Overview & Current Events

American Water Works is the largest and most geographically diverse, publicly traded water and wastewater utility company in the United States, as measured by both operating revenues and population served. The company provides drinking water, wastewater, and other related services to over 15 million people in 46 states. Its regulated business includes 52,500 miles of pipe, 560 water treatment plants, 160 wastewater facilities, 1110 wells, and 76 dams. The company also provides water and related services to the U.S. government and U.S. military through 17 installations. American Water Works generates around \$4 billion in annual revenues and based in Camden, New Jersey.

On February 16th, 2022, American Water Works reported its Q4 results for the period ending December 31st, 2021. Revenues increased by 3.03% year-over-year, to \$951 million, with overall operations remaining quite stable. EPS came in at \$3.55, a significant increase from last year's \$0.80. However, Q4 and full-year results include a one-off gain of \$2.70 per share, which reflects the completion of the sale of HOS in December.

The company invested \$1.9 billion in its infrastructure during FY2021, adding approximately 20,000 customer connections through closed acquisitions and organic growth. The company now has general rate cases in progress in six jurisdictions and filed for infrastructure surcharges in two jurisdictions, reflecting a total annualized revenue request of approximately \$242 million. For FY2022, management expects EPS to land between \$4.39 and \$4.49, the midpoint of which we have utilized in our estimates. Management also reaffirmed its medium-term EPS and DPS growth estimates.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$2.03	\$2.07	\$2.36	\$2.66	\$2.63	\$2.39	\$3.15	\$3.43	\$3.91	\$6.96	\$4.44	\$6.52
DPS	\$0.96	\$1.09	\$1.21	\$1.33	\$1.47	\$1.62	\$1.78	\$1.96	\$2.15	\$2.36	\$2.41	\$3.71
Shares¹	177.7	179	180	180	179	179	180	181	181	182	182.0	190.0

American Water Works has a highly stable and robust track record both in terms of its profitability and its dividend payments. The company enjoys an extremely resilient business model due to water being a necessity both for residential and industrial usage, as well as a mission-critical asset for the military. As a result, American Water has been able to grow its network and operations with limited risks. Over the next nine years, the company expects to invest approximately \$30 billion in renewing its infrastructure, achieving operational efficiencies through new technologies, ensuring water quality, and expanding its overall operations. Management continues to expect EPS to grow by approximately 7%-9% annually through 2026, powered by 5%-7% from regulated investment CAPEX, 1.5%-2.5% from regulated acquisitions, and <1% from military services. EPS growth includes rate base increases which the company estimates to grow by a CAGR of 8%-9% through 2031. We have utilized an EPS CAGR of 8.0% in our calculations, which is the mid-point of management's guidance.

Due to the company's predictable cash flows, the dividend had grown annually, displaying at 5 and 10-year CAGR of 10.5% and 8.3%, respectively. Management expects to grow the dividend between a rate of 7% and 10% through 2026. We have set our expected growth rate at 9% through 2027, which we believe the company can comfortably afford.

¹ Share count is in millions.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	16.7	19.3	20.3	19.2	28.5	32.2	27.3	33.8	32.7	24.4	33.4	32.0
Avg. Yld.	2.8%	2.7%	2.5%	2.6%	2.0%	2.1%	2.1%	1.7%	1.7%	1.4%	1.6%	1.8%

American Water Works' valuation has greatly expanded over the past decade. This has also been the case with all of the company's industry peers, who have also seen their multiples expand considerably. This is due to the market treating water stocks (along with their dividends) as ultra-safe investments amid their high operational predictability. Due to their payouts being some of the safest in the market, investors have been flocking to water stocks, whose yield declines have been mimicking the decline in the rate of T-bills very closely. With rates expected to remain relatively low in the medium-term, we expect both the stock's yield and valuation to remain quite low and quite hefty, respectively. That being said, we forecast a slight potential valuation compression to a P/E of around 32, which in our view, reflects the company's qualities, while also making for a fairer earnings multiple.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	47%	53%	51%	50%	56%	68%	57%	57%	55%	34%	54%	57%

American Water's dividend can be viewed as extremely safe. The payout ratio is just under 55%, and the company has a very clear and predictable path towards growing its EPS. Its cash flows are of high quality due to water being an essential commodity, with much-anticipated consumption rates and robust pricing power. Additionally, the company enjoys a rock-solid competitive advantage, operating in an oligopolistic industry, which is also very capital intensive and hence almost forbids new market participants. The company is the biggest amongst its peers, while its relationship with the government also adds to its already great moat. We expect American Water to deliver resilient results even through a prolonged recession. The company is not meaningfully correlated to the underlying economy. Hence the excellent results during the past couple of year, despite COVID-19.

Final Thoughts & Recommendation

American Water Works has managed to reward its investors with rich returns with great consistency. That being said, the company's secure business model and incredibly predictable cash flows and growth trajectory have caused the stock's valuation to expand significantly. Hence, current investors are subject to overpaying while also buying into a very thin yield, which translates to softer tangible returns. Still, the stock could manage to retain its premium. Based on management's reaffirmed medium-term guidance, we forecast annualized returns of around 8.7% in the medium-term. Accordingly, we have assigned a hold rating to the stock. We highlight that AWK offers one of the most predictable future total return-return profiles amongst dividend-paying stocks.
