	5.9%	6.8%	5.4%	3.7%

We see fair value for NYCB at 11.5 times earnings based primarily upon peer valuations. Today, the stock trades for 10.1 times our estimate of 2021 earnings-per-share, so it is undervalued in our view. We see a tailwind from the valuation, and investors get a 5%+ current yield as well.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	92%	88%	93%	92%	---	67%	84%	86%	88%	78%	54%	43%

NYCB doesn't necessarily have a competitive advantage, as those are difficult to come by in banking. Indeed, we suggest that the bank's leverage to a narrow sliver of the New York City real estate market makes its results more volatile than most other banks' results and is a *disadvantage*. On the other hand, the focus on these rent-controlled apartments should make its recession performance quite strong and indeed, during the Great Recession, NYCB continued to grow earnings. That is quite an attractive trait, and a rare one, for a bank.

The payout ratio has improved greatly in the past two years, and NYCB is in a much better position to afford its current payout. We don't foresee any cuts upcoming, and while the bank could raise the payout, there have been no signs of any appetite for that from management. The Flagstar deal, which is yet to be approved, would indicate growth is favored by management instead of dividend increases.

Final Thoughts & Recommendation

NYCB offers investors strong total annual return potential with some measure of risk involved. The stock's yield is certainly attractive and shares trade under our estimate of fair value. New York Community Bancorp is weathering the challenging conditions of the pandemic very well, and signs of a rebound are appearing. With projected returns of 11.6%, we are reiterating the stock at a buy rating.
