Overview & Current Events

L'Oréal is one of the largest cosmetic conglomerates in the world, boasting a portfolio of 36 household brands. The company offers shampoos, hair and skincare products, shower gels, cleansers, styling and make-up products, perfumes, and other related goods, through some of the most recognized brands in the world. These include Garnier, Maybelline New York, Giorgio Armani Beauty, Kiehl's, Urban Decay, Biotherm, and Ralph Lauren. L'Oréal generates around \$36 billion in annual sales and is based in Paris, France. All figures in this report have been converted to USD unless otherwise noted.

On February 9th, 2022, L'Oréal reported its full-year results for the period ending December 31st, 2021. Revenues for the year came in at \$26.8 billion, a 15.3% increase compared to last year, recovering from 2020's beaten-down results following the pandemic outbreak. L'Oréal also recorded powerful e-commerce sales growth of 25.7%. E-commerce sales now account for 28.9% of total sales, which is rather impressive.

The Consumer segment, which was largely unaffected by the COVID-19 pandemic, grew 4.5% year-over-year. Professional Products, L'Oréal Luxe, and Active Cosmetics divisions grew sales by 22.2%, 21.3%, and 30.3%, respectively, as they had been negatively impacted by the pandemic last year. Further, all geographic zones grew by double-digit rates.

As a result, earnings per share for the year grew 20.9% in constant currency to \$10.06. Based on L'Oréal's current sales trajectory, improving margins amid higher e-commerce sales, and the current EUR/USD exchange rate, we forecast FY2022 EPS of \$12.30.

Management proposed a base dividend raise of 20% to €4.80, or €5.28 including the loyalty bonus (see below), implying a FY2021 dividend of around \$6.02. The dividend is not to be paid before April of 2022.

Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
EPS	\$6.32	\$6.82	\$10.30	\$6.43	\$5.85	\$7.68	\$7.97	\$7.51	\$7.78	\$10.06	\$12.30	\$16.08
DPS	\$3.03	\$3.44	\$3.27	\$3.37	\$3.47	\$4.26	\$4.41	\$4.32	\$4.89	\$6.02	\$6.02	\$7.68
Shares³	605	608	585	565	565	564	563	563	562	560	560	550

L'Oréal's EPS and DPS, as shown in the table, have both been affected by FX over the past decade when expressed in U.S. dollars. The company's EPS and DPS have grown by around 5.3% and 7.9% over the last 10 years, though these rates are actually higher in the company's original Euro reporting. The company's EPS could keep growing at its current, very consistent rate, powered by organic growth, price increases, and the gross profit margin expansion due to its economies of scale. The company is a consumer staples behemoth not only in Europe but also globally, enjoying very predictable sales increases based on global demand trends. We are forecasting a 5.5% intermediate growth rate, which includes some potential FX headwinds in the future. Dividends are paid once annually. L'Oréal boasts one of the longest dividend

¹ Estimated dates based on past dividend dates.

L'Oréal S.A. (LRLCF)

Updated February 10th, 2022 by Nikolaos Sismanis

growth records amongst European firms, with its latest dividend increase of 20% marking 22 years of annual increases (in Euros). The company offers a unique perk to its long-term shareholders. Those holding shares for at least two years receive a 10% “loyalty bonus” on its original dividend. We are forecasting DPS growth of around 5% in the medium.

Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027
Avg. P/E	20.6	24.0	15.0	27.4	29.9	27.3	30.9	37.4	41.1	41.5	33.7	30.0
Avg. Yld.	2.3%	2.1%	2.1%	1.9%	2.0%	2.0%	1.8%	1.5%	1.5%	1.3%	1.5%	1.6%

L'Oréal's valuation has expanded significantly over the past decade. As a result, L'Oréal's yield has been in decline. This is primarily due to negative interest rates persisting in Europe, causing investors to overpay for high-quality companies such as L'Oréal. Additionally, the company's “loyalty bonus” discourages investors from selling their shares, furtherer sustaining the high valuation. We are using a fair value estimate of 30 times earnings, implying the possibility of some multiple compression.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	48%	50%	32%	52%	59%	55%	55%	58%	63%	60%	49%	48%

L'Oréal's dividend should be considered quite safe. The company benefits from consistent profitability, which allowed it to keep raising its payout even during the Great Financial Crisis. The payout ratio currently stands at a healthy level, around 49%. L'Oréal's competitive advantage lies in its sheer size, which has resulted in the company accumulating a significant market share. Its companies have massive brand values, generating consistent sales globally. Hence investors should expect a relatively stable performance even under a harsh recession, as was the case during 2007-2008. Finally, L'Oréal has almost zero long-term debt on its balance sheet, with a long-term debt/equity ratio of 6.7%. The company primarily self-funds its operations and capital expenditure requirements.

Final Thoughts & Recommendation

L'Oréal is one of the most respected European stocks, featuring an incredibly consistent record of shareholder returns. The company's capital returns have been growing for years without interruption, while its “loyalty bonus” program has been a phenomenal strategy to reduce share price fluctuations over time. However, the stock's valuation could prove to be a headwind in the future. Further, investors have compressed L'Oréal's yield to just 1.5%. Despite the company's decent growth metrics, total return potential comes in at just 4.6% per annum, assuming the valuation multiple were to normalize. It's also worth noting that France applies a considerable dividend withholding tax of 30% under typical circumstances, which could further decrease our expected returns. Shares earn a sell rating.
