## Overview & Current Events

Nucor is the largest publicly traded US-based steel corporation based on its market capitalization of \$27.2 billion. The steel industry is notoriously cyclical, which makes Nucor's streak of 48 consecutive years of dividend increases even more remarkable. Nucor is a member of the Dividend Aristocrats Index due to its dividend history. The company faces challenges from international competitors. Some countries (including China), subsidize their steel industry, making steel exported to the United States artificially cheap. President Trump signed a bill in 2018 placing a 25% tariff on imported steel for all countries except Canada and Mexico, which has helped combat this for Nucor and its competitors.

On 01/27/22, Nucor reported fourth-quarter 2021 earnings. The company's Q4 earnings stood at \$7.97, up remarkably from \$1.30 year-over-year. The company's revenue increased significantly by 97.0% to \$10.36 billion year-over-year. Total shipments to outside customers stood at 6.41 million tons, down 11% quarter-over-quarter and down 1% year-over-year. Q4 average sales price per ton increased 12% quarter-over-quarter and 99% year-over-year. Furthermore, overall operating rates at the company's steel mills in the fourth quarter fell to 89% from 96% sequentially and 87% in the year-ago quarter. Meanwhile, consolidated net sales increased 97% to \$10.36 billion from \$5.26 billion in the year-ago period.

## Growth on a Per-Share Basis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
<b>EPS</b>	\$1.58	\$1.52	\$2.22	\$1.11	\$2.26	\$3.57	\$7.64	\$4.24	\$4.40	\$23.44	<b>\$19.00</b>	<b>\$6.00</b>
<b>DPS</b>	\$1.46	\$1.47	\$1.48	\$1.49	\$1.50	\$1.51	\$1.52	\$1.60	\$1.61	\$1.72	<b>\$2.00</b>	<b>\$2.20</b>
<b>Shares<sup>3</sup></b>	318	318	319	318	319	318	305	301	298	272	<b>272</b>	<b>260</b>

Nucor's earnings-per-share fluctuate with steel prices. The company's previous all-time earnings-per-share high came in 2008, which coincided with the all-time high price of steel in the US. At present, the company is going through a boom, as earnings per share set a new all-time record in 2021 and appear likely to remain robust this year as well.

We see the dividend continuing its decades-long streak of growth, rising from the current \$2.00 per share to \$2.20 in five years. While the company is expected to generate an enormous earnings-per-share of \$19.00 this year, we are assuming an earnings power of \$5.00.

## Valuation Analysis

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	Now	2027

Due to Nucor's earnings cyclicality, we prefer to compare the company's forward dividend yield to its historical average dividend yield. Nucor's dividend yield has hovered around 3% over the past decade. However, the recent rally in the stock leaves it yielding just 2%. Furthermore, expected normalized earnings power-per-share this year puts the price to earnings multiple at 20.0, which is significantly above our fair value estimate of 12.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	92.4%	96.7%	66.7%	134%	60.5%	42.1%	21.0%	30.1%	57.9%	32.4%	<b>40.0%</b>	<b>36.7%</b>

As a commodity producer, Nucor is vulnerable to fluctuations in the price of steel. Steel demand is tied to construction and the overall economy. During the Great Recession, the company saw earnings-per-share decline from \$6.01 in 2008 to a loss of \$0.94 in 2009, and the stock lost two-thirds of its market capitalization in just six months. Investors should be aware of the significant downside risk of Nucor as it is likely to perform poorly in a protracted recession.

That said, Nucor has raised its base dividend for 48 straight years. This indicates the strength of its business model and management team. The company had a payout ratio of 58% in 2020 which is abnormally high due to impacts from the coronavirus and the economic downturn. Nucor receives commendation for its ability to land on the Dividend Aristocrats list despite a highly cyclical business model. That being said, investors cannot be fully assured of future dividend increases due to this cyclicality.

While competitive advantages are difficult to come by for a commodity producer, Nucor's low cost of production and immense scale are certainly helpful when competing for new business.

## Final Thoughts & Recommendation

Nucor has a competitive advantage in the steel industry, which is expected to be around for a long time to come. It is a low-cost producer and has a healthy balance sheet. It is also a Dividend Aristocrat and almost a Dividend King. However, with the valuation on normalized earnings well above our target of 12 times earnings, we see Nucor offering negative total returns in the coming years. Due to this, we rate shares a sell.
