Overview & Current Events

Stryker is a global leader in the medical device sector. The company's product lines include surgical equipment, neurovascular products and orthopedic implants. The company was founded in 1941 by Dr. Homer Stryker because he felt that products that the medical device industry offered were not meeting the needs of his patients. Today, the company employs more than 43,000 people worldwide.

Stryker reported earnings results for the third quarter on 10/28/2021. Revenue increased more than 12% to \$4.2 billion, but was \$30 million shy of estimates. Revenue was also higher by 15.9% from Q3 2019. Adjusted earnings-per-share of \$2.20 compared favorably to adjusted earnings-per-share of \$2.14 in the prior year, but was \$0.13 below expectations.

Organic revenue was up 4.5% from last year and 8.4% from Q3 2019. Reported sales for international markets grew 12%, offsetting weakness in the U.S. Orthopaedics reported sales grew 16.1%, but fell 1.8% on an organic basis as the reemergence of COVID-19 impacted hip, knee and spine demand in the U.S. Mako continues to enjoy high growth rates. MedSurg improved 9.4% and 8.8% on a reported and organic basis, respectively, driven by gains in instruments, power tools and smoke evacuation products. Neurotechnology & Spine reported sales grew 7.3% with organic sales higher by 4.5% with all business showing positive results.

Stryker once again provided revised guidance. The company expects organic revenue growth of 7% to 8% from 2019, down from 9% to 10% previously. Stryker now expects adjusted earnings-per-share in a range of \$9.08 to \$9.15 for the year, down from \$9.25 to \$9.40 previously. We have updated our estimates for the current year accordingly.

Growth on a Per-Share Basis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
EPS	\$3.72	\$3.39	\$2.63	\$2.36	\$3.78	\$4.35	\$6.49	\$7.28	\$8.26	\$7.43	\$9.12	\$16.07
DPS	\$0.75	\$0.90	\$1.10	\$1.26	\$1.42	\$1.57	\$1.70	\$1.93	\$2.14	\$2.36	\$2.52	\$4.44
Shares²	381	381	378	379	373	375	374	373	380	376	376	368

Stryker has grown earnings-per-share at a rate of 8% per year since 2011, but 16% over the last five-years. We reaffirm our earnings growth rate of 12% as it strikes a balance between the long-term and medium-term growth rates while also taking into account our expectations for increased demand for Stryker's products during the recovery from the pandemic. The company was very resilient during the last recession, only seeing a \$0.01 decline in earnings in 2009. The company did see earnings declines in 2013 and 2014 as well, but growth quickly returned in the ensuing years. Stryker has increased its dividend at an average rate of almost 14% per year over the past 10 years, though that growth has slowed recently. The company raised its dividend by 9.6% for the 1/31/2021 payment. We see the payout rising to \$4.44 per share by 2026, up from the current \$2.52.

Valuation Analysis

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	Now	2026
Avg. P/E	14.8	15.8	25.9	35.2	25.2	25.4	28.7	22.8	24	26.9	29.2	24.5
Avg. Yld.	1.4%	1.7%	1.6%	1.5%	1.5%	1.4%	1.3%	1.2%	1.0%	1.1%	0.9%	1.1%

Shares of Stryker have decreased \$4, or 1.5%, since our 7/28/2021 update. Based off of updated estimates for 2021, shares trade with an earnings multiple of 29.2. Given the organic growth that the company produces under normal conditions and the benefit from acquisitions, we are reaffirming our 2026 target P/E to 24.5 to match the average valuation since 2011. If shares reverted to our target price-to-earnings ratio by 2026, then valuation would be a 3.4% headwind to annual returns over this time period.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2026
Payout	20%	27%	42%	53%	38%	36%	35%	27%	25%	32%	28%	28%

Stryker's strength during the most recent recession should give shareholders the confidence that the company can thrive in a difficult economic climate. As the leader in the medical device sector, Stryker's products are in demand around the world. For example, the company continues to see growth in its Mako robot installations, as well as a higher number of procedures performed. These figures are likely to grow as more surgeons become comfortable with using a robot during surgery. Another competitive advantage Stryker has over its peers is its organic growth. Over the past 4 years, Stryker has averaged 6.4% organic growth while the medical device sector has averaged 4.2%. Investors are willing to pay up for that type of growth, which is why the company's price-to-earnings ratio has been higher than normal in recent years.

Final Thoughts & Recommendation

Following third quarter results, Stryker Corporation is now projected to return 9.1% annually over the next five years, down slightly from our prior estimate of 9.3%. Our projected return stems from a 12% earnings growth rate and starting yield of 0.9% partially offset by a slight headwind from valuation reversion. Stryker's reported sales were very strong during the quarter, driven by acquisitions. COVID-19 once again removed some of the demand, particularly in the U.S. We have lowered our 2026 price target \$9 to \$394 and rate shares as a hold due to projected returns.
