Overview & Current Events

First American Financial Corporation traces its roots back to 1889 when two firms opened to handle title matters in the brand-new county of Orange County, California. In 1894, these two entities merged into the Orange County Title Company, the immediate predecessor to what is known today as First American Title Insurance Company, the largest subsidiary of First American Financial Corporation. In 1988, First American opened title insurance offices in Canada. Shortly after, they used a similar business model to develop international operations across the globe. First American was the first title insurance provider in Mexico, Korea, and Honk Kong and today has the leading market share in Australia and England.

First American trades on the NYSE under the ticker FAF and has a market capitalization of $7.6 billion. FAF provides insurance through two segments: title insurance and related services and specialty insurance. Title insurance and related services include real estate insurance, property closing services, escrow, risk mitigation, real estate data products and related real estate transaction services. The title insurance sector provides insurance to residential and commercial customers. In 2021, FAF generated a record $9.2 billion in revenue.

FAF released fourth quarter and full year results on February 10th. The company generated revenue of $2.4 billion in the fourth quarter, up 10% compared to last year. Net income per share of $2.33, however, was a 6.4% decrease compared to $2.49 in the prior year quarter. The corporation closed title orders were down 19%, however the revenue per title order closed rose 36% year-over-year. Average revenue per order grew 37%, driven by the shift in the order mix from lower premium residential refinance transactions to higher-premium commercial and purchase transactions.

For the full year, the company generated revenue of $9.2 billion, a 30% increase compared to 2020. Net income equaled $1.2 billion, compared to $696 million in the prior year. On a per share basis, net income of $11.14 towered over the $6.16 earned in 2020. In the year, the company repurchased 1.7 million shares for $99 million.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	$2.77	$1.71	$2.15	$2.62	$3.09	$3.76	$4.19	$6.22	$6.16	$11.14	***$6.90***	***$8.81***
DPS	$0.36	$0.48	$0.84	$1.00	$1.20	$1.44	$1.60	$1.68	$1.78	$1.94	***$2.04***	***$2.60***
Shares[3]	107.2	106.0	107.5	109.1	110.0	110.9	111.5	112.5	113.0	111.4	***109.0***	***108.0***

Earnings per share, while somewhat bumpy at times, trended upwards strongly into 2019, and the COVID pandemic did not cause major distress for the firm in 2020. In 2021, FAF generated very strong results. FAF was able to grow their earnings by 17% and 29% annually over the last nine and five years on average, due to the upward momentum experienced in recent years. We believe going forward, FAF will continue growing earnings at roughly 5%. We also estimate that the dividend will grow in-line with earnings here, at 5%. FAF's markets are experiencing higher revenue and increased transaction activity, bolstered by low interest rates. Additionally, while low interest rates fueled the demand for home purchasing, and residential refinancing in the prior year, rising rates should weigh on sales in 2022.

First American Financial Corp (FAF)

Updated February 14th, 2022 by Quinn Mohammed

FAF's growth strategy revolves around three pillars: profitably grow the core title and settlement business, strengthen the enterprise through data and process advantage, and manage and actively invest in complementary business where FAF has a strategic advantage. The company will also make value-creating investments in the core business and acquire or invest in businesses that fit within their strategy, such as the ServiceMac acquisition in 2021.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	6.7	14.3	13.1	14.1	12.4	12.1	12.7	8.9	8.4	7.8	***10.0***	***10.5***
Avg. Yld.	1.9%	2.0%	3.0%	2.7%	3.1%	3.2%	3.0%	3.0%	3.5%	2.9%	***3.0%***	***2.8%***

First American Financial Corp trades at 10.0 times this year's earnings expectations of $6.90. This is 9.9% below the 9-year average PE of 11.1 and is unchanged with the 5-year average PE of 10.0. Our estimated fair value of 10.5 times would result in gains of 1.0% due to the valuation expansion. With a higher valuation, we expect the yield to drop slightly, down to 2.8%, still higher than the S&P 500's sub-2% yield.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	13%	28%	39%	38%	39%	38%	38%	27%	29%	17%	***30%***	***30%***

FAF has a fairly stable payout ratio in the 30% to 40% range on average, however in the past couple of years the payout has dropped as earnings grew significantly. FAF was not a public company during the great financial crisis, however it's entrenchment into the housing market which had great difficulties in that recession would have likely caused problems in the company's earnings, so we don't consider FAF to be recession resistant. FAF has a data advantage amongst its peers, which they can leverage to achieve market-leading title automation. Additionally, FAF is geographically diversified and was even the first title insurer in some countries, and in others they possess the leading market share.

Final Thoughts & Recommendation

First American Financial Corporation has more than one hundred years in the title insurance business and is investing into technology to raise their top and bottom lines. The company will produce total returns through EPS growth of roughly 5%, the strong yield of 2.8%, and also valuation expansion of 1.0%. We estimate that FAF can produce total returns of 8.6% over the medium term and believe the company trades at 95% of fair value, thus we rate FAF a Hold.
